

Great Lakes Exposition at Night

Looking across the Court of Presidents at the Great Lakes Exposition on Cleveland's lake front. In the distance is the aurora borealis lighting of the Marine Theatre. Between it and the Court of Presidents is the double row of ships' masts flanking the Lake Erie Plaza.

Lancaster Stock Market

CORRECT INFORMATION FURNISHED WEEKLY BY THE PA. BUREAU OF MARKETS FOR THE BULLETIN

Market on fat local fed steers closing for the week at prices 15 to 40 lower than a week ago, those showing most decline are heavy-weights. Light weights and low cost steers showing least decline, at the reduced values buyers bought cattle and at the close Friday, the dry fed steers were well cleaned up. Helfers 25 lower since Monday. Bulls, both fat and hologna, selling at firm prices. Cow market slow at barely steady prices.

Stock steers in fairly liberal receipts, those showing sole quality in fair demand and prices show no change in value for the week. Bulk on sale are plain to medium grades, these moving slow at prices 25 lower than week ago and common tail ends not wanted except at trimmer price which are around 4.25 to 4.50. Stock bulls more plentiful, good quality selling around 6.50, medium to fair grades at 5.25 to 6.00 and plain kinds on down to 4.50.

Calf market closing for the week at prices 50 lower than week ago, good and choice locals selling 10.00 to 10.50, receipts light. Hogs selling at about steady prices with yesterday's 25 decline, choice Westerns 11.75 to 12.00, receipts moderate.

Lamb market closing at about steady prices, good quality absent, bulk of receipts are kinds selling from 8.50 to 9.50.

Receipts: 698 cattle, 49 calves, 103 hogs, 17 sheep.

Table with columns for livestock types (STEERS, HEIFERS, COWS, BULLS, VEALERS, FEEDER & STOCKER CATTLE, HOGS, SHEEP) and their corresponding market prices.

Our Heartiest Congratulations

We want to congratulate each of the following for having reached another birthday:

- July 6: Harry Becker, on Marietta St.
July 18: Hazel Kaylor.
July 19: Mrs. H. Lloyd Miller, Mrs. John Snively, Betty Anne Doebler, Elsie Loraw.
July 21: Mrs. Ross Amon of Gap, Louise Baker, David Wagner, Warren Bates, Jr., John Evans.
July 22: Roy Sumpman, Mrs. Robert Hostetter, Martha Young, Mrs. Mary Jane Wagner.
July 23: Anna Geib, Ruth Wagner, Mrs. Frank Fair.
July 24: Mrs. Christ Nolt, Mrs. Frank Fair.
July 24: Mrs. Christ Nolt, Mrs. John Barnhart.
July 25: Alvin Longenecker, Mark Newcomer.

MAY HAVE NEW CANCER CURE

The medical world is watching hopefully, if somewhat skeptically, experiments being carried on by Dr. Connell has developed what he believes may be a new and simple cure for cancer, although he admits that much experimenting and study is necessary before the true value of his method is determined. The method is a wide departure from the only two methods of cancer treatment now accepted by the medical profession—radium or X-ray and surgery. Dr. Connell prepares a solution from a culture of a germ causing gas gangrene and bits of cancer tissue. In administering his treatment he simply injects this solution hypodermically into the cancerous area. In experimenting on animals it proved very effective and in many cases the cancer entirely disappeared. The treatment was then tried on humans and 20 persons who were hopeless victims of cancer showed marked improvements. Dr. Connell's belief is that an enzyme (powerful chemical substance) formed by the interaction of the germ culture and the cancer cells is capable of dissolving cancerous growths.

Social Security Funds To Provide For Broader Health Service In Pennsylvania

Harrisburg, July 9—Checks totaling \$180,598—first benefit payments from the Federal Government under the Social Security Act—have been received by the State Department of Health, Dr. Edith McBride-Dexter, Secretary of Health, announced today.

The money constitutes the first quarterly installment on what will amount to approximately \$700,000, to be used by the State of Pennsylvania for general expansion of its existing health services.

No legislation was necessary to enable the Department of Health to accept Federal Social Security funds. The task of setting up an organization to do the work made possible by the additional money is already complete, and much of the work is under way.

Slightly more than \$400,000 of the total sum allocated to Pennsylvania is to be given to the Department of Health by the United States Public Health Service, to be used in developing general public health activities. Of the remainder allotted for health work, \$152,980 will be used for maternal and child health services and \$133,604 is to be spent for crippled children work.

The allocation from the United States Public Service makes it possible for the first time for the Department of Health to use in a systematic manner the Mantoux test to determine the presence of tuberculosis among children and the X-ray.

Two X-ray laboratories mounted on motor trucks and manned by competent technicians will enter the fourth-class rural districts giving the children Mantoux tests and taking X-rays of those with positive reactions. Early detection of tuberculosis is a prime factor in reducing the death rate from the disease which still ranks sixth as a major cause of death in Pennsylvania and takes more lives be-

twen the ages of 15 and 40 than any other disease.

The number of clinics for the diagnosis of tuberculosis has been increased to 86, and for the first time, general supervision of these clinics has been placed in the hands of a physician with extensive training in the field of tuberculosis.

Dr. Murray J. McElwee, of McKeesport, who has been appointed Chief of Tuberculosis Clinics, served as staff physician at tuberculosis sanatoria in Kentucky and Wisconsin before coming to the Pennsylvania State Tuberculosis Sanatorium at Mount Alto a year ago. He was transferred later to Cresson and from there to the position of clinic supervisor under the Social Security program.

Another phase of public health work which is to benefit under the Social Security Act is epidemiology. This is the "Sherlock Holmes" field of public health work and consists of tracking down contagious diseases to their sources, so that steps may be taken to prevent further spread.

Additional epidemiologists will be added to the State staff, together with a statistician to correlate the valuable information which the Bureau of Health Conservation has been gathering for many years.

The control of venereal disease also will be extended with the addition of several genito-urinary clinics and a closer follow-up of patients applying for treatment.

PREVENT HOME ACCIDENTS

Many serious accidents in the home can be prevented by removing the causes. Obstacles in the pathway often cause falling. Rugs sometimes trip persons walking through a room. Proper lighting on stairs and freedom from an array of articles on the steps will be helpful. Elimination of fire hazards also helps to prevent accidents.

HIGHWAY SNOW REMOVAL COST STATE \$5,772,359

Crews Worked In Field All But 45 Days During Winter

Harrisburg, July 9—Highway snow removal during the most severe winter in nearly half a century—a winter in which emergency pleas for help came from communities in record-breaking volume necessitating work on every mile of hard surface road in the State—cost \$320 per registered motor vehicle, Warren Van Dyke, Secretary of Highways, announced today.

This gigantic undertaking, dwarfing all others in the snow removal history of the Department which dates from 1927, cost \$5,772,359 and required 716,784 man-days of employment.

Of this total amount of work Department forces supplied 280,583 man-days WPA workers, 436,141; and CCC boys, 60.

From the time snow crews were first called out, November 17, until the final report, April 8, men were in field on all but forty-three days. However, even on these days equipment was serviced and cinders hauled into reserve positions to be ready for the next fight with the elements, so that the battle was practically continuous from Thanksgiving Day to Easter.

Extreme conditions during February brought the snow army out every day; and during December, January and February crews were in the field on all but three days.

When the 1935-36 snow removal program was set up last summer, plans were made to clear 15,375 miles of major highways and connecting links. This schedule represented an increase of nearly 3000 miles over the largest previous snow mileage, that of 1934-35, which cost \$2,639,539.

Severe storms of late January, however, ruined this estimate. Marooned communities asked for emergency service to permit them to receive food supplies and every mile of hard surface road in the State was ordered opened as speedily as possible.

It is estimated that this special service on the heels of the January blizzards alone added more than \$1,000,000 to the snow removal bill.

But with King Winter doing his worst major highways of the State were blocked in only rare cases and for short times. Rural roads were given prompt attention as soon as major arteries were cleared and inconvenience was minimized.

Special details were dispatched to answer emergency calls which ranged from aid for the stork in York county to clearing the way for a funeral cortege upstate.

"It is significant to note that although Pennsylvania highways were blocked on occasions, traffic in the State moved longer and was resumed sooner than in neighboring states," Secretary Van Dyke said.

STOP APHIS ATTACK

Where the potato aphid is attacking tomatoes the insect can be controlled by spraying with nicotine sulphate, applied at the rate of one pint with 4 or 5 pounds of dissolved soap in 100 gallons of water. The spray should be applied as soon as the aphids are seen on the tomatoes.

Frank Pawling, Coatesville councilman, who refused to permit Sunday bathing was "fired," a new man appointed and the pool opened last Sunday.

Sale Register

If you want a notice of your sale inserted in this register weekly from now until day of sale. ABSOLUTELY FREE, send or phone us your sale date and when you are ready, let us print your bills. That's the cheapest advertising you can get.

Thursday, July 16—On the premises half a mile north of Rheims, 50 head of cows and 30 head of shoats, bulls and heifers by L. R. Mummau. See advertisement.

Saturday, July 25—On the premises along the eastern side of Lemon street, in the village of East Petersburg, public sale of valuable real estate, 2 1/2 story frame dwelling house, frame garage and butcher house. Sale at 2 P. M., S. T. by Emma H. Mumma, Administratrix as Trustee of the estate of Jacob E. Mumma, deceased. E. V. Spahr, Auct.

Saturday, September 5th—On the premises on West Steigle Street, in the boro of Manheim, public sale of real estate, consisting of an undivided one-half interest in the two and one-half story, two family frame dwelling house, by Emma H. Mumma, Administratrix as Trustee of the estate of Jacob E. Mumma, deceased. E. V. Spahr, Auct.

Metal roof coverings are fire-resistant and, when properly grounded, usually require little further precaution to make them reasonably safe from damage by lightning. If not grounded, metal roofs do not protect from lightning and may even increase the risk.

What's This! Ice Skating In July?

BELIEVE IT OR NOT—but there's ice skating in Texas this summer; and here's the proof of it. It's on the ice floor of the Black Forest, many-featured Midway attraction of the \$25,000,000 Texas Centennial Exposition.
