EDITORIAL

It took 75 men seven months to widen the road from Smithville to Truce, on a PWA project. It took less men less time to build that same road. Of course the idle must live and eat as well.

Now that nearly all the holidays, half holidays closing and vacations are over, I guess we can settle down to business again.

All that remains for a few sections to get back on regular instead of fast time and we'll be all set for the big presidential election in November.

CAN NOW SEE ADVANTAGES

When Boro Council considered the sale of our park to the Government, a few people objected. These objections were finally overcome and the site sold. When the money derived from the sale of the plot was invested in a park plot, it was more beneficial to our citizens in one year than it would have been in fifty as it were.

The present park will stand as a memorial to all who in any way assisted in making it possible.

Reaching the peak of the tourist trade, the receipts on the Columbia bridge shattered all previous records. The toll collected during August was \$48,196.35, an average of \$1,554 a day. That surpasses all records.

With such excellent patronage we can see no good reason why the toll should not be reduced. Local folks who use the bridge daily pay their 50c for a round trip and pay it quite often. They are actually the ones who are bearing the blunt of the cost.

Similar bridges at Harrisburg and Clarks Ferry only charge a nickel.

YOUR PERSONAL CIGARET TAX IS \$18 A YEAR

You pay \$18 a year in taxes if you smoke a pack of cigarettes each day. And how much does your automobile actually cost you in taxes? You pay between \$15 and \$25, if not more, in gasoline taxes alone. You probably pay \$5 in taxes on your electric light bills. The average family is compelled to pay, indirectly, in taxes which would buy the family's food for fourteen weeks.

There are no tax-exempt citizens. The citizen who wastes government money decreases his own personal income. This fact must be accepted: The cost of government falls upon all of its citizens, either directly or indirectly.

THINGS ONE REMEMBERS

Listening to the "Newspaper of the Air" over the radio, I recently heard a long list of projects that were to be built with government money. Millions and millions, and hundreds of millions of dollars were involved. The money came from the people by the "taxation route." It was being spent largely on "tax-exempt" government enterprises.

One could not help contrasting this type of spending with the investments and developments made by private citizens in industrial activity—activity which creates new taxable assets, new wealth, permanent jobs and new opportunities.

Sooner or later the politicians will have to again encourage the private individual who produces something that can be taxed, or they won't be able to get the revenue to build bigger and better tax-exempt, government-owned projects to compete with highly taxed private citizens. At least it's worth thinking over.

ARE YOU AN "UNCONSCIOUS ARSONIST?"

Bad news comes from the National Board of Fire Underwriters.

The fire loss for the first seven months of 1936 is over \$20,000,000 in excess of the same period in 1935.

It is possible that higher property values are to an extent responsible for the increase. But human carelessness, human indifference, and human ignorance are an infinitely more important factor. The American people show what can only be described as a criminal disregard of the hazards responsible for the fires that destroy hundreds of millions of dollars worth of property each year—and a legion of lives.

No other country in the world suffers a fire loss as great as this country. In many European countries the person responsible for fire must pay for any damage the blaze does to his neighbor's property.

It would send our fire loss into a tail-spin if our citizens adopted the attitude of mind that the European law represents. Every citizen should realize that it is a crime against society—even though it is not listed in the law books—to permit fire hazards to go uncorrected and to take the chances that lead to fire. And every citizen should likewise understand that practical fire prevention requires but little effort and little money.

Don't be an "unconscious arsonist"—a term that can be justly applied to anyone who neglects fire hazards on his property, or doesn't trouble to unearth them. Fire prevention is up to every one of us—and if we all accept the responsibility, at least eighty per cent of fires can be eliminated.

THE "HOMETOWN" PAPER PLAYS IMPORTANT ROLE

The "hometown" newspaper, be it the smallest weekly, plays an important role in the lives of many people in many states. Almost daily the mail of the Pennsylvania Scenic and Historic Commission reveals that former Pennsylvanians are still in touch with their native State through the news columns of their "hometown" papers.

In requesting scenic and historical map folders and booklets offered by the Commission for free distribution, quite a number make mention that they "read about it in The Mount Joy Bulletin."

The Commission mailed literature to people in more than 20 states because of news items that appeared in Pennsylvania periodicals. In almost every instance the writer advises he or she is planning a trip to the native State. All of them manifest a keen interest in the Keystone State.

A Native Of Salunga Was Killed Sun.

(From Page 1)

Myers attempted to pass Stillwagner's machine which was traveling in the same direction.

As Myers swung his car to pass, it sideswiped the Williamson machine going west and the impact hurled the roadster around where it crashed against the Stillwagner car, the official stated.

All three cars were thrown to the right side of the highway against an embankment and were badly wrecked, the officer reported. Myers was crushed against the iron posts which supported the top of the roadster.

Born at Salunga

The victim was born in Salunga, a son of William C. and Minnie M. Long Myers and has resided in Lancaster for the past 18 years. He was associated in the well drilling business with E. G. Myers and Son. He is survived by his wife, Ruth Reese Myers, his parents, and the following brothers and sisters: Gladys E. Salunga; William K. New York; Thelma, wife of Nelson G. Sneath, city; Lucille, Donald, Sarah, Hilda, Fred, May, Martha, Marian and Doris G., all home.

Services were held this afternoon with interment in Woodward Hill cemetery, Lancaster.

2 Girls Hurt When Auto Hit A Truck

(From page 1)

A truck in the same direction, had a flat tire and parked to one side of the road to repair it. As he walked to the rear of his truck to warn autoists, the Wissler car came along. He motioned for the girls to go around but they were unable to swing clear of his truck and struck the right rear side. Their car continued on about 100 feet and then turned over.

Barbara suffered severe lacerations of the head, arm and leg, and possible internal injuries, and was in a critical condition at the Lancaster General hospital where she underwent an emergency operation Thursday night. Anna Mae was also admitted to the hospital, suffering severe lacerations of the forehead, a possible fracture of the skull, and brush burns of the body. Their car was badly wrecked.

SEVEN-LEAF CLOVER FOUND

Four-leaf clovers are pikers compared to the new giant species of clover discovered in the dry regions of the state of Washington. This perennial, never before listed by science, has seven leaflets and blossoms two inches in diameter. Although apparently common in that section for years, C. V. Morton of the Smithsonian Institution is the first botanist to report on the plant.
