EDITORIAL

It is no longer a question whether a man is a Democrat or a Republican. It is whether he is first an American and, primarily, a patriot.

Autoists took the second toll of pedestrians at Florin within the past few years. Contractor Jacob Snyder met his death that way and Saturday night John Dunk was the second victim.

Now that the Republican registration in Lancaster county outnumbered the Democrats 30,455 to 13,250, the result of the Fall primary is practically settled. Those 17,705 should certainly be a majority.

The Marietta Lions are setting excellent examples for other service clubs. Recently they took over 100 boys to a ball game at Philadelphia and next Tuesday its the girls' turn. All girls (ages 9 to 16) who desire, will be taken to Hershey for a trip through the zoo and park.

4-H MEMBERSHIP GROWS

One of the most hopeful signs for the future of agriculture, is that the enrollment in 4-H clubs passed the million mark for the first time, in 1936. Membership continues to increase.

The young men and women who join the 4-H will be the producers of tomorrow. In their club work, they are instructed in new methods and techniques that make it possible for the farmer to raise larger crops and earn a greater return. They are given an opportunity to develop qualities of leadership that will prove invaluable to them in the future—for example, in the agricultural cooperative movement which is constantly growing in size and economic and social significance. In brief, they are wisely making careers of farming.

EVERY FOURTH WORK DAY

"Americans must work nearly one full year out of every eight—or about six weeks out of every year—just to pay the cost of the Federal government," says the United States News.

"When the local and state government costs are added to the expenditures of the national government, the average American must work two years out of every eight to pay the cost of government."

The tax collector gets a cut in every pay check. His unseen hand reaches in and takes part of all the money you spend—for food, amusement, clothing, train fare, power service. And his percentage is today greater than it ever was in peace time in this country.

The Twentieth Century Fund estimates that total government costs have swelled to \$17,000,000,000 a year. That is approximately 25 per cent of the national income in good times. When you work four weeks, the public treasuries take your earnings for one of the weeks.

During the next year or so we are going to "make a break" so far as the tax problem is concerned. Every branch of government spending must be checked, from the national capitol to the city hall. We will have a let-up in tax boosting when, and only when, the voice of the people demands it.

HIGHWAY LIGHTING FOR SAFETY

"At least 35 per cent of the night fatal accidents, it seems reasonable to believe, should be prevented by the provision of adequate highway lighting," according to a report of Technological Trends recently submitted to President Roosevelt by the National Resources Committee.

Citing statistics compiled by the National Safety Council, the report proves the vital relationship of visibility to night fatalities, which in 1935 numbered 21, 480 and comprised over 60 per cent of the total day and night traffic deaths, even though only one-fifth of the 24-hour traffic is on the road after dark.

From figures submitted by the states of New Jersey, Oregon, New York, North Carolina and Pennsylvania, it was observed that fatality experience was about the same for the summer months of May, June and July as it was for the winter months of November, December and January—with this one important exception: Between the hours of 5 to 8 P. M., fatalities were 58 per cent higher in the winter months when it is dark, than in the summer when it is light, and despite the fact that traffic volume is considerably less in the winter. The report estimates that a reduction of 47 per cent in night fatalities during the winter period should be expected if sufficient light were supplied.

Studies made by R. E. Simpson in 60 cities, quoted by the report, showed that the average day fatality rate per M. T. U. (million traffic units), on streets carrying 1,500 automobiles per hour, was 0.046. The rate of night to day fatalities on these same streets, according to the grade of street lighting, varied from 8 to 1, to 47 to 1.

"While the extension of highway lighting may be justified on the basis of cold dollars-and-cents economics, based on

HAPPENINGS

LONG AGO

20 Years Ago

Choice hogs sold at \$20 per hundred at the Chicago Market.

Irwin Fridy a Donegal farmer, is the first to own a large two-ton delivery truck.

2,000 autos, 100 motorcycles, 500 teams and thousands of pedestrians attended the Camp meeting at Mount Gretna on Sunday. Quite a record.

Must stop making "Skee." After Sept. 8, no liquor may be distilled, in compliance with the Food Law recently passed by congress.

A one-pound loaf of bread for five cents. That is what Food Administrator Hoover expects to give American housewives.

State police have made 140 arrests for speeding, during the month of July.

The Ford Motor Company has a contract with the Government to make 200,000 steel engine cylinders for 1,000 per day.

The first tobacco cut in Lancaster county is now being harvested in Washington Boro. It is reported that the "Havana" will yield growers 40 cents a pound.

Mr. Charles Wealand is selling out his entire line of stationery and novelties.

It will be remembered, the large barn on the J. S. Carmany farm was destroyed by fire leaving only the stock of Jos. Strickler tenant. Many neighbors with 40 head of horses and mules, eleven 3-horse and three 2-horse teams began plowing his 20-acre field to be sown in wheat completing the work in 6 hours.

Mr. Daniel E. Felker has taken the agency for selling Paige cars.

A heavy loss in tobacco crops was suffered by the farmers in this section, due to the recent hail storm.

RETURNED FROM AUTO TRIP

Mr. and Mrs. William Givens and children, Joan, and Bonny, Middletown; Mrs. Rebecca Hipple, Mount Joy and Mrs. Emma Givens, Middletown; have returned to their homes after an auto trip that covered more than 2,000 miles. They stopped at Buffalo, N. Y., Niagara Falls, N. Y., Toronto, Ottawa, Callendar, Montreal, Quebec, Canada; New Hampshire, Cermont, Maine, Boston, Mass., Providence, R. I., Connecticut, N. Y. City, New Jersey. At Callendar they saw the Quintuplets and at Boston they witnessed a Baseball game. They were gone two weeks.

LANCASTER MAN SHOT AND KILLED BROTHER

John Gilbert Sourbeer, thirty, of 806 East Chestnut street, Lancaster, was accidentally shot and killed by his brother, Averill L. Sourbeer, late Saturday afternoon while they were hunting groundhogs on a farm southwest of Millersville.

anticipated reduction of night accidents, numerous other social effects may be expected," the report continues, mentioning the advantages resulting from the reduction in highway crime, more efficient utilization of highways, and increased comfort and enjoyment in night driving. Estimates show that about 80 per cent of traffic moves in the daytime as compared to 20 per cent at night—a fact which indicates that the tremendous investment in our highway system is in large part being wasted during the hours of darkness.

MAYTOWN

New "Pen" At Gretna Will Be Circular

(From page 1)

verts in tents drew worshippers and converts from all parts of central Pennsylvania.

It will be surrounded by 10,000 feet of tool-resistant steel mesh. There will not be a tree, not a blade of grass in the enclosure—no underbrush through which a convict might escape unseen.

The authority has designated the prison as of maximum security—that is, it will be as escape-proof as is possible. The walls of the prison will be circular.

Janeway explained that the departure from the rectangular to circular walls is prompted by the additional strength to be gained. Also the cost will be reduced. He said that to pour a concrete barricade of equal safety and resistance would increase the expenditure more than \$100,000. The center tower will be flanked by two companion enclosures.

The central prison will house another prison within itself, consisting of six cell blocks of 592 cells. At the outside gate there will be a vehicle lock and a guards' house. The two gates embracing this lock, as in all other points of ingress and egress, will lock in pairs. It will be impossible to have both open at the same time.

The inmates will pass through the receiving and quarantine units, entering the circular tower by descending in an elevator into the solid rock and through a tunnel in this rock to the interior of the huge circle. By the time a prisoner is lodged in his cell he will have passed thru a dozen locks.

An enclosure on the left will house the workshops; the one on the right will be the exercise grounds.

One feature of security is a narrow tower with a winding staircase wide enough for only one person. Up this cylinder must go every guard stationed on top of the main tower, and from this tower access is had to the other walls by two bridges.

Guards To Use Secret Codes The guard on duty in this tower controls all locks inside the prison, and he operates them only by secret codes telephoned to and from the inside. In case of emergency, this guard, by touching a master button, can secure all the main locks.

The corridor will run along the outer wall and only indirect sunlight will enter the cell after it screens through the corridor ventilators. Digging out of his cell, a prisoner has only one direction, that leading into the corridor. In any other course he would come out in another cell or compartment.

The guard on the catwalk above the cell block will be able to look through slits into every cell.

In keeping with the nature of the prison, a new death house will be established eventually, and the electric chair will be removed from the prison farm at Rockview, near Bellefonte.

G. Mason Rodehauser, Columbia, grew a sunflower stalk 12 feet high on which were 25 flowers, some a foot in diameter.

LINCOLN SHOE REPAIR ADDS NEW MACHINERY

Mr. Raymond Cicero, our wide awake east end shoe repairman, has just added another up-to-the-minute piece of machinery to his shop.

It is a Paragon Model Tru-Fit Shoe Stretcher, the newest in line. Heretofore, shoes could be stretched a trifle in length and width but this new device enables the Lincoln Shoe Repair men to stretch shoes at least an inch longer and wider.

There are four lasts to fit any type of shoe without marring their shape or style.

Get out your old shoes that were too small and take them to Raymond, he'll make you a size 1 out of a size 6.

There are less than six of these devices in Lancaster and vicinity.

ARE YOU ONLY A THREE-QUARTER WIFE?

MEN, because they are men, can never understand a three-quarter wife—a wife who is all love and kindness three weeks in a month and a hell cat the rest of the time. No matter how your back aches—how your nerves ache—how your husband takes it out on your husband. For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system; thus lessening the discomforts from the functional disorders which women must endure in the three orials of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age." Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

HOW OFTEN CAN YOU KISS AND MAKE UP?

FEW husbands can understand why a wife should turn from a pleasant companion into a shrew for one whole week in every month. You can say "I'm sorry" and kiss and make up easier before marriage than after. Be wise! If you want to hold your husband, you won't be a three-quarter wife. For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system; thus lessening the discomforts from the functional disorders which women must endure in the three orials of life: 1. Turning from girlhood to womanhood. 2.
