But the most widely-used treatment consists of sticking pins into one's anatomy. According to the Japanese way of thinking, there are more than 300 different parts of the body into which a pin can be stuck, each part being the location of a different disease.

Babies, however, are not considered strong enough to withstand these cures, so the Japanese mother deceives the germs of disease by hanging a notice outside the house informing all germs that the baby is not at home.

Silver Whitest of Precious Metals Silver is the whitest of precious metals. It is susceptible of a lustrous polish and has excellent working qualities. In its pure state it is to soft for uses wherein it is subject to wear; so it is usually alloyed with copper. The terms "ster-ling silver" and "coin silver" indicate alloy proportions. Sterling silver is alloyed in proportions of 925 parts pure silver to 75 parts copper. Coin silver contains 900 parts pure silver to 100 parts copper—this is the standard for United States coin-

The Low Down From Hickory Grove

By IZZY WISE

I been readin' where a young feller who is 17, let his car get away from him, and busted a hydrant, and it took a crew of men to shut off the geyser, and it was at 4 A. M.

And with this 17 year old goslng was a girl, 15.

And some people will condemn the 17 and 15 year olds, but they are barkin' up the wrong tree. And the ones mostly to blame, it is the two moms and the two pops of these youngsters who were out at 4 A. M.

And if this foursome does not see that their off-spring is home before sun-up, they could use a guardian too, and were maybe out 'til three-thirty themselves.

And if there is nobody to curb colt, he will sure grow up to be a wild horse, and useless-and nothing to be proud of. But boys and girls, they will be O. K. and nearer 100 percent, and will think a whole lot more of you, 10 years from now, if you clamp down now and then-and cut out the fancy didos vour ownself.

Yours, with the low down,
