Don't Wash Eggs

Eggs have a natural bloom to them when fresh. When stale they become slick, or shiny. This bloom seems to be made up of tiny pores in the shell, which may be seen upon close examination. When a hen sets on the egg a few days, when the egg becomes old, or when it is washed, these tiny pores become stopped up and the egg cannot "breathe" with a consequent deterioration in quality. For that reason, says the Missouri Farmer, eggs should never be washed if they are to be sold on the market. A better way is to wipe them off with a dry cloth, or sandpaper the spot of dirt off with a piece of sandpaper or emery cloth.

Farm Notes

The water glass method of preserving eggs for winter use is considered one of the best for household use.

Feeding hens a wet mash at noon during hot weather will help to keep them laying.

The United States Department of Agriculture estimates that there are approximately 4,600,000 honey bee colonies in the country.

Agricultural authorities say a single barberry bush can harbor 64,000,000 spores of grain-destroying, black-stem rust.

It is estimated that in the United States 12,000 dozens of eggs are laid every three minutes, day and night, throughout the year.

South Dakota's duck crop for 1937, in 58 of 69 counties, not including four United States refuges, is estimated at more than 725,000 birds.

Fourteen were hurt in coasting and auto accidents in this area last Wednesday.

When an auto and truck collided, Mrs. Christ Herr, Quarryville R. D. had her arm broken.

Tributes Paid To Swedenborg

TRIBUTES TO the achievements of Emanuel Swedenborg, the 250th anniversary of whose birth will be commemorated January 29, 1938, will be paid by scholars, scientists and theologians throughout the world. Called briefly from past comments on his life work are these quotations: "The truths passing out of his system into general circulation are now met with every day, qualifying the views and creeds of all churches, and men out of the church."—Ralph Waldo Emerson.

"Men no less distinguished by their wisdom than their worldly rank have publicly adopted Swedenborg's beliefs, which are indeed more consoling than those of any other Christian communion."—Honore De Balzac.

"Swedenborg's message has meant so much to me. It has given color and reality and unity to my thought of the life to come; it has exalted my ideas of love, truth and usefulness; it has been my strongest incentive to overcome limitations. Swedenborg's 'Divine Love and Wisdom' is a fountain of life I am always happy to be near."—Helen Keller.

"As a natural psychologist and theologian he has strong and varied claims on the gratitude and admiration of the professional and philosophical world."—Samuel Taylor Coleridge.

"I have always admired Swedenborg's genius, and I did homage in 1911 at his tomb in the Cathedral at Upsala."—William Lyon Phelps.

"I have the profoundest honor for the character and work of Emanuel Swedenborg. I have from time to time gained much from his writings. It is impossible to say a little on so great a theme."—Phillips Brooks.
