

NAVY DAY, OCT. 27, 1939
FOOD FOR THE NAVY

Of inestimable value to America's farmers are the sailors aboard Uncle Sam's battleships. Each year the navy purchases millions of pounds of foodstuffs.

During the past fiscal year, navy cooks used 8,000,000 pounds of flour, 2,400,000 dozen eggs, 5,200,000 pounds of fresh bread, 880,000 pounds of biscuits and crackers, and 197,000 pounds of baking powder.

That the navy has a sweet tooth was demonstrated by the 7,600,000 pounds of sugar used in the 12-month period, together with 30,000 quarts of various extracts, and 90,000 gallons of sirup.

Meat, one of the most important dietary items, is purchased by the ton. Total consumption for the year amounted to 33,800,000 pounds.

Sailors ate 82,000,000 pounds of vegetables during the year, of which 40,000,000 pounds was fresh vegetables and 42,000,000 Irish potatoes. The navy menu included 27,300,000 pounds of fruit, of which 17,000,000 pounds was fresh.

Navy day, which focuses public attention on the U. S. fleet, will see ships' crews at their best—and that includes the kitchen help—one of the most important departments. The army isn't alone in "traveling on its stomach." The navy must be fed—and fed well!

FRONTS NIP LATE CROPS
Farmers and home gardeners have been busy the past few days gathering in late crops of tomatoes, beans, etc., which have been or will be nipped by the heavy frosts.

Dominick Fulginiti, who operates the Gloria Dress factory at Lancaster, employing forty women is charged by Federal authorities with 23 violations of the wage-hour law.
