THE EDITOR'S VOICE

It isn't the man who knows the most, but the man who knows the best, that's wisest.

Today, Thursday, May 30th, is Memorial Day-May it be a memorial occasion to all.

Diesels! Diesels! More Diesels!

Monday evening Boro Council invited Diesel engineers here to suggest practical hook-ups for pumping the boro's water supply, with economy in mind.

After listening thru several hours of explanations and suggestions, Council at least got a good idea of what it is

The majority of the representatives were a unit on the approximate cost of operation, while there was a difference in the cost of installation.

Council and the Boro Engineer will now weigh the evidence and then decide upon its next move.

The Good Old Days

Many who brag on the good old days, the horse and buggy days, forget that a part of the good old horse and buggy days were mud roads, no telephones, few bath tubs, no rural delivery, no parcel post, no radios, no airplanes, people with appendicitis died, there were no automobiles, no picture shows, no one swatted flies, there were no mechanical refrigerators, hospitals were few and far between. When the doctor was wanted some one had to go after him and he had to drive to his case in a horse and buggy.

Some of the advantages of the horse and buggy days which, however, did offset the disadvantages, were cream at 5 cents a pint, 6 loaves of bread for a quarter, the butcher made no charge for liver, shaves were ten cents, there were few traffic accidents, few foreclosures, little unemployment, few bank failures, few operations, no Hitler, no Communists, and no dictators.

Tuberculosis may steal a few months' pay. It may take years of The advice of medical men is:

Don't wait until you feel tired all the time, until you have lost weight, until you have a cough that hangs on and on, or until indigestion bothers you. When you start ailing, tuberculosis may be advancing. You should find out before you get into trouble.

Go to a good doctor while you feel in good health. Get an X-ray of your chest to find out if you have tuberculosis. The X-ray will show it before YOU know it.
