Sanatorium Care Leads to Recovery From Tuberculosis

On the road to health is this young woman who is following approved treatment for the "White Plague." Campaign of tuberculosis associations is directed toward finding disease in early stages.

DON'T NEGLECT FUNDAMENTALS IN YOUR NEW HOME

1 This is a corner of the foundation and footings. Your whole house rests upon it. It can never be replaced.

2 This is the same foundation with timber skeleton now in place. Again here is a part of your home that can never be replaced.

3 Here is a rough window opening from the inside. Notice how the framing members are doubled all around the opening. Dark shaded portions show insulation in place between the studding.

Glitter of Gadgets Often Distracts Builder From Quality Where It's Needed Most

Are you building a house for the first time? Then chances are you are in kind of a daze. There are so many things to decide, so many things to buy, so many more things you want and can't buy because there is just so much money. Now there's nothing less glamorous than the concrete footings and foundation. One doesn't show them off to one's friends, but if you skimp on either, you'll be busy for years to come trying to cover up cracked walls that all your friends will see.

Don't Skimp On Framework
Likewise the timber skeleton or frame of your house is going to be all covered up, but if you skimp on it you'll have sagging floors that squeak at every step.

And how about those great big holes in the wall, the rough window openings. You can buy win-

dows and window frames to fill these holes pretty cheap. And you'll pay for them for years to come in heat lost, drafty floors and wet walls. Or, you can buy carefully designed, precision built and factory fitted windows and window frames complete with weatherstrip that will be a joy and a comfort every year that you live in your house. Yes, and you'll find that the extra cost was money well spent because of heat bills, repair bills and redecorating bills saved.

Can't Replace Windows
Good windows are a permanent part of your walls. They protect your investment in insulation and quality construction. Any home without weathertight windows is only one-half insulated. So when you build, get down to fundamentals. Always remember—you can add the gadgets any time, but you can't replace footings or timbers or windows. They've got to be good right from the start.

Two miles east of Cresson on Route 22 is the only remaining skew arch bridge and the first of its kind in the United States.

PONTIAC BUILDS ANOTHER MILLION CARS!

NO WONDER PONTIAC IS HAVING THE BIGGEST YEAR IN ITS HISTORY!

PONTIAC VOLUME GIVES CAR BUYERS ALL THE BONUS IN CAR VALUES!

 <p>THE FIRST PONTIAC (1936) Base price, \$297. Wheelbase, 110 inches. Horsepower, 36. Weight, 2330 lbs. Price per H. P., \$24.97. Price per lb., 38½ cents.</p>	 <p>THE 1940 PONTIAC Base price, \$753. Wheelbase, 117 inches. Horsepower, 57. Weight, 3155 pounds. Price per H. P., \$9.60. Price per pound, 23 cents.</p>
---	---

PONTIAC is built to order for people who want to make a change from small cars! That's why Pontiac, which passed the 2,000,000-car mark this week, is having the greatest year in its history!

Ask any one of the thousands of small car owners who have changed over to Pontiac this year why he did so and he'll tell you plenty!

\$783 FOR THE SPECIAL SIX BUSINESS COUPE (Other Models Slightly Higher delivered at Pontiac, Michigan. Transportation based on rail rates, state and local taxes (if any) optional equipment and accessories—extra. Prices subject to change without notice. A General Motors Value

He'll say, first, that Pontiac is a big car, with all the advantages only big cars can offer. Big-car size—a big-car ride—big-car luxury and performance. But most important of all, he'll say that Pontiac, in spite of its extra size and value, is just as easy to buy and just as economical to operate as his former small car.

Come in today and let us prove to you that, if you can afford to own and operate any new car, you can afford a Pontiac.
