

Beauty Reaches All-Time High in New '41 Chevrolet

Completely new styling joins with numerous mechanical improvements to make the new 1941 Chevrolet, now on display at all dealers, a worthy successor to the cars which have earned first place in public favor year after year. The greater size and roominess of the new models, as well as their sleek new beauty, are apparent in the Special De Luxe Sport Sedan, shown above. At (2) is shown the spacious interior of the same model's rear compartment, and at (3) is its front compartment, showing two-spoke steering wheel with horn-blowing ring, new sliding-type sun visors, and smartly re-styled dash.

Raising of Chinchillas Not Hard, Says Expert

William Burns made \$6,400 in one day recently when four chinchillas were born on his half-acre farm in suburban Brighton, near Rochester, N. Y. Those mites of fur, so small one nestles comfortably in the palm of the hand, are once for all the most valuable animal known to touch, can be made up into splendid coats—at about \$50,000 a coat.

They are so scarce that he gets \$3,200 a pair for them from other breeders. Despite their high cost, the chinchillas are comparatively easy to raise, according to Burns, who says he has the only farm of its sort in New York state.

It costs only about \$2 a year to feed chinchillas, but they must have a special diet. This includes yeast, wheat, oat middlings, soy bean meal, yellow corn meal, dehydrated alfalfa, mineralized salt and bone meal. The mother is also fed green, leafy food and orange juice a few weeks prior to whelping.

Burns is a pioneer in the American-bred chinchilla industry. In 1932 the late M. F. Chapman succeeded, after considerable trouble, in bringing 11 live chinchillas to the United States from high in the Andes mountains.

Burns bought the first pair sold by Chapman in 1925. Now he has 45, has sold many pairs and has realized an income enabling him to retire from his job as a factory machine operator and give his full time to chinchilla breeding.

FARM TOPICS

DEPLETED SOILS NEED NITROGEN

Agricultural Colleges Will Help Farmers Test Soil.

By PROF. GEORGE D. SCARSETH (Soil Chemist, Purdue University Agricultural Experiment Station.)

Although there are about 75,000,000 pounds of nitrogen in the air above every acre of land, this plant food is as useless to most growing crops, in its gaseous form, as seawater is to a thirsty man. Just as salty sea-water must be distilled to obtain suitable drinking water, so atmospheric nitrogen must be combined with oxygen, carbon and hydrogen before it is of any value to growing crops.

The first fixed nitrogen was probably made by lightning flashes long before life appeared on the earth. Eventually single-celled green plants, bacteria, slime moulds and higher plant life became more highly developed until some became host plants for nitrogen-fixing bacteria.

Man would not need to become concerned about the possible lack of fixed nitrogen in the soil if he were able to move continually to newly cleared woodlands every time the fertility of the soil became depleted. Such a procedure was followed in the early days of this country but it is no longer possible.

Although the natural nitrogen supply of our soils was once regarded as inexhaustible, a century of civilization has sharply reduced this precious resource and farmers have to face the problem of supplying crops with plenty of available nitrogen. Fortunately the solution of this problem is relatively simple.

Either more nitrogen-fixing plants must be grown and returned to the soil, or nitrogen-carrying fertilizers must be used. About the best procedure to follow in determining whether nitrogen will be needed is to consider the past performance of the field in question. If the soil is dark in color or black, has received a liberal application of manure or plowed legume, or is an old sod, it is likely that nitrogen will not be a limiting factor in the crop growth.

Bindweed Control In a study of root development of bindweed by the government it was discovered that this plant tends to exhaust its roots rather than to replenish them during the first few days of leaf growth, and that there is a definite advantage in waiting until the new shoots are four or five inches tall before destroying them.

Pulleys Need Calcium When pullets lay a large number of soft and thin-shelled eggs, the trouble may be caused by insufficient consumption of shell-making material or calcium, say poultry specialists of the Pennsylvania State College. The material must be placed in a well lighted section of the house where it will be easily accessible to the fowls.

Farm Notes For dairy farmers, two of the best practices for fall are the application of lime and of superphosphate. In recent years, the cash income received by growers of oats in the United States has been less than half as large as it was in the years just before the World war.

From 6,000,000 to 8,000,000 gallons of darker grades of maple sirup are used each year for flavoring pipe, cigarette, and chewing tobacco. In 1939, United States farm land planted to soil-depleting crops was about 23,000,000 acres less than the average for the preceding 10 years.

Mount Joy and Landisville Bank Statements

Table with columns for ASSETS and LIABILITIES for Mount Joy Bank. Includes items like Loans and Discounts, U.S. Government obligations, Demand deposits, etc.

Table with columns for ASSETS and LIABILITIES for Landisville Bank. Includes items like Loans and Discounts, U.S. Government obligations, Demand deposits, etc.

Boro Council

(From Page 1) a willingness to pay all costs of the section of the annex in excess of \$10,000.

To Extend Concord St. The deed for the opening of the extension of Concord street, a width of 40 feet and from Detwiler Ave. to the alley, a distance of 170 feet, was received and passed first reading.

Passage Way Closed J. B. Keller & Bro. asked Council to close the passage way across their property from Manheim street south to the Ice plant their request was complied with.

Burgess' Report Wm. E. Hendrix reported collection to the amount of \$11.50 for December.

The Diesel Balbs Mr. Keller, chairman of the Water Committee reported the Diesel engine at the Water Works wouldn't start and they discovered a dead battery. He suggested operating the engine about five hours every fourth day during the winter months, which would keep battery charged.

Chief Zerphey's Report The annual report of Chief Elmer Zerphey was as follows: Arrests—Carrying concealed deadly weapon 1, Burglary 1 (Juvenile), Forgery 1, Larceny 3, Larceny

for at installation. Mr. Loraw recommended as a precautionary measure, that no one be permitted to enter the pumping station unless by permission of Burgess Hendrix or Mr. Keller, chairman of the Water committee. Carried.

Will Dig a Sink Mr. Myers of the Special committee, inquired what disposition should be made of the water from the septic tank to be installed at the annex. He was instructed to have a well driller dig a sewer.

Fire Plugs Tested Supervisor Smetzer reported having tested all fire plugs thruout the boro.

Water Pumped Pumping Engineer Shatz reported having pumped 336,000 gallons in eight hours by Diesel engine and 5,397,000 in 515 hours by water power.

Board of Health Secretary C. H. Dillinger reported six cases of chicken-pox, two nuisances corrected, sixteen eating and drinking places inspected and sixty-five health certificates issued.

Longenecker's Complaint Mr. John Longenecker, thru Councilman Myers, complained about the refuse such as paper, tin cans, etc. deposited in the rear of Lincoln bowling alleys. Complaint ignored.

Elected An Assistant Mr. William Bisan was elected assistant secretary of Boro Council at a salary of \$10 per month.

\$100 Per Year Upon motion our Burgess will receive a salary of \$100 per year in the future, payable each December. According to a State Law, Burgess may be paid \$100 for each 1,000 population up to 5,000. This is the first salary ever to be paid a Burgess in Mount Joy.

To Hold Turkey Supper Upon the suggestion of Councilman Loraw, Council, its officials and employees will give a turkey supper within the next week or ten days.

Are Being "Hocked" Burgess Hendrix stated that the County Welfare Board called his attention to the fact that our local board is being "hocked" or imposed upon by some of the recipients. Upon investigation he found the complaints correct and ordered the discontinuance of coal to several undeserving families. He cited one case where a man is being paid almost \$80 monthly by the State relief board and at the same time receiving coal from the boro. Other cases will be investigated.

The Zoning Ordinance The Zoning ordinance empowers

3 (Juveniles), Serious Charge 2 Larceny of an Auto 1, Non-Support 3, Court Order 1, Failing to appear for hearing 1, Disorderly conduct 8 Drunk and disorderly conduct 12.

Prosecutions—Operating motor vehicle while intoxicated 3, Failing to stop at the scene of an accident 1, Speed law violations 14, Reckless driving 9, Improper passing 17 Stop sign violations 11, Failing to yield the right of way 4, No inspection 7, No operators license 1, Improper turn 1, Parking violations 18 Overloaded trucks 8 (in cooperation with the Motor Police).

Treasurer H. N. Nissley reported these balances: Boro, \$11,095.01; water, \$297.64; interest, old bonds \$64.00; new bonds, \$800.00.

Will Collect Taxes The Solicitor inquired what he shall do relative to the tax liens filed against the late Dr. Ziegler in the East end of town and the lot corner of West Donegan Street and Comfort Alley. Council will instruct him to proceed with the execution and collect same.

Longenecker's Complaint Mr. John Longenecker, thru Councilman Myers, complained about the refuse such as paper, tin cans, etc. deposited in the rear of Lincoln bowling alleys. Complaint ignored.

Elected An Assistant Mr. William Bisan was elected assistant secretary of Boro Council at a salary of \$10 per month.
