day period.

Gray Summit, Missouri.

ager of the Turkey Department, the

turkey breeder flock at the Purina

Experimental Farm produces around 60 eggs per hen during the months

of March, April, and May, whereas

according to available data, the

country's average for these same

three months, which are the princi-

pal months when the average turkeys

"The significance of these comparative figures is revealed when one

considers that last year approxi-

mately more than 32,000,000 turkeys

were marketed from about 40,000,-

000 hatched", Plaisance says. On

the basis of the average turkey hen

producing 40 to 45 eggs per year

during the laying season instead of

60 eggs, it would require approxi-

mately 400,000 more hens. In terms

of feed this would mean that it

would require at least 20,000 more

tons of feed-approximately 1000

Feeding, management, sanitation

and breeding are responsible for the

increased egg production attained at

the Purina Experimental Farm from

asserts. "Our original breeding flock

was selected some years ago from a flock of poults hatched from eggs

purchased at random the previous

spring. We had no advance infor-
