TIRE COMPANY'S LOCAL CAMPAIGN IS SPRING OPENER

"Every Spring we look forward to the opportunity afforded by the April tire sales feature which Goodyear organizes to stimulate business, for us which is also as well a contribution toward safer driving," said C. F. Grissinger, local, Goodyear dealer who told The Bulletin that his company had just placed season-opener, campaign to extend from April 16 to 26.

Featuring the lines of the brand new G-3 All-Weather, Marathon in standard and reversible sidewall types, and the All American, successfully introduced last year in five sizes, the 10-day campaign marks the first big tire selling promotion of the company this year. Mr. C. F. Grissinger declared.

Fact that there will continue to be considerable bad driving weather yet this Spring, with heavy rains creating slippery pavements.

the matter of buying new traction, is, in the opinion of Mr. C. F. Grissinger, a most important factor, coupled with the point that as soon as highways get hot the traffic will be heavier and then if there are tire failures on crowded roads the resulting potential is likely to be much greater, in toll of injury and property damage.

Because the Goodyear tire line has been improved and since there is the opportunity to trade in old tires on new, there are few car owners who, needing good rubber will want to pass up the sale opportunity to equip their cars for Summer driving. Tires sold now are protected by lifetime guarantee and while prices are still stable and ample supply of rubber maintains to keep them thus, now is still the best time to get properly equipped for Summer.

Hints to Gardeners

Sweet Peas Return

THERE is encouraging news for home gardeners who have missed the delicacy and fragrance of sweet peas in recent years because of the difficulty of growing them satisfactorily.

A new, more vigorous, longer-blooming, heat-resistant sweet pea family has been introduced to the gardening world. It is the Spring Flowering Sweet Pea, developed by Frank Cuthbertson, one of the world's leading sweet pea authorities.

Because of their newness, Spring Flowering Sweet Peas are as yet available in only seven colors. Three All-America prize-winners were introduced last year: Rose Pink, Blue, and Lavender. The new ones this year are White, Clear Pink, Light Lavender and Mauve.

These new sweet peas are grown just like other types now in general use. They may be planted outdoors just as soon as the soil can be worked. For superior results the soil should be spaded to a depth of 18 inches and the lower 12 inches mixed with fertilizer, preferably well-rotted manure. The trench should then be filled with the soil-fertilizer mixture to within six inches of the top, and the seed planted in this shallow trench.

After the seedlings spring up, the balance of the soil may be banked around the stalks of the growing vines every week or so.

After vines are well established they should be watered thoroughly once every five to seven days. Sweet pea vines should not be grown along the south side of a building, where heat is greatest. A location along a fence is good. If they are planted in the open, supporting structure should be strung with string or rope rather than wire. Sweet peas should be kept picked to induce greater productivity.
