

Automobile Club Requests Motorists To Reduce Speed

The Lancaster Automobile Club urges all motorists to voluntarily pledge themselves to substantially reduce their normal peace-time driving speeds in order to conserve motorized resources vital to the war effort. A resolution calling for St., Mount Joy. co-operation of Lancaster County motorists in this was adopted at the recent annual meeting of the Club in Lancaster. It follows:- heim St., Mount Joy.

Excessive speed causes a tremendous wastage of rubber and gasoline and shortens car life. Today, when tires and cars are being rationed and when maintenance of an efficient transportation system is to a very large degree dependant upon continued operation of the nation's great fleet of motor ve- lumbia hicles, construction of present equipment, including rubber, gasoline and the automobile itself has Market St., El zabethtown. become vitally important not only to motorists themselves, but also to the over-all war effort.

"Therefore the Lancaster Automobile Club, representing membership of nearly 15,000 motorists, herewith declare that excessive ington St., Elizabethtown. speed at the present time is prejudicial to the national interest in that it wastes materials vitally needed for the war effort and tends to shorten the life of America's mo- heim. torized resources.

"Accordingly, we urge all mot- lotte St., Manheim." addition to adopting all other Eainbridge. sound measures of car care, they will substantially reduce their normal driving speeds.

"We urge all groups and organi- heim. zation in the automotive field to cooperate in this effort to slow down street and highway speeds, and we recommend that all operators of Mount Joy St., Mount Joy. fleets of motor vehicles require slo- / Clair Amway, 166 West Market wer speeds on the part of their dri- St., Marietta. vers."

"We also urge all public officials by example and precept, to impress upon the public the need for conservation, including rubber, gasoline and the automobile itself, as a means of aiding the war effort."

GROW MORE SOY BEANS

Pennsylvania farmers are being asked to double their production of soybeans for this year. Where land and equipment are available, this to the farm program.
