New Towns Rise In Rural Britain

Model Centers Will House Hundreds of Thousands of War Workers.

LONDON.—Details of the steps taken in Great Britain to meet the housing emergency brought about by Nazi air raids and nation-wide armament production show that the construction is on a vast scale.

House 100 Workers.

Each town has blocks of homes built to house 100 workers. The blocks are laid out in one-storied U formation around a central green, where communal buildings stand as the center of social life.

To make home life easier, the towns are being run on hostel lines. This is purely a war-time measure, and when peace comes and workers settle down to normal ways of life the hostel arrangements may be ended if the workers wish.

Each block has six bathrooms—the baths are shining pale green porcelain. There is a laundry with fitted sinks, ironing boards and electric irons. Drying rooms for airing clothes and a special room for drying wet clothes are included.

Two large dining rooms seating 500 at a time serve three meals a day.

Has Social Center. In the big social center around which the houses are built are the rest rooms, reading and writing room, and the theater and dance hall. There are dances twice a week and a dramatic performance once a week.

The center has a shop, postoffice and telephones, and soon there will be a cafe open all day. Central heating pipes running through all the buildings keep the homes at an even, warm temperature in winter.

Today the inhabitants of the new townships pay an all-in rate for living there. Girl workers pay 25s a week for full board and lodgings. Furniture and all equipment are supplied. Men pay 20s a week. A special rate is being worked out for married couples.

There are no chimneys, no ash cans, rubbish being burned in incinerators.

Aside from these rural model towns, one-story flat-roof homes that after the war can be built up to regular size houses of two floors or more are being erected in bombed sections of cities.

Identity of Cat Poser For Judge to Figure Out SAN FRANCISCO.—Justice of the Peace Herbert D. Wise may have to oudo Solomon when he establishes the identity of a baby with a sword.

Mrs. J. D. Newton has asked \$50 damages from her neighbor, Bert Fletcher, who she alleges is the owner of a black tunneling cat that tunneled out a miniature subway system underneath her front lawn. Fletcher charges there are five black cats in the neighborhood and that it is a case of mistaken identity.

Band Gadget Invented To Snuff Out Cigarettes CLEVELAND. Anthony J. Millett, 21-year-old inventor, has devised a gadget he believes will prove a boon to absent-minded smokers—a cigarette "snuffer-outer."

The invention consists of a narrow band of fire-resistant material around the paper of the cigarette. The band is movable. Millett said that with every cigarette equipped with a snuffer, there would be no reason to toss a lighted one out a car window.

Greeks Starving Under German Control of Food ATHENS.—Greeks in the streets from hunger and their suffering is being shared by numbers of British and Australian soldiers who are hiding in small towns and mountain villages.

The situation of allied soldiers left behind in the withdrawal from Greece was said to be especially difficult because they are without credentials for obtaining food.
