The subscription lists of three other newspapers, the Mount Joy Star and News, the Landisville Vigil and the Florin News were merged with the Bulletin, which makes this paper's circulation practically double that of the average weekly.

Entered at the Postoffice at Mount Joy, Pa., as second-class mail matter under the Act of March 3, 1879.

## THE EDITOR'S VOICE

The desert of Africa covers as much territory as all 48 states of the United States, and for 25,000 miles it is not traversed by a single river.

Her lies are catching up with Hitler's case is but further proof that nothing built on lies and deceit can stand long. It may prosper for a time but it will eventually kill itself.

### GIRL SCOUTS

Last Friday, March 12th was the birthday of the Girl Scouts of America and to them we offer congratulations. As our Boy Scouts, the girls have been outstanding in their services in salvage drives, defense projects and other moves centering in towns like Mount Joy all over the land. The camp plans of the Girl Scout movement have been most beneficial in training the mind and developing the body. The Girl Scouts spend effort to build character, teach ideals of community and government, to bring girls into women with a deep awareness of their responsibility to serve and respect traditions. Girl Scouts into women grow with a greater capacity for self-reliance. Our best wishes, Girl Scouts!

### TOLLING HANDS

"Humble hands win wars, while only heroes are praised," said a famous educator recently. The country is thrilled by the grand young men who attack the fortifications of a cruel enemy. We admire them without limit. While the storm of bullets and shells sings its sinister song of death around them, they ride high and confident on the wings of the wind.

Let us not forget millions of toilers who produce planes and ships and guns and food that make these exploits possible. The man with the lathe or hoe is often weary. His tired body may ache as he plods home to rest and sleep. But his fidelity has created the precision instrument by which the fiercer hits the foe. His hills of corn feed the sailor who rides through a submarine infested sea.

Let us honor every faithful worker on the war program, and hand some bouquets to all tired hands and feet and weary bodies, and eyes and heads aching over desk work and war problems. All are pulling the load up the glorious hill of victory.

Some more bad news was reported this week. The story that Hitler has hung himself is not true.

### FREEDOM FROM FEAR

There are a few biblical words from David which came as a source of help to those who need solace. "I will fear no evil" is a strong statement and needs clinging to with determination when the daily going is rugged. Worry is one of our worst headaches today and surely today there is much we might worry about. One can't get away from shadows of planes and ships, troops, death and privation. People have worried before us, generations ago they feared evil, needed reassuring that darkness would pass and that with courage and confidence they would come through to light and goodness. There is no talk that society will never regain its stand in education, science, industry and so on, as before the war. Most citizens have faith that we will move on and come out better for the burning lessons. We need to practice less of worry and concentrate more on courage.

### THEY ARE CALLING

The WAACS, WAVES, SPARS and MARINES are busily enlisting women and girls in their service and throughout the nation the feminine word is "go." These women in service carry their natty uniforms well and are justly proud of their appearance. Their training in various branches to make eligible for defense plans of the government gives them added reason for pride. Through them men are released for active duty which means that these feminine forces play a major role in providing the country with fighting men. In many of the branches of labor studied and performed women are proving more skillful and dex-

terous than men formerly used here. These recruits are having an opportunity to study in fields never opened to women before. Just ask them how they like it! More power to every one of them and our blessings.

## Trains that get the "breaks"

**Troop Trains.** Because a million troops a month must be moved—and, in addition, the arms and ammunition they need.

**Food Trains.** Because food for our fighting men—for our allies—and for our "home front" is vital to victory.

**Coal Trains.** Because coal is the nation's greatest single source of heat, light, power—we can't win the war without it.

**Oil Trains.** Because they must replace tankers, to serve homes, cars, factories—and to quicken overseas oil shipments.

Once great passenger trains had the right-of-way.

And they will again!

But right now there is a war to be won. So trains vital to the war effort get priority.

And we don't think there is a single American who would have it otherwise.

In fact, evidence of that grows daily. If their train is late, business men take it as something that can't be helped. They know why.

And so with any travel inconvenience that may be encountered. Demand for equipment is now so great that on arriving at terminals cars must be put right back into service, so you may find them not quite so spic and span as we would like. Housekeeping facilities are adequate but there's not always time.

But Americans are taking all this like good soldiers. For they know this is a war of movement, and that movement begins right here—in America.
