THE EDITOR'S VOICE

Even though a steak may be well done, it is rare nowadays.

Who in this world ever expected to live to see the time when a ceiling would be put on flooring?

The fact that the Germans have found a way of converting wood into food is absolutely nothing new in the way of facts to termites over here.

CHANCE FOR LABOR STATESMANSHIP

If the people suffer a coal shortage this winter, the blame will have to be laid squarely in the lap of government and labor, because the wage, labor, hour and price question is wholly in their hands.

PASTE THIS IN YOUR HAT

What is the matter with our so-called business and political leaders who chant: "Capitalism has one more chance," or, "Private enterprise has one more chance after the war," or we will have a totalitarian government? Do they really believe what they say? If so, they better not advertise their panic.

DESERTERS, WHAT ELSE?

The head of the American Legion, in addressing labor leaders, said that a man who lays down his tools on a war job to strike is just as guilty of an act of treason as a soldier who deserts his post of duty.

AN INVASION

Up in Maine several bears have invaded a village and done damage to the poultry, sheep and pigs of the community. The residents have had to establish a night watch and still the bears are getting livestock.

Deeds Recorded

Enlisting Idle Acres For Food Production

New Goals Demand Full Use of Available Land

Getting idle acres back on the job is high on the list of "must" activities for the farmer-committeemen of the Agricultural Adjustment agency during '43.

With production goals adding up to a tremendous total in food and fiber, maximum use of all agricultural resources will have to be employed to meet minimum demands for farm products, Secretary of Agriculture Claude R. Wickard has announced.

Land as well as machinery, labor and other tools of production is included in the department of agriculture's program.

As with other aspects of the Triple-A farm plan, each community will do the job of enlisting its own idle acres and idle farms for duty on the food front.

Secretary Wickard has requested that Triple-A committeemen, both county and community, locate available tracts of land in their districts which are not now producing, and take whatever steps are feasible to put them into useful activity.

Assistance will be given by the county USDA war boards where cases cannot be taken care of locally, and these boards have also been instructed to be prepared to help wherever possible in locating operators, in financing operations if

required through available loan programs, or in helping the operator obtain labor or machinery should these items stand in the way of any land use.

Farmers have also been urged through Triple-A to rent to other operators acreage they themselves cannot put to work. Persons capable of managing a small farm, or of taking on additional cropland, will in turn be able to rent acreage from operators who already have under cultivation all they can possibly handle but who wish to see every square yard of their land in production.

This suggestion is made by C. S. Garrison, assistant extension agronomist at Rutgers university, in pointing out that the department of agriculture has developed a price support program on 20 kinds of hay and pasture seeds as an incentive to production.

The list includes seeds of crops such as alfalfa, timothy, orchard grass, meadow fescue and red, sweet and alsike clover," Garrison says. "Anywhere a farmer has a field which could be harvested for seed, this program will guarantee him a minimum price, as well as the satisfaction of helping to insure adequate supplies for 1944.

"It is important to maintain the supply of good seed of the legumes and grasses since they are playing a large part in the war production program," Garrison reminds farmers. "Legumes and grasses used in crop rotation have shown themselves to be effective in maintaining crop yields.

When planting potatoes this should be remembered. Blocky seed pieces with one good eye should be used, for they dry out less readily and may be handled more easily than long pieces.
