By MERT EMMERT. WEAF FARM PROGRAM DIRECTOR. Broadcasts Monday thru Saturday 6:30-7:00 A.M., 660 on the dial.

WE don't believe in "preaching at" people on our program—but we do like to pass along usable farming, gardening and household tips each day, for what they're worth.

That's exactly the purpose of our daily "180 Special," which we describe as "180 seconds (or 3 minutes) of streamlined stuff we thought you might like to know about."

It's made up of timely, practical information from the various state agricultural colleges, and U. S. Department of Agriculture. We boil it down to pure meat. That's why we can give you 5 or 6 items each morning in this 3-minute feature.

For example, here's what the 180 Special contained recently: 1. How to feed and manage a cow before she freshens.

2. Should I add nitrogen to my garden compost pile? 3. How to feed newly-housed pullets for the most eggs.

4. Why rough plowing is best in the fall. 5. Substitutes for straw in mulching strawberries.

6. New ways to fix potatoes for the family. A number of folks have been nice enough to drop us a postcard from time to time, saying that they get plenty of usable pointers from the 180 Special each day.

Since we're pretty normal and ordinary human beings around here, those comments make us feel real good!
