

AN EDITORIAL

After many requests for suggestions on a suitable and appropriate memorial for veterans of World War II, the consensus of opinions centered on improvement of our Boro Park.

Since all of the above, several news items which appeared in last week's Bulletin, may, to some extent put a different aspect on the Park proposition.

A SUGGESTION

It is the writer's privilege to broadcast several suggestions for thought to Boro Council, our Town Planning and Zoning commission, all our citizens and particularly the Memorial committee.

By a new realty and development company putting in an appearance here, acquiring a 77-acre plot of ground nearly all of which is within the boro limits, and all of which is adjacent to the Little Chickies creek on the West, offers an opportunity to really do things in a "big way" if our citizens see fit.

The Water Right

The Joy Company, when it purchased the Snyder farm acquired a water right thru the old mill there, which extends from the State Highway North approximately several miles (following the creek) to the Boro Water Works.

Boro Council or the Remembrance committee, purchased same, how's this as a suggestion:

First: Rebuild the dam near the Mill, making it high enough to give the citizens many bathing advantages (such as we enjoyed for many years until the dam washed out) thereby taking the place of the execution and maintenance of an expensive pool.

Second: This would give us ample water for motor and sail boating, most excellent canoeing along with skating and ice hockey in winter.

Third: There are sturdy oak, elm, buttonwood and willow trees along said stream, some of the oldest and largest in this section. We refer to Snyder's Woods.

Fourth: The open field or peninsula in Snyder's woods could be converted into one of the best athletic fields in the State.

Fifth: With improvements to the creek as above mentioned, it could be stocked and would afford men, women and children excellent fishing.

Sixth: There are several good springs along this stream which could be "dolled up" and which would refresh the thousands who would go there annually for their favorite recreation.

Seventh: The stone dwelling adjacent to the dam breast could very easily be converted into a recreation center, bath house, etc.

Nearly all of these advantages are lacking in our present park and it may be good business to convert our park into building lots, which would be a decided financial gain to Boro Council and purchase Snyder's Woods and its water right for a boro park.

There isn't a boro in this section of the state has a possibility staring it in the face as is Mount Joy Boro RIGHT NOW.

Now folks here's the suggestion—you can either take it or leave it.

APPROVE PAYMENTS TO FIVE SCHOOL DISTRICTS
