> Proper Kraut Storage There are two methods for storing kraut. First you can pack it in glass jars or tin cans and process it in a water bath. Or, second, you can store it in the container in which it was made by sealing over the surface with hot paraffin. Recent research, not yet completed, now seems to indicate that the second method will mean the kraut retains more vitamin C than if it is processed. That's providing the seal in the crock or jar isn't broken, of course. In any event, food preserva-

Popular Juice Most widely popular of homemade juices is that from tomatoes. It is easy to can by processing the jars of hot juice in a boiling water Home-canned tomato juice sometimes separates because the pulp is heavier than the light-colored juice so settles below it in the jar. The finer the sieve used for straining the juice, the less the pulp will settle. If tomato juice is packed hot the chances of keeping are much better. The vitamin C in juice and canned whole tomatoes is approximately the same. Some vitamin A and other nutrients may be lost when seeds and pulp are discarded. Tests have shown that the easiest way of preparing the juice is the most saving of vitamin C. This is to simmer the tomatoes until the

Farmers Treferred PART OR FULL TIME juice begins to flow. Sieve while 65c per hour time & half time the tomatoes are hot. Reheat just to boiling. Then add a teaspoon Apply of salt per quart of juice, if desired Pour into hot tars at once and p
