

# The Mount Joy Bulletin

ESTABLISHED JUNE 1901

Published Every Thursday at Mount Joy, Pa.

Jno. E. Schroll, Editor and Publisher

Subscription Price \$1.50 Per Annum

Six Months..... 75 Cents Single Copies..... 3 Cents  
Three Months..... 40 Cents Sample Copies..... FREE

The subscription lists of three other newspapers, the Mount Joy Star and News, the Landisville Vigil and the Florin News were merged with the Bulletin, which makes this paper's circulation practically double that of the average weekly.

Entered at the Postoffice at Mount Joy, Pa., as second-class mail matter under the Act of March 3, 1879.

## THE EDITOR'S VOICE

If your roof didn't leak, sewer back up or there was no water in your cellar, you weren't in style around here over the weekend.

One thing is certain among hoarders—they can't stack up bread even though they'd like to. We are facing a scarcity but there's nothing to be done about it as far as keeping a big supply on hand.

The State Highway Department seemingly knows our local conditions thru surveys, traffic census, etc. We have one of the most traveled highways thru our borough to be found anywhere in eastern Pa. and it certainly needs prompt attention with this daily increase of passenger and freight traffic.

Alvanley Johnston, head of the Brotherhood of Locomotive Engineers, joined the president of the Trainmen's Brotherhood in charging President Truman with "double crossing" the railroad workers during the recent rail strike.

The president was trying to pour tea into two cups at the same time. He got his promises and his politics mixed.

### TIME FOR A HALF

Eugene Williams, top Philadelphia official of the National Maritime Union (C.I.O.) has warned that enlisted men in the navy, who are union members, would be urged to defy orders if they are asked to operate ships during the threatened maritime strike. Sounds like John Lewis No. 2.

It's about time that some one in authority takes guys like that by the neck and makes them say "uncle."

### THIS ONE NECESSARY

The following editorial appeared in last Wednesday's Lancaster New Era.

"Assurance by the State Department of Highways that Route 222 from Akron into Lancaster will be 'programmed for engineering, bidding and construction for the 1946-47 period,' is that much progress.

Left to Lancastrians, the road would be first on the list of major highway building in this country. But the State Highway Department believes the Harrisburg pike from Mt. Joy east commands that spot."

### LIGHTS ARE "OUT"

In response to numerous requests from local officials and a representative of our Chamber of Commerce contacting State Highway Department engineers, we were given to distinctly understand that there are no traffic lights of any kind available or may be placed at any of our street intersections in our borough. Reason unnecessary.

This is in line with exactly what we predicted in the Bulletin: If motorists heed all present signs, accidents are next to impossible. As is, only the violators will be convinced.

### WHAT MIGHT BE

A union organized of public workers may benefit the members but it pronounces a menace to personal welfare in case the usual situation of strikes, result. Municipally owned and operated transportation systems, utilities furnishing power and light, public schools, would be some of those interested. Such strikes would bring more disaster and physical suffering than any of the thousands of different strikes already imposed upon the people. Congress might do something in a legal way, ahead of time, to protect us against such an emergency.

### NO REPORT CARDS

Prepared for changes in our educational system, progressive minds intend to bring classrooms up to date in studies and conduct. When the National Education Assn. proposes to do away with the old standard report card, we are surprised. Young folks around here will probably be over-joyed. The grading of advancement and intelligence with the alphabet is not a strict measurement and so stands

for alteration. Born 40 years too late, again?

But the catch comes in having individual attention paid to the child with parents and teachers discussing personal problems of class conduct, initiative, intelligence, by direct conversation. Perhaps the direct children won't be greatly in favor of this.

### GETTING BEYOND CONTROL

Money is dynamic when uncontrolled. Spending wildly, the result is a runaway inflation that effects all and hardest on the man who didn't have much at the beginning of inflation. School children learn in classrooms that inflation is caused principally by a decided increase in the amount of money to buy goods without the same increase in the amount of goods one can buy. The result is that man competes man by offering more money to obtain the goods he wants to purchase and so the price of the material is upped. This was what caused the need of price ceilings and of rationing those supplies that were scarce. It was an attempt to keep down inflation. How successful it has been depends upon how much each of us are realizing for our money's worth. The most unsatisfactory result has been in the widely spread black market.

One statistic to remember is that there are over \$5 in circulation today for each \$1 in circulation at the outbreak of this last war: Deposits have doubled, war bonds burn the pockets, purchasing powder encourages spending.

Feeling they must buy before the price ceiling is lifted, on goods which they believe will be higher later on, with businessmen withholding goods from the market in anticipation of getting that higher price. This is a clear picture of inflation.

Generally, people are for the removing of price controls when the supply approximately catches up with the demand, but not removing before. The war brought forth sulfa drugs and penicillin to combat disease, but no war has yet successfully produced a cure for inflation.

## Lt. Com. Joe Crasley

(From page 1)

Tuesday evening at 7:30 in the Richland Club rooms.

President Shoop also asked for a nomination for an assistant secretary to serve for the coming year, and to have him made a director. Art Mayer made the motion and Simon Fickinger seconded, but Clyde Gerberich Sr. stated that he did not think that another member could be added to the Board of Directors, without first making an amendment to the constitution. Due to the fact that no one present could state if this were correct or not, it was decided to hold up the nomination for another week, and in the meantime find out what the constitution says, concerning the number of directors that the club may have.

The meeting was then turned over to Chairman Paul Stehman who introduced Joe Crasley as the speaker. Mr. Crasley spent over four years in the Navy and upon discharge, held the rank of Lt. Commander, traveled thousands of miles and visited practically every civilized country.

Mr. Crasley spoke about Bermuda, Havana, and South America comparing these different countries as to life, beauty and architecture. He also dwelt briefly on England which he visited, and Pompeii. In describing the different places and telling about their scenery and so on, Mr. Crasley said that people in Lancaster County, have everything anyone can ask for, when it comes to beautiful scenery. There is no place like it.

This was an interesting talk and was enjoyed by all those present.
