

DUFF INSPECTS NEW HISTORIC MARKERS

Attorney General Jam. S. H. Duff, chairman of the Pennsylvania Historical and Museum Commission, approved the first of the new historic markers which are to be erected by the commission along the main highways of the State. With the Attorney General are Charles G. Webb, Wellsboro, on the left, and Thomas Murphy, Scranton, on the extreme right, both members of the Commission.

The Commission expects to place markers in every section of the State during the next few months. The initial order is for 500 markers. Shipments are being received weekly. The markers are to be installed by the maintenance forces of the Department of Highways.

Funds for the markers were appropriated by the 1945 General Assembly and approved by Governor Edward Martin.

The Affairs At Florin For Past Week

(From Page 1)

A meeting of the Good Cheer Class was held on Tuesday evening at the home of Mrs. Irvin Bishop. During the business meeting the election of officers were: Mrs. Irvin Bishop, president; Mrs. James Hockenberry, secretary; Malinda Myers, treasurer; pianist, Mrs. Harry T. Herr.

The October meeting of the class

will be held at the home of Mrs. James Hockenberry and a sauer kraut supper will be served.

Members present other than the officers were: Mr. Arthur Braun, teacher of the class, and wife, Miss Miriam Guhl and Mary Bates.

Everybody in this locality reads The Bulletin—that's why its advertisers get such excellent results.

We Want News!

This is vacation time! When you go places for a day, the weekend or longer, or if you have company, drop us a card or call 41J and tell us about it. — That's news!

There are many different kinds of milking BUT... ONLY THE DE LAVAL MAGNETIC SPEEDWAY IS ALWAYS UNIFORM FAST AND GENTLE

THERE are many kinds of milking—hand and machine... but there is only one "magnetic" milker—the De Laval Magnetic Speedway... that assures uniform, fast and gentle milking at all times. It is a wonderful feeling to know that your cows are being milked in the same uniform, correct way day after day. And the results of De Laval fast, uniform milking are wonderful, too. Why not talk it over with us today?

DE LAVAL—MILKER OF CHAMPIONS

Another De Laval Milked Champion—Douglasston Royal's Pride, Woodacres Guernsey, Princeton, N. J. Her record: 17,816.5 lbs. milk, 997.8 lbs. fat, establishing her as Class Leader in A.A.

De Laval Separators

If you want cleanest skimming, highest quality cream production, longest service and an easy-to-wash separator—all at lowest cost per year of use—De Laval Separator is your answer. And there is a size and style just right for you. Hand or motor drive.

De Laval Sterling Milker

If you are looking for De Laval quality milking at somewhat lower first cost, get the facts on the De Laval Sterling Milker. Pulsator has only two moving parts—provides precise milking action.

Mortuary Record In This Section

(From page 1)

Mrs. Ella S. Miller, sixty-three, widow of Rev. Martin R. Miller, of near Landisville, died at 3 a. m. on Sunday at the Lancaster General Hospital, after an illness of one day. She was a member of the Landisville Mennonite Church, and a daughter of the late Abram and Susan Scitz Herr. She is survived by the following children: Esther, wife of Clarence H. Harnish, Lancaster R4, David H., Lancaster R1, Anna H., at home; Martha, wife of Amos G. Ranck, Strasburg R1; Arthur H., Landisville; Frances H., wife of John N. Hertzler, Elizabethtown R2; and twenty-two grand-children.

The funeral was held in the Landisville Mennonite church yesterday afternoon with interment in the adjoining cemetery.

Harry W. Gutshall

Funeral services for Harry W. Gutshall, a farmer, who died Thursday at his home in Blain, were held Sunday afternoon at Blain Lutheran Church. Burial was in the Blain Cemetery.

Mr. Gutshall, who was 66 years old, was the son of the late George and Celestia Bennett Gutshall. He was a member of Blain Lutheran Church and Sunday School. He is survived by his widow, Mrs. Grace Dromgold Gutshall; three daughters Mrs. Lester Hench, Loysville; Mrs. Harry Bishop, Camp Hill, and Mrs. Richard Heisey, New Cumberland; four sons, Harry B. Mt. Joy; Merle and Robert, both of Blain, and Lynn of Harrisburg; a sister, Mrs. Margaret Dromgold, Blain, and eighteen grandchildren.

Deceased is very well known here. A number of years ago he purchased the Michael Hossler farm a short distance north of town where he resided for some time. Later he sold the farm and moved to Blain.

Kitchen Dangerous Place: Scene of Many Accidents

The kitchen, where many homemakers spend a large part of their time, is often a dangerous place to be!

Such things as water on the floor, a rickety kitchen ladder or a pot handle extending over the edge of the stove are bobby traps waiting for some unsuspecting or inattentive victim to fall into their snares. The National Safety Council estimates that the kitchen is the scene of one out of nearly every five home accidents serious enough to require hospital care.

A large part of these kitchen calamities are caused by burns from steam and hot liquids. A careful homemaker will lift the cover from a pan of boiling liquid so that it forms a shield against the steam, and she will also see that those handles are turned away to prevent grasping by childish fingers or to avoid the danger of an accidental bump. Thick, dry pot-holders are essential tools for every kitchen. Highly polished linoleum floors and spilled grease, water or fruit peelings are frequently the cause of injurious falls. And so are the stools, boxes and chairs used in place of a safe stepladder.

This Section's Numerous Weddings

(From page 1)

The bride was given in marriage by Clayton Richard Gertler and was attended by her sister, Miss Louise M. Gertler, as maid of honor. Ralph Alleman attended his brother as best man and the ushers were James Garfield Walsh, John Hess and Alvin Yngst. Evelyn Kreider played the wedding music.

Beatrice Hatchell
Lynn W. Martin

The marriage of Miss Beatrice Hatchell, daughter of Mr. and Mrs. Bonnie E. Hatchell, Long Island, N. Y., and Lynn W. Martin, son of Mr. and Mrs. Earl A. Martin, Salunga, took place Sunday in Trinity church in Brooklyn, N. Y.

Miss Margaret Martin, sister of the bridegroom, was maid of honor. A reception followed the ceremony at the home of the bride for the immediate families. After a wedding trip to Lake George, N. Y., the couple will reside in Holyoke, Mass., where Mr. Martin is foreman of mechanical aeronautic maintenance at Westover Field.

Frances Susanne Fackler
C. Ray Smith

Miss Frances Susanne Fackler, daughter of Mrs. Ruth D. Fackler, Elizabethtown, became the bride of C. Ray Smith, son of Mr. and Mrs. Herbert C. Smith, Maytown, in a ceremony solemnized in the formal rose garden at the Masonic Home in Elizabethtown at 4 p. m. Sunday. The Rev. Garnet O. Adams, a Marine Corps chaplain now on terminal leave, who was a roommate of the bridegroom at Ursinus College, officiated at the ceremony.

Pauline G. H. Edwards
Henry P. Koestner

Mr. and Mrs. Walter R. Gallagher, Elizabethtown R2, have announced the marriage of their daughter, Pauline G. H. Edwards, 129 Mount Joy St., this borough, to Henry P. Koestner, 561 N. Prince St., Lancaster. The marriage took place at 7:30 p. m. Wednesday, August 14th at the St. Joseph's Catholic Church, with the Rev. Stephen J. Hribick, officiating.

Miss Betty Lerner attended the bride and George Koestner attended his brother as best man.

A reception at the Liedkrantz Club followed the ceremony, after which the couple left on a wedding trip to Atlantic City. They are now residing at 48 W. Frederick St., Lancaster.

Student Matinee

(From Page 1)

gushed leader of this Band.

Capt. Santelmann should know. The public concert tours of his famous "President's Own" Band have taken them to every State in the Union. Everywhere, he says, he finds a lively interest in things musical—especially in bands.

Whenever the Marine Band goes on public tour, Capt. Santelmann is found giving advice and encouragement to such organizations as he meets on the road. Wherever possible, he conducts a number played by one of these bands, or several of them en masse. He will be on the lookout for such an opportunity when the Marine Band plays at McCaskey on its forthcoming tour.

Thick, dry pot-holders are essential tools for every kitchen. Highly polished linoleum floors and spilled grease, water or fruit peelings are frequently the cause of injurious falls. And so are the stools, boxes and chairs used in place of a safe stepladder.

First U. S. Patent Was Issued 110 Years Ago

Exactly 110 years ago, the United States issued its first numbered patent and it was for a locomotive, the Association of American Railroads reveals.

The patent was "designed to give a multiplied tractive power to the locomotive and to prevent the evil of the sliding of the wheels." It was issued to John Ruggles, a United States senator from Maine, who was largely responsible for the passage of the act of 1836 which set up the present-day American system of granting patents and administering the system property. Senator Ruggles' invention was a gear-like arrangement for locomotive wheels and railroad rails, which would mesh for grades.

The invention which was accorded the honor of Patent No. 1 was outmoded as soon as it was patented. About that same time a locomotive started the world by pulling a train of cars up a grade without the aid of outside cogs or gears. That rapid progress has continued, until now the average locomotive contains almost 1,000 patented features, the Association of American Railroads said.

Freezing Vegetables

Garden freshness of vegetables and rapid preparation for freezer storage or for canning are the key points in turning out a high quality product. Delays between the time the vegetables are gathered and prepared for freezing or canning may cause enough deterioration to make them unfit for storage. To put up high quality vegetables, select vegetables fresh from the garden, preparing them as rapidly as possible after gathering and then canning or freezing promptly to retain quality, flavor and color. Having all equipment and supplies needed for canning or freezing ready for use will help greatly in rapid handling of garden products.

Railroads Use Herbicides

The railroads have always been major customers for herbicides. Since non-selective killing and soil sterilization are desirable for their type of weed clearance, huge quantities of crude salt, oil, sodium chlorate, and arsenic oxide are used. In 1934 alone, 4,500 tons of arsenic oxide and 1,783 tons of sodium chlorate were allocated for use on railroad rights-of-way. Since both oil and sodium chlorate are fire hazards, and sodium chlorate and arsenic oxide are fatal to animals, they are not ideal for roadside or railroad weed control. It has been reported that cows will actually jump fences to eat plants poisoned with sodium chlorate, which gives off an odor like new mown hay.

Leading Lights Served With Judge Advocate

The judge advocate general's department, which marked its 171st anniversary last July, is one of the oldest branches of the army. Founded in 1775 by an act of the second continental congress, the department was organized as a part of General Washington's army by Lt. Col. William Tudor, the first judge advocate general.

One of its first members was Capt. John Marshall, who later became secretary of state and chief justice of the Supreme court. Among the many other distinguished figures in law and government who have served with the department are Henry L. Stimson, later secretary of state and secretary of war; Maj. Patrick J. Hurley, later a major general, secretary of war, and ambassador to China; Maj. Felix Frankfurter, presently associate justice of the Supreme court; Col. John H. Wigmore, later dean of Northwestern university law school and a world authority on the law of evidence; and Gen. Hugh S. Johnson, NRA administrator and journalist.

The department attained its largest size during World War II, when it numbered approximately 3,000 officers-at-law and was described by the judge advocate general as "the largest law firm in the world." Best known to the public for its part in connection with military justice, it also acts as the chief legal advisor to the army and the war department upon a wide variety of subjects.

Mexican Bases Aid AAF Hurricane Lookout

Earlier hurricane warnings and better protection for people living in the southern and southeastern United States will be the results of special agreements just completed with the Mexican government which will permit army air forces aircraft to operate from three Mexican airfields.

Hurricane-hunting planes of the AAF formerly have been unable effectively to keep tab on hurricanes moving into or originating in the Gulf of Mexico and Pacific waters adjacent to Mexico. Before the landing rights were granted, weather planes were based at Morrison field, West Palm Beach, Fla.

Now, with bases at Las Vajadas in Vera Cruz, Merida in Yucatan, and Ixtepe in Oaxaca, the AAF can extend its hurricane-hunting activities far to the west—to follow each storm that develops, flying through and around it, and to keep the weather bureau constantly informed of the rate of movement and intensity of these vicious tropical disturbances.

Portable Farm Elevator

The portable elevator is the "strong back" that does the laborious lifting for the modern farmer, according to R. D. McMichael of General Electric's farm industry division. The portable farm elevator will handle bales, boxes, baskets, ear corn, oats, wheat and other small grains; bags of potatoes, or even gravel and sand. Valuable as the portable elevator is in the harvest run of handling the hundreds of millions of tons of farm crops, its usefulness by no means ends when crops are safely housed, the farm expert pointed out. Such stored products usually go ultimately to market or are used to feed farm livestock. The farm truck or trailer can be loaded as easily and quickly as the crop was stored originally. Ground feeds as well as sacked commercial concentrates purchased to supplement farm-grown feeds present no problem for the portable farm elevator.

Cotton Classification

The Smith-Doxey act is the name of a congressional act which provides free classification and market news services to organized groups of cotton growers. This act directs the secretary of agriculture to provide for free classification of cotton to cotton growers who are organized to improve the quality of their cotton. If a grower wants his bales of cotton to be classified, he must be a member of a group of farmers who have adopted a single variety of cotton for the community or county—with each member planting a part, if not all, of his crop to the variety selected. The farmer himself does not apply for cotton classification. Each organization must file a group application for the services with the department of agriculture's cotton classing office right now.

Sarawak, Rich Borneo Kingdom, Now British

LONDON.—Sarawak, rich Borneo kingdom of the white rajahs, has become a British Crown colony.

An order in council put into effect legislation approved by the British parliament and Sarawak's supreme council.

Sarawak, Borneo state with 500,000 inhabitants and 300,000 acres of rubber plantations, was ceded to Britain by its last white rajah, Sir Charles Vyner Brooke, 71, under an agreement by which his three daughters and some local officials receive the proceeds of a \$4,000,000 trust fund established from Sarawak funds.

Charm Buy Artificial Arm For Crippled Youth

FLINT, MICH.—Willis Conkright Jr., 14, who lost part of his right arm in a mowing machine mishap, was given funds for an artificial arm by his playmates in the neighborhood.

He was driving a horse-drawn mower on his father's farm. He got off the seat to shoo a pheasant and her brood out of the way, and fell in front of the blades as the horses started.

Find Adventure In Field Work

Geodetic Survey, in Spite Of Hardships, Appeals To Young Men.

WASHINGTON.—Those who think of the United States coast and geodetic survey as a highly professional and cloistered department of the federal government are only partly right. Its work is scientific, but its personnel often meets with adventure and sometimes is in danger.

Personnel engaged in basic geodetic control survey work in the interior areas of the country "may encounter poisonous snakes, wild animals and tame animals gone berserk," department of commerce relates.

"They may find themselves clinging to a mountain ridge when a gale or blizzard strikes, or in deep gorges may be compelled to portage their boats and paraphernalia around rapids too rugged for navigation. In a mountain defile the lead man accidentally may dislodge a boulder, causing a wild scramble among those behind him to avoid serious injury.

Appeals to Young Men.

"Despite hardships and dangers encountered on occasion, however, work in the open has a strong appeal to young men and the division of geodetic experiences no difficulty in maintaining field parties at full strength.

"Every summer a limited number of young engineering students are given employment and distributed among field parties. They receive regular salaries and per diem allowances while employed and are assigned to the less difficult tasks. Not a few of them ultimately join the survey as permanent members. Often the work of field parties is centered far from human habitation.

Geodetic control operations take into account the curvature of the earth. For this reason in flat terrain it is necessary to make triangulation surveys from a considerable elevation. To meet this need tall portable steel towers are in constant use by field parties. In addition to taking care of the curvature of the earth, these towers provide an observation platform extending above surrounding forest growth and other obstacles. On two occasions falls from these towers have been fatal.

Operations Varied.

Operations in geodetic control are varied. They include the determination of geographic positions—latitude and longitude—and the determination of elevations.

"In 1807, during the administration of President Thomas Jefferson, the bureau was organized as the United States coast survey," the report says. "Operations started in 1816. There were some interruptions to the work, but it has been carried on continuously since 1836.

"Having always handled coastal control surveys, the bureau in 1878 was given the task of continuing such surveys into the interior and because the United States coast and geodetic survey. As a result of this practical control-survey work, a series of charts and maps covering the United States in its entirety to day may be put together like the many pieces of a picture puzzle."
