EDITORIAL

Duty may come before pleasure but nine out of ten men seem to prefer the second, first.

Hospitalization protects one from hospital bills but they haven't found a protection as yet, from grocery bills.

With Russia expecting to double its sugar production, we surely hope some of the sweet stuff finds its way over here. I know some fellows who were rationed to a pencil eraser full per cup while many were compelled to drink it "bare-footed."

PRES. TRUMAN PROCLAIMS HOSTILITIES ENDED

President Truman on Tuesday proclaimed the end of hostilities of the Second World War at noon today and thereby terminated 18 wartime statutes and limited the life of 33 others.

PRICES LEVELING OFF

Since the OPA was practically junked, as was expected, prices on many commodities soared sky-high, but within a short time they began to drop. This has been the case for weeks and we predict a continuance for some time to come. When they get nearer normal, supply and demand will regulate. This is as it should be.

One of the biggest drops in food came immediately following Christmas when butter dropped ten cents per pound. The price of eggs also dropped sharply.

CAREFUL WITH THE COOKIES

Extension of canning sugar stamps was a relief to households, but we had hoped that by this time there would be a greater supply on hand. Cane sugar shipped from Cuba is in smaller quantity this year than last. Sugar sent to Europe dips into our supply. With an increase in the country's population the domestic sugar allotment of a half-million tons more will have to go farther. The whole world's sugar production for this year is the least it has been in 25 years. Prospects for next year point to an increase but it is reported to be so small that the housewife will still have to watch in her baking, table use and canning.

PLEASE, NOT THAT!

We voiced a faint protest when they suggested a peacetime use of radar, for locating schools of fish to save fisherman time and consequently to spoil their fun. When we recently read of a French scientist who claims a discovery to turn night into day, we loudly object. Lose night in Mount Joy? What of fireside comforts, the bedtime goodnight of children, the friendliness of lamplight, smoke curling against a winter night sky, the loss of darkness to cloak a goodnight kiss, the close of day's toil when body seeks its rest in soothing darkness, the joy of summer shadows cast by moonlight on lawns, the night cries of birds and animals, the beauty of stars bejewelling the dark sky? Night is man's right and may heaven keep it such.

TIMING THE BRAKES

Winter driving is more dangerous than at any season and takes extra precautions. Checking brakes, chains on icy streets, workable windshield wipers, defrosters, are winter "musts." The heaviest burden lies with the patience of the driver, his physical well-being is a definite safety factor. Analyzing 1000 consecutive accidents in an Ordance depot in 1943, the greatest number occurred between 11 a. m. and noon. Little or no breakfast had been eaten by the workers who had the accidents which means that hunger through the morning leads to fatigue, poorer judgment, nervousness. An emotional up-set makes a poor driver. Grief, fear, anger, even excess happiness can divert the drivers mind from the job at hand. It is a check-

ing of car brakes but of emotional braking as well.

TIME WILL TELL

Soil must be sustained as it is used. For its own good America must conserve and maintain the farm land. Soil is not like other natural resources. Land that is fertile is not permanently so and the amount of fertile ground is not as enormous as we might think. Too bad we can't dig deeper as surface soil becomes poor, and strike it rich. When the topsoil is blown or washed away it is gone and it takes generations to replace its richness. Replacing topsoil restores the land's security, and it is inconceivable that we should lose our source of food because of ignorance or neglect of it. In the earlier days when the population was not so great, farmers didn't think it so necessary to protect the soil. Today having little undiscovered productive land, we must maintain that which we till. All types of mechanized equipment as cotton pickers, combines, corn-pickers, milking machines, tractors, increase production but without fertile soil the equipment is of little use. We know of the help of the Soil Conservation Department, of the splendid work of the agents in districts throughout the country. Information is available to any one through this agency and all agriculturists should take advantage of their service.

REGISTER A PROTEST

To raise the standard of radio programs it is up to the radio listeners to demand better ones. The daytime schedules of soap operas, the following another with little difference in content, brings complaint from those who would like better balanced radio diet. Since such programs are the least expensive network shows, the weekly cost of an ordinary soap opera is said to be less for five fifteen-minute periods than some advertisers spend on one "spot" announcement. The advertiser uses this means to sell his product and if such attracts more listeners who "don't care" than those who seek better programs, you will get soap operas. We cite this type of program but there are other kinds of broadcasts that show a profit to the advertiser but none to the listener. Don't forget that radio stations do not have to pay for the use of air channels and the public owns those channels. Profits from radio are therefore large. The public spends \$25 for receiving equipment for every \$1 the broadcasters spend for transmitting equipment. We pay \$3 to every \$2 the advertiser spends to keep the program going and we buy the advertiser's products besides. Citizens should get their money's worth. In some areas committees of radio listeners work through the local station to raise the standard of programs. The Federal Communications Commission determines whether a station's application for broadcasting can go through. The public has the power to ask this board for satisfaction before they renew the station's contract. This encourages better radio programs and will add more interested listeners to the commercials.

LANDISVILLE

There were 32 members of the Service Mothers' Club present at the Christmas party Monday evening. Following the business meeting, a New Year's prayer was read by Mrs. Ira Hess. Mrs. Clarence Reist had charge of the program which included a reading by Mrs. Franklin Horst; accordion selections by Mary Elizabeth Davis; group singing; a reading by Mrs. Clay Miller; the exchange of gifts and luncheon. Five Presidents of the United States were born in the New England states. They were John Adams, John Quincy Adams, Pierce Arthur and Coolidge.

HAPPENINGS —of— LONG AGO

20 Years Ago

The Snitzelbank Band of town, won first prize at the Lancaster Mummer's parade.

J. Willis Freed purchased the Milroy H. Brown property on West Main street.

Mr. and Mrs. E. L. Shank, S. Barbara street, celebrated their 25th anniversary.

A poem "On The Threshold" written by Miss Naomi S. Wolgemuth was published in The Bulletin.

Fshleman Bros. are now in their new location at the Mt. Joy Hall Building.

The Choir of the Lutheran Church held a delightful party at the Parsonage.

Mrs. Susan Derr who celebrated her 74th birthday, was honored with a package surprise.

Markets: Eggs, 40-42c; Lard, 17c and Butter, 40c.

A kitchen shower was given in honor of Mr. and Mrs. Abram Geltmacher.

High School and Alumni basketball teams played to a 30-30 score, then Jim Krall for the Alumni came through with a horseshoe shot, nosing out the high school lads by 2 points.

Miss Julia Fair, Florin, entertained her classmates, the Senior Class of 1925 to a New Year's eve party.

The 17 year locusts are soon to appear again.

Plans have been filed with the State Highway Dept., to widen the Harrisburg Pike to 120 feet.

Phillip Dattisman former deputy Sheriff was named merchantile appraiser of Lancaster County.

Dr. W. D. Chandler was appointed a member of the Board of Health.

Mr. C. Nissley Greider was elected president of the Literary Society which was organized at Newtown.

Mr. and Mrs. O. K. Snyder entertained to a party in honor of Supt. and Mrs. J. W. Weeter at Patton Masonic Institute for Boys at Elizabethtown.

Foster Frye, Elizabethtown replaced Witmer Eberle, of this place as reporter for the Lancaster Intelligencer.

NEWTOWN

Mr. and Mrs. Wm. Fogie and son, Thomas visited Mr. and Mrs. Isaac Kame, Roy, Emma Barton, May Nace and Mr. and Mrs. Harvey Barton at Columbia, Route 1 on Wednesday and also called on Mr. and Mrs. George Matheny, at Marietta.

Mr. and Mrs. Abram Gamber and family visited Mr. and Mrs. Carl Gamber and family at Ironville on Wednesday.

Mr. and Mrs. Irvin Witmer and family visited Mr. and Mrs. John Kauffman on Sunday at Ironville.

Mr. Roy Barton and Miss Annabelle Huber visited Mr. and Mrs. Wm. Fogie and son, Thomas on Tuesday evening.

Mrs. Marvin Garner and children and Mrs. Harry Breneman visited Mrs. Lillian Witmer and family on Thursday.

Mrs. Lillian Witmer and Mrs. Daniel Moore visited Mrs. Harry Weaver and family on Friday.

Mr. Maris Gainer and Mr. Paul Strickler were Sunday guests of Mrs. Annie Risser.

Rev. and Mrs. R. H. Arndt spent the week end with their daughter and son-in-law, Mr. and Mrs. Habet Khelgathian and children at Chester.

Mr. and Mrs. Daniel Geltmacher spent Christmas with her parents, Mr. and Mrs. Ralph Kiehl at Brunnerville.

FILES SUIT FOR \$153.95 REPAIR BILL FOR AUTO

Kermit S. Oberholtzer, Mount Joy R1, filed a suit in the Court House Tuesday against Warren Mueller, same address, asking \$153.95 for a car repair bill he claims he had to pay as the result of a collision of their two automobiles last October 19.

Oberholtzer is claiming his car was struck by a truck driven by the defendant while he was traveling on the highway leading from Mt. Joy to Maytown. The statement of claim charges Mueller with driving out of a lane onto the highway opposite the southern terminus of Chocolate Avenue and striking the side of the plaintiff's auto.

John Kramer, eighty-seven, died at Columbia Tuesday.

Religious News In This Community

NEWS PERTAINING TO ALL THE CHURCHES IN MT. JOY AND THE ENTIRE SURROUNDING COMMUNITY.

Methodist Church
Mount Joy, Pa.

GET A TRADE NAME
Fannie M. Longenecker, Rheems, and Ray M. Longenecker, Elizabethtown R1, and Ruth M. Longenecker, Rheems, to use the name "Longenecker Farm Supply" at Rheems.

Miss Ruth Ebersole, forty-two, formerly of Elizabethtown, died at Harrisburg.

Believe Humans, Mastodons Lived in Florida in Ice Age

There is a high probability that humans and mastodons lived in Florida at the same time—possibly as much as 10,000 years ago near the end of the last ice age. Such is the implication of a reconstruction of the so-called Melbourne skull in the light of developments in anthropology during the past decade by Dr. T. Dale Stewart, curator of physical anthropology of the Smithsonian Institution.

The crushed skull was found about 20 years ago by Dr. James W. Gidley, Smithsonian paleontologist, near Melbourne, Fla. There was strong suggestive evidence that it was contemporaneous with bones of mastodon and other now extinct animal forms. The geological strata indicated that the fragments had remained ever since undisturbed in their original position.

Dr. Gidley's report at the time caused considerable controversy. The skull, as reconstructed by somewhat crude methods at the time, was identified as that of a typical Florida Indian of a relatively late date. It was, the reconstruction indicated, a round skull. But despite this Dr. Gidley and his fellow paleontologists persisted that the position of the fragments could not have been due to burial. Dissatisfied with certain aspects of the reconstruction, Dr. Stewart has torn it apart and refitted the fragments together in a more logical fashion. The result is long-headed—the opposite of the original reconstruction. Moreover, since the Melbourne skull controversy in 1925, indisputable evidence has been found that man lived on this continent in association with many extinct mammals, including mastodons. This was certainly true in the Southwest.

Find Compounds Checked Congestive Heart Failure

Vitamin E and digitoxin prevented the chemical action which induces congestive heart failure in experiments reported by Dr. William M. Govier of Glenolden, Pa., with the technical assistance of Naomi Yanz and Mary E. Greis. The ultimate cause of congestive heart failure usually can be traced to poor oxygen supply to the heart muscle.

Vitamin E, digitoxin, and similar compounds apparently prevented the breakdown of a vital coenzyme occurring from a chemical action when the heart muscle tissue of a guinea pig lacked oxygen and vitamin E. This vital coenzyme in the tissue, he said, is the one responsible for metabolism of lactic acid, "the preferred fuel for heart muscle contraction."

Study Antivitamin

An antivitamin, one of the substances which work counter to vitamins, that brought death to mice starved for vitamin B1 was reported by Morris Soodak and Dr. Leopold Cerecedo of Fordham university. The experiments were made in a quest for new or better medicines to combat disease. The antivitamin which killed mice lacking B1 is oxythiamine. But mice made ill in this way recovered when they were given large doses of vitamin B1 (thiamine), they said. This indicates that a true antagonism or competition exists between this vitamin and its antivitamin, and that the action of the oxythiamine is not due to a merely toxic action, they said. Work is being continued to determine whether antivitamin could play an important role in therapeutics if they are used in conjunction with the sulfa drugs and other antibiotics.

Barnacles Multiply

Fouling organisms on ship bottoms can grow with amazing rapidity, even in temperate waters. At the Mare Island paint laboratory's panel exposure station located on Drake's Bay, near San Francisco, Calif., barnacle growth during the summer frequently exceeds two pounds per square foot in a single month on concrete or glass panels. At this same station mussel fouling on non-toxic panels often exceeds five pounds per square foot within an eight-month exposure period. Mussel fouling nine inches thick, weighing 25 pounds per square foot of exposed surface has been reported on buoys moored for three years off Cape Cod, in Biscayne Bay, Florida, the attachment of over 10,000 barnacles per square foot of exposed surface within a 30-day period has been recorded.

Keeps Blood Circulating

Loss of limbs after exposure to severe cold is caused by the red blood cells forming clots which plug blood vessels. This situation can be prevented by injection of heparin, a substance which prevents blood clots, the Surgeon General's Office reports. Tests of the heparin were made on rabbits. After receiving the heparin, their limbs were immersed in alcohol at a temperature of 24 degrees below zero Fahrenheit, a temperature colder than human beings ever are called upon to experience. The rabbits seemed little the worse off when their limbs were thawed.

Everybody in this locality reads The Bulletin—that's why its advertisers get such excellent results.

LITITZ MAN SPOKE TO THE ROTARIANS TUESDAY

Newton Buch, retired industrial engineer, of Lititz, was guest speaker at the noon meeting of the Rotary Club Tuesday at Hostetter's. He spoke of his travels in foreign countries.

Visiting Rotarians were Henry G. Bucher, Dr. N. B. Laughton, A. C. Baugher, all of the Elizabethtown club. Lewis Edwards of the Lancaster Club also was a guest. Other guests were Tom Lyons, Aurora, and Ontario, Canada, and John E. Booth, A. G. G. N. third class, Corpus Christi, Texas.

ROBERT BALMER FACES A CHARGE OF ADULTERY

Officer Elmer Zerphoy arrested Robert M. Balmer, on Monday night for adultery and for bastardy charged by Noah H. Gephart in behalf of his 18 year old daughter, Catherine.

Balmer posted \$500.00 bail for a hearing before Squire Hockenberry.

Many a horse is glad there's more beef and pork available on meat counters.
