Educational Material Available IF YOU are thinking of moving to and tells in straightforward way the story of how a home in the country can have the same modern gas cooking, gas refrigeration, automatic gas water heating and gas room heating as is used and en-

For the benefit of farm ramilles, it also tells how gas can be used on house sterilization and other farm production jobs. The name of the book is "The ABC of LP-Gas." caster. Suley, wife of Eugene Reist, of Mount Joy, is a daughter.

LP-Gas is the general name for the liquefied gases, butane and propane, which most of us know as "tank" gas or "bottled" gas. The booklet can be obtained, free, by writing the industry's headquarters, Dept. BM., the Liquefied Petro leum Gas Association, 11 South La Salle Street, Chicago.

If you are planning on building, or remodeling, a home in the country, I suggest that you get this booklet and read it while making your plans. Many associations and manufacturers are producing similar educational material. For the cost of a few penny postals you can get them. They may give you a lot of money saving ideas.
