## EDITORIAL

\*\*\*  
Better go easy on the booze fellows if you insist on driving that car. Many cities have adopted "drunkometers" to settle the question of whether or not you are "pickled." These new devices register the alcoholic condition of one's system accurately, therefore, if you want to drive, don't drink.  
\*\*\*

### IT'S A FACT

A few "whys" of the growing gasoline shortage: there are 3 million more passenger cars in use now than in 1941 and they are driven more miles; truck registrations have doubled; busses have increased more than 40 per cent; farm use of gasoline has doubled; more than 1 million additional tractors on farms; locomotives using Diesel motors use a lot more oil and 90 per cent of new locomotives on order are Diesels; more homes heat with oil. The U. S. produces over 5,600,000 barrels of oil a day. In 1940 we produced 4,060,000 barrels daily. The petroleum industry plans to spend \$4 billion for further expansion to meet the increasing demand.  
\*\*\*

Just recently the Boro of Columbia installed an additional twelve-inch water main in order to increase the pressure there. The main was laid at various places in addition to the present ones. Last week they gave the installation a test by boosting the water pressure from 40 to 80 pounds. As a result a number of the old pipe just "couldn't take it" and to date they burst at five different places. Workmen were called from York and Harrisburg to assist in making the repairs so patrons would not be without water. Inasmuch as Mount Joy at present has something similar in consideration, we may be confronted with a similar experience. Many of our water pipes have been underground a long time.  
\*\*\*

### MAN VERSUS BUG

We held high hopes for DDT, that it would conquer the bug population that flourished in the good old summertime. But, leave it to an insect! In an Agricultural Department laboratory in Orlando, Florida, scientists bred a strain of houseflies that resisted all the effects of DDT. They withstood rotenone and pyrethrum, too. And, say the scientists, if this sturdy line of laboratory-bred flies can master insecticides, the chances are that insects outside the laboratory are building up the same power. In other words, as man increases the sprays to control mosquitoes and houseflies, the insect builds up a similar resistance under natural conditions. However, Mount Joy will still use its spray gun this summer, just as a reminder to bug-dom that we are still in there fighting!  
\*\*\*

### THE HEAT OF BATTLE

Candidates for the nomination of President, have their first official airing in the state primaries. As time grows shorter for measuring the prospect's popularity, the range of guessing of who will win, becomes more confined. The Republican candidates are being sorted, popular standings tabulated, the sentiment of the rank and file being studied, surveys in progress noted, and the facts revealed or concealed as party politics dictates. Elections are institutions and the fight for high political office never loses its fervor. When it comes to the electing of a president of the nation, the suspense is more pronounced than in the election of a sheriff. But, good government, whether it be county, state or national, is the aim and desire of the majority of voters. The best man for the job should be the people's choice rather than the selection of a political party to which the candidate belongs. Americans don't like dictatorship.  
\*\*\*

### MEMORIAL DAY

Deeds of gallantry speak for themselves. They become highlights in history and live because they are tied in with our national enthusiasm for honor and integrity, pride in valor, the realized debt of gratitude we owe our nation's heroes.

## An Egyptian To Speak At Calvary Church

An opportunity will be provided to missionary minded folk of this Community to hear a Native Missionary from Heliopolis, Cairo, Egypt on Saturday and Sunday May 29, 30 who will be speaking at Calvary Bible Church, Mount Joy. Adly Fam has consented to take time out from his busy schedule to pay a visit to this area, in order that we might hear from a Field probably heretofore not heard from at Missionary Conferences. Our speaker has been associated with the Gospel Center and Bible School of Cairo for the past eighteen years, eight years of which he was Acting Superintendent while the founder Mr. Erion Boutros was stranded in this County during the late War. Mr. Fam is in New York since April 30th where he is enrolled as a Graduate Student in Columbia U. He speaks fluently, Arabic, French, and English. With the news center of the world presently in the area from which he has so recently come, his visit to Mt. Joy should prove a help in analyzing world events.

His subjects: Saturday 7:45 P. M. "The Divine Imperative for Youth." Sunday 10:30 A. M. "Princes From Egypt" being an Exposition of Isaiah 19 and Psalm 68:31. Sunday 7:30 P. M. "Islam Cross-Examined." All are invited. C. I. Summy is the Pastor of this Church.

## NEWTOWN

Mr. and Mrs. Howard Johnston of Lancaster, spent Friday and Saturday with Rev. and Mrs. R. H. Arndt and Mrs. Annie Risser. Tuesday evening Mr. and Mrs. Ammon Hofer of Mount Joy visited Rev. and Mrs. R. H. Arndt and Mrs. Annie Risser. The pupils of the Newtown school, of which Miss Snyder is teacher gave the folks quite a few laughs on Monday evening when they presented a closing Day program of Recitations, Exercises, Drills, Songs and plays. A contest of Arithmetic Problems, by the various grades brought prizes to Peggy Witmer, Shirley Witmer, Nancy Witmer, and Paul Swick. Mrs. Jacob Erb and Daniel Gelmacher served as judges of the contests.

Mr. and Mrs. K. Franklin and Mr. and Mrs. John Cromwell visited Mr. and Mrs. B. L. Bowers of Piqua on Sunday. Mr. and Mrs. Samuel Little of Harrisburg, Mr. and Mrs. Oscar Walter of Lancaster visited Mrs. Serena Fogle on Sunday. Mr. and Mrs. Harold Stoppard, children Donald and Larry, Bridgeport visited Mr. and Mrs. Earla Gelmacher and family on Sunday. Mrs. Martha Orio of Philadelphia is spending the week with Mr. and Mrs. George Schelkopf and family. Mrs. Lillian Witmer visited Mr. and Mrs. Marvin Garner of Mount Joy RD on Sunday.

Mr. and Mrs. George Witmer of Millersville, visited Mr. and Mrs. Daniel Moore on Thursday. Mrs. Betty Peifer of Millersville former resident of Newtown visited a few days with Mr. and Mrs. Daniel Moore. Mr. and Mrs. Daniel Gelmacher visited Mr. and Mrs. Wilbert Witmer on Saturday evening. Mr. and Mrs. Guy Urban of Holtwood visited Mr. and Mrs. William Haines and Mr. and Mrs. Guy Urban Jr. on Sunday. Mr. and Mrs. Daniel Gelmacher visited Mr. and Mrs. Ralph Keith and family of Litzitz and Mr. and Mrs. Marlin Landis on Sunday. Mr. and Mrs. William Fogelsanger of Wrightsville visited Mr. and Mrs. Robert Frank and family Sunday. Mrs. Jacob Erb spent Tuesday with Mr. and Mrs. Daniel Gelmacher.

**Care of Tools:**  
A hint before you start to use pruning shears about the yard and garden. Good pruning shears cost money and should be kept clean. Pruning shears, not cleaned thoroughly after use, can also spread plant disease and plant pests. Cutting branches or stalks of a diseased plant, wipe the blades of the pruning shears clean, or you can infect the healthy plants you prune next. Some local gardeners use a disinfectant for such shears. Apply oil to the moving parts of the shears before storing after use.  
**Consider Dressings:**  
A subscriber gives a good basic French dressing recipe, with variations for different salads. The basic recipe: 4 t sugar, 1 T salt, 1 T paprika, 1 c salad oil, 1/3 c vinegar, 1 garlic clove. Put all together, mix well with rotary beater and then remove garlic before serving. Russian Dressing: add 2 T chili sauce, 1 T finely chopped green pepper, drops of onion juice. Cheese Dressing: add 1-4 T crumbled Blue cheese and few drops onion juice to basic recipe. Honey Dressing: omit sugar and garlic but add 1-2 c strained honey and beat until frothy. This is good for fruit salads. Peppery Dressing: add 1 T Worcestershire sauce, few drops tobacco sauce, minced chives, to basic recipe.  
**Inspirational:**  
If you wish to be borne with yourself, bear with others.  
—Thomas A. Kempis

**FILLERS** -rgt-fllr flnt fl  
**PIGS LIKE PASTURE**  
Good alfalfa pasture saves 5 to 10 percent of the grain and 30 to 40 percent of the protein supplement needed in the production of pork. A good stand of alfalfa will graze per acre 18 to 30 hogs on full feed or 6 or 7 on a half feed of grain.

**SELECT COLORFUL SHRUBS**  
Color can be added to the landscape of the home grounds all through the year by carefully selected shrubs. They require less work and water than annual flowers and have fewer insects and diseases than tender plants.

**\$40,000 FIRE AT COLUMBIA**  
Thirty-five persons were left homeless when fire wrecked the interior of five dwellings on Union St., Columbia, yesterday morning. The loss is estimated at \$40,000.

## Flies Resistant to DDT Developed by Scientists

A strain of DDT-resistant houseflies, requiring nearly twice as much of the chemical to kill them, as ordinary flies, has been developed by the USDA. The possible future development of DDT-resistant houseflies in nature is of considerable importance to public health. The problem depends somewhat on how long it may take for wild flies to develop such resistance. This would complicate control.

## Productivity Depends Upon Organic Matter

The soil's ability to produce high crop yields needed to feed hungry millions depends on its organic matter supply. Soils rich in organic matter are good "sponges" for soaking up and holding rainfall for crops. Organic matter helps restore soil structure, improves till and helps plant roots get more nutrients from the soil. Use lime, fertilizers containing phosphorus and potash to get good catches of legumes.
