EDITORIAL

When two people marry and live happily ever after, it's a cinch they both got the best of the bargain.

Heartiest Congratulations to all those who managed to live the Fourth of July, our deadliest holiday.

One must remember that there is a much greater difference between yearning and earning than just the letter Y.

UP TO YOU

Who can stop the more quickly, the pedestrian or the motorist driving the automobile? In case of collision between pedestrian and automobile, which suffers the more damage, the human body or the car body? Answers of the two questions add up to the fact that the pedestrian takes the biggest risk and is also able to avoid having the accident through careful attention to traffic on streets and highways. The pedestrian knows he can stop but is he sure the motorist can? The facts are obvious and in favor of the man on the street, if he stops to look and think.

POLIO SEASON

The season for polio starts in June and early July and reaches its peak about the last of September. Children are the ones usually affected by the disease and parents should see that certain precautions be taken to protect the young. A child should have certain rest periods each day and kept away from water which might be contaminated. Keep flies from children. Operations, such as removal of tonsils and adenoids, should not be undertaken during this season. Bear in mind that quarantine of polio victims seems to have no effect on controlling the disease, so most of the responsibility rests upon the parents.

PLAY YOUR PART

Lots of us don't like politics, consider it a dirty business, a case of smoke-filled rooms, whitewash, party bosses, noisy declarations not fulfilled. The man who lives in a free society, can't dispense with politics. You may prefer your book, garden, radio, ballgame and leave the politics to the fellow who wants it. But, if we wish to live in decency, in comfort, in harmony, we must attend to the business of politics. It can be approached with intelligence, handled in good taste. Conducted on these lines, it can be interesting. Considering all types of government we feel ours is the best. Politics is representative of our form of government. Through this medium, our nation was made great, and it is the duty of everyone to take an interest in politics, to keep it great.

WATCH THE BERDIE

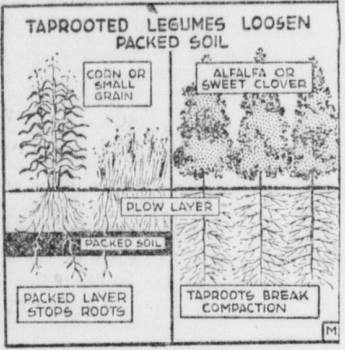

Stores that sell cameras and photographic supplies are kept busy during the summer for 'tis then that cameras, equipment and developing material are sold. Photography has gained in popularity and the hobby is found every place. Take a trip to mountain or seashore, by land or air, rail or highway, and at all stages the camera.

With about 25 million persons owning cameras, twice the number of twelve years ago, the hobby of photography gains followers daily. There are all kinds of camera fans, those who snap a picture without working up to it with all the gadgets, and often producing a picture that straggles the "subject" who will smile by his little meter, and so forth. Some folks get a kick out of a camera. These are hard on the object of their game. Whether he camera hobby proceeds to dark rooms, expensive developing materials and mats, or is a case of letting someone else carry on with the roll or plates, the photos mean much to all of us, in looking backward. Camera studies are treasured in the family albums for all our enjoyment. Sweet memories are stirred in the tomorrows. May the camera hobby prosper.

Legumes Open Soil To Air and Water System of Rotation Prevents Compaction

Tight "stuffy" soils are robbing many farmers of high bushel-per-acre yields of corn and small grains each year. Loams, silt loams and clay loams need large amounts of organic matter in the plow layer and deeper to keep them open and loose for high crop production. Heavy soils that are low in organic matter and worked with heavy tractors and machinery become

Tap roots of alfalfa and sweet clover, as shown in sketch, break through packed soil to assure water and plant food for growing crops.

packed, especially just below the plow sole. These compactions slow down the intake of water. They cut down the amount of water and air the soil will hold for crop use. They keep the fibrous roots of corn and small grain "upstairs" away from water and plant food held deeper in the soil.

Temporary relief can be had by using machines that reach below the ordinary plow layer and break up the plow sole compactions. Real relief, however, comes only through regular use of deep-rooted legumes in the rotation.

Smash Sale Records

All records for Ayrshire auction sales in the U. S. were broken when an average of \$2,267.39 was paid for 23 Scottish bred Ayrshires imported and sold by Frank V. Lile of Bellefontaine, Ohio. The sale grossed \$32,150. A new record price for Ayrshire bull calves was set at \$4,600 by Howard Baum and Sons of Paint Valley farm, Bainbridge, Ohio, in the purchase of eight-months-old Killoch Gay Spark (above).

Increased Yields Noted With Use of Fertilizer

Wheat yields can be stepped up 7 to 14 bushels per acre and the hay crop can be increased through use of more fertilizer in hay and pasture crops seeded in small grains, declares Dr. D. R. Dodd of the Ohio experiment station. This practice is particularly profitable on land already highly productive, Dodd points out. As an example, he cites tests made by researchers on plots at the Ohio station. The land's producing capacity already had been built up by good soil management so that it was producing an average of 85 bushels of corn, 23 bushels of wheat and 3 tons of hay per acre.

Minnesota Starts Big Tree Planting Project

As the first step in a far-reaching tree planting program authorized by the state legislature last year, Minnesota is planting about two million trees this year. A million deciduous and coniferous trees are being sold at cost plus handling expense for planting on private lands. Another million coniferous trees are available for free distribution for planting on public lands.

There is no better way to boost your business than by local newspaper advertising.

The Bulletin's Scrapbook!

Week's Best Recipe

Foundation Tomato Sauce: 2 c. canned or stewed tomatoes, 2 T. cooking oil, 2 chopped onions, 1-2 chili pepper or a whole one, 1 garlic clove, halved, 1 green pepper, minced fine, 1 t. Worcestershire sauce, 1 t. dried marjoram or basil, 1-4 t. celery salt, 1 t. chili powder. Heat oil and brown it in the chopped onions, chili pepper and garlic. Let it cook five minutes, remove garlic and add tomatoes. Cook together for 15 minutes more. Add green pepper, Worcestershire sauce, marjoram, celery salt, chili powder. Cook until well blended, when mixture is rich and thick. This sauce may be kept on hand to use with spaghetti, macaroni, or to pour over an omelet or souffle, used as a sauce for Creole shrimp.

Inspirational: There is always hope in a man that actually and earnestly works. In idleness alone is there perpetual despair.

Fond Fancies: Add 1 cup crushed pineapple to pancake batter, serve with butter and brown sugar. Creamed cheese mixed with chopped nuts and dates makes a delicious topping for freshly baked gingerbread. Peanut butter mixed with a little cream is a good filling for graham cracker sandwiches for the children's lunch box. Mix 3-4 teaspoon of sugar with 1-4 teaspoon of cocoa and sprinkle over buttered toast. Mix preserved ginger with cream or cottage cheese and serve with crackers as a desert. Spread on round crackers, top with marshmallows, indent top and fill with orange marmalade or raspberry jam. Brown and serve warm.

On Wash Day: A subscriber gives these laundry hints. Handkerchiefs will wash more easily if they are soaked in salt water first, two tablespoons of salt to one quart of water. In cold weather, to keep starch from blowing out of the clothes, add a little salt to the starch and by adding a handful of salt to the last rinse water, clothes won't stick to the line. A handful of salt in the rinse water will keep bluing from streaking clothes in winter.
