Sorry...

THIS CROP IS NOT FOR SALE

Like progressive farm families everywhere, this man's family has a money-saving electric food freezer. The electric food freezer is one of the best investments you can make for your farm. It provides a simple speedy low-cost way of preserving foods... and you'll find the "taste difference" in frozen foods is far superior to that of foods preserved the ordinary way. You also have that delicious, nutritious, peak-of-the-season freshness in peaches, strawberries, corn-on-the-cob, peas, lima beans and other fruits and vegetables right through the winter. And... for convenient, easy, safe storage of meats, fish and fowl the electric freezer is the best by far.

The electric food freezer also has another important advantage for the farm family. You can store in quantity such foods as pastries and breads... and even many kinds of complete meals. Here's your answer to the rush of harvest season with its extra meals for extra hands. Prepared in leisure, large amounts of foods, already cooked, can go directly from the freezer to the table with only a quick warm-up.

See your dealer now. Have your electric food freezer on hand well before those first vegetable and fruit crops come in. Enjoy good eating year 'round.
