YOUR DOLLAR BUYS MORE AT THE ACME

MAKE MILKING EASY AND YOUR DAIRY FARM MORE PROFITABLE

THE Electric WAY

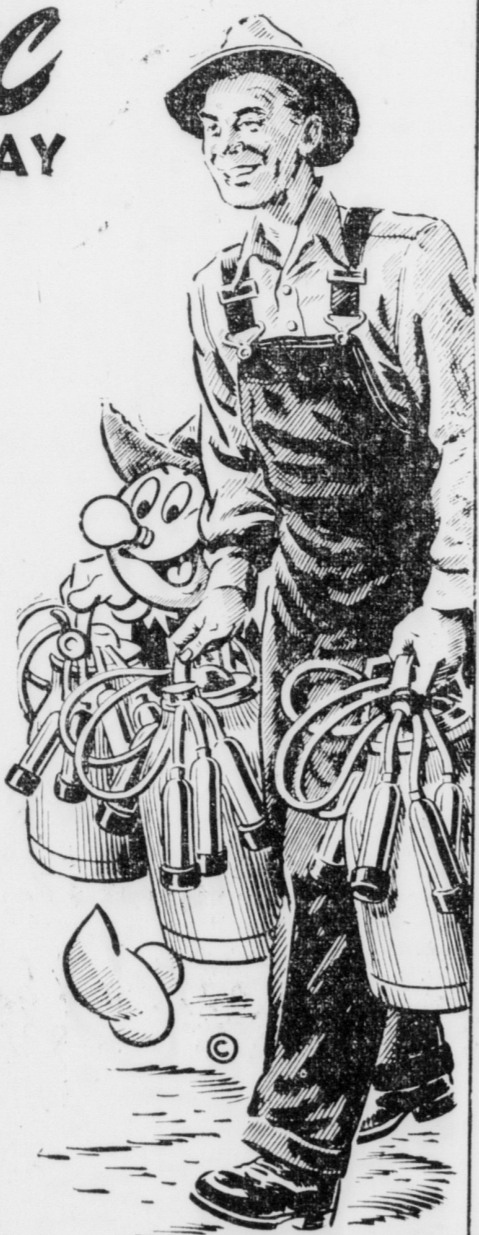

What remains from your milk checks after you have paid your expenses is the final answer to your dairy farm profit.

We can help you make that margin of profit bigger whether you have a herd of 7 cows or 70 cows.

Electric milking is the solution. Because electric milking cuts expenses as well as increase milk yield. Here is how it works:

First, electric milking is the most sanitary method of milking. This means cleaner milk and fewer rejects. Second, with electric milking you save as much as 50% of your milking time. This means you can either cut milking time and wages on your present herd or you can increase your herd without stepping up milking costs. Third, electric milking costs only 3 to 5¢ a cow a month. This means the savings of electric hired hands at pennies per month over human hands at dollars per month. Fourth, electric milking takes advantage of the natural let-down process. This means a two-way advantage... you increase milk yield as much as 10% and you greatly reduce the chance of milking injury among your herd.

Join the hundreds of progressive Central Eastern Pennsylvania dairymen. Install electric milking equipment and start making more dairy profits right away.

For more detailed information on electric milking, ask Pennsylvania Power & Light Company for a copy of this interesting bulletin on three-minute milking.
