EDITORIAL

The dietitian who says a family of four can be adequately fed for less than a dollar a day must mean a family of canaries or of rabbits.

The best definition of a Communist is a fellow who borrows your pot to cook your goose in. He is always willing to share his nothing with everyone else.

There is another mighty good reason why motorists should not give hitch-hikers a lift unless they know them. Over in New Jersey a salesman was kind and the hiker jammed a revolver into his ribs and made him drive 275 miles to Washington, D. C. — then he got away.

Looks as though we can get ready to shell out more tax money. President Truman asked Congress to raise all cabinet members pay from \$15,000 to 25,000 per year and a budget director asked to have the presidents salary increased to \$150,000.

Those Democrats certainly believe in spending money no matter where it comes from.

THEY NEED DENTISTS

Dentists are as busy as doctors. In the Army they are overworked caring for the mouths of recruits. Two of every three need a great amount of dental treatment. In fact, the condition is so serious, there is talk of drafting dentists. The Army says that teeth are so had among draftees and volunteers that it is taking anyone who has two jaws and twelve teeth. Some of the blame rests with parents, when there was insufficient funds to provide proper dental care for the young children. More schools are providing free dental service through public health facilities, to look to the future as well as to care for the present health. It is to guard against all manner of illnesses that follow from diseased teeth and gums. The civilian population needs its dentists and hope it will not be necessary that they be drafted by the Army.

IT WOULD NOT SURPRISE US

If you wondered how we would fare when Petrillo placed the ban on record making by union musicians, you were probably surprised at how little it has affected you and your listening. We do get tired of hashed and rehashed recordings, but the monotony has been lessened by overseas recordings, by reissues of old favorites by the backlog of records rushed through just before the union edict became effective. It does seem the ban has not worked in providing more jobs for musicians. The juke box industry has not been hurt, it appears. But, big name bands that make money from recordings have suffered. There has been a decided drop in song-writing, too. So it might not be long before Mr. Petrillo lifts the ban and agrees with us.

A gentleman of 82 years writes us that newspapers are most generous with space devoted to designs of women's apparel through few print even a word about men's clothing.

This reader, a doctor of medicine, wants the tail of the shirt restored to a decent length, as does every man. He wants the collar put back on night shirts for protection in a cold bedroom. The back of drawers and trousers should be built up to afford protection to the small of the back, especially for men of outdoor occupation or subject to lumbago. The suspender buttons on the back of trousers should always be on the outside to reduce pressure on the spine. The legs of pajamas should be buttoned at the ankles to keep them from slithering on cold nights.

All of these suggestions are very good although they may appeal more to elderly than to young men.

It is a fact however that in England, which is a mens world, vastly more attention is given to men's apparel than in the United States. Men in London have ideas and get what they want. In this country, Los Angeles seems to be doing a job for the men in the design of sports and lounging wear.

Improvements in masculine wear are long overdue, but so long as women do the buying for men as is the custom here, not much gain can be expected.

GOOD FARM MANAGEMENT

Some first class advice for the American farmer recently came from Dean William Myers, of the New York State College of Agriculture at Cornell, when he said: "It seems today that good farm management calls for farm people to continue to build financial reserves in United States Savings Bonds rather than to enlarge their farm businesses beyond the size needed for efficient operation. The possibility of speculative profit from buying farm land or livestock when prices and incomes are high is seldom worth the worry and risk of losing everything if a drastic drop in farm incomes should follow."

The situation that followed World War I is in point. Prices and land values were high then, as now. In instance after instance farmers mortgaged their property in order to buy more. A disastrous break in the prices paid for farm produce came along and a tragic number of farmers lost not only their new holdings, but their old places as well.

Everyone hopes that this will not be repeated. At the same time, it is only the part of wisdom for farmers to place a substantial part of surplus income in liquid assets—assets which can be immediately turned into cash if the need arises. Here is where U. S. Savings Bonds perfectly fill the bill. They are the safest possible investment. Depending on the type purchased, they either appreciate in value as time goes on or pay a good rate of interest. They are as liquid as cash in the bank. And last but not least, they give the farmer and everyone the opportunity to own a financial share in his government.

Tobacco Show

(From page 1)
growers ordinarily know as the lighter and thinner tobacco grown here, while Filler B represents a heavier bodied tobacco.

One hand of 15 leaves will constitute and exhibit. Only one entry will be allowed in a class by a grower. The leaves in a hand should be free from blemishes and should be as uniform as possible in length, color and in texture.

Entries will be accepted at the Show Building until 1:30 p. m. of the day of the show. Exhibits that may be brought in before the day of the show may be left at the County Agents Office or at the Tobacco Experiment Station. Unless called for by the owner after the awards are made at the show, all entries here will be carefully packed and exhibited at the Farm Show at Harrisburg. Any grower from Lancaster Co. is invited to participate.

Garbage Removal

(From page 1)
boro fathers have been able to find a place to deposit this rubbish, garbage and what else have you thrown out, without any cost. The expense comes from our regular boro taxes, everybody pays his or her proportionate share without even a whimper and there is absolutely no trouble or expense in collecting the cost thru the present method.

We will grant you we do not have sewage (but we hope that he time is not too far distant that we will) but we have so many other advantages over other boros, that we can name numerous reasons why it is far more expensive to live in other places than in Little Old Mount Joy.
