YOUR DOLLAR BUYS MORE AT THE ACME!

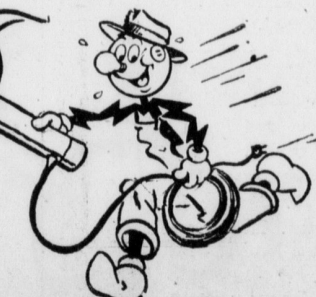

Humphh....no water, no eggs!

Even at today's high egg prices, you'll have to keep poultry water warm and free of ice if you want to make money on eggs. If hens can't get plenty of water, warm enough to drink, they can't lay well. And, when egg production falls off these days you lose money in a hurry.

About 45 degrees is the water temperature you need. The electric poultry water warmer is the simple, safe, automatic way. And, it means up to 20 per cent more eggs when prices are highest. Order your electric water warmer today, for better production right away!
