

OWL LAFFS

A WISE OWL

You know, up until yesterday, I always looked down on the lowly caterpillar. But no more, no indeed! My researchers tell me that a caterpillar has almost 4,000 muscles, while man (that's me) has approximately 750. Where you ever hit by a caterpillar?

These researchers drive me nuts! Now they tell me that the average watch ticks 157,680,000 ticks a year. Now who the heck had time to sit down for one year and count all those tickets?

Our butcher remarked: "I always pay my income tax all at once." "But you are allowed to pay it in quarterly installments" I said. "I know it, but my heart can't stand it four times a year," he explained. — Serves you right.

An increasing number of women are taking up the study of lay. The usual number continue to lay it down. — Amen.

A Mount Joy St. hubby was prowling around the darkened bedroom. Awakening, his wife asked: "What are you looking for?" He (very guiltily) answered: "Nothing dear." And his spouse, well aware of what he sought, said: "You will find it in the bottle where the Calvert used to be."

Here is another instance which continues to prove that kids of today just can't be beat. Jimmy had a hard time pronouncing the letter R so the teacher gave him a sentence to learn: "Robert gave Richard a rap in the rib for roasting the rabbit so rare." A few days later she asked Jimmy to repeat the sentence. He rose and said: "Bob gave Dick a poke in the side for cooking the bunny enough." — See what I mean?

Motorist: A person who after seeing a wreck drives carefully for several blocks.

J. hn Bender told us that the other night one of his customers told him that his small son asked: "Dad, the teacher told us about the evil spirits entering the swine." "Yes, my son, any questions?" The son queried: "Is that the way they got the first deviled ham?" His father was at a loss to answer.

If all the students who sleep in class were placed end to end they would be much more comfortable.

An old maid is like a fisherman: they both tell about the ones that got away.

The difference between kissing your Aunt Rachel and your best girl is about sixty seconds.

Did you hear the comedian on Arthur Godfrey's Talent Show who said he was so homesly, that when he was born on New Years Eve, it was four days later before his dad realized he wasn't a hang-over?

On another amateur show a near by lady auditioned. She sang (so she said) When the MC asked her where she learned to sing, she explained: "I graduated from a Correspondence school." — Then she sang! When she finished, the MC looked at her and exclaimed: "You sure must have missed a lot of mail."

We have been warned of some counterfeit bills circulating hereabouts. You can tell the phoney's by dropping them in hot water which makes Alexander Hamilton's ears turn red. I can't see anything phony about that! So would yours or mine if we dropped 'em in hot water.

How many of you fellows, at some time or other, didn't shoot a

East Hempfield	1	6	.143	

In the County High School League Friday night Mount Joy easily defeated Marietta 51 to 39. McCue, who is showing the way in the league, was the star, scoring 26 points. He was fouled out by a dead rabbit or bird set up by some joker? Well here is a new one. Charlie Roth walked out in the back yard at Shatto's, where he is employed, saw a big rat on the lawn and immediately hiked over to Harry Darrenkamps, grabbed a rifle and shot the rat. Imagine his disappointment when Harry told him he had shot that rat about an hour before, but did not have time to remove it!

REG'LAR FELLERS

THE LOW DOWN

HICKORY GROVE

A sermon of Theory vs Practice could take one hour or a couple weeks, but to cover same in three minutes, like where I step up to the plate with my 200 word essay, is not going to be long enough to bore anybody too much. I am not against school houses or universities or professors or theory, in general—for to get an education you should hear all sides of all the questions you dig into. But I am against putting theories into practice on a big scale and before they are tried out on a small scale Lab.

Take Socialism. In some of the school houses and on the blackboard, the black figures at the bottom which is a profit on at last some venture in government operation and which profit goes to the people—in theory -- do not get there in real coin of the realm that you can put in the bank. Or if you do get it and put it in the bank on Monday you gotta take it out on Tuesday to pay the extra taxes you now must dig up since the private company was shoved out and Sambo took over. Samuel pays no taxes.
