ANTHACITE INDUSTRY ON THREE DAYS PER WEEK A report out of Pottsville says that anthracite coal miners were put on a 3-days a week shift. They are digging too much coal

It's just one of the big outstanding features found in Steinhorst FARM-HOME FREEZERS

STEINHORST improved lid design provides maximum insulation at the one point in all farm-home freezers where cold is most apt to leak out and warm air seep in.

With STEINHORST construction you get a thick wall of protected wood around the inside of the lid. Not the ordinary band of metal or composition that conducts heat in and cold out. Actual tests taken under like conditions have proved that with STEINHORST construction, the temperature at the base of the lid is 8° colder than with conventional construction.

Yes, for the best in Farm-Home Freezers, for tops in safe, dependable and economical performance, buy STEINHORST. Manufactured by the pioneer of the freezer industry, STEINHORST Farm-Home Freezers have 35 years of skill and experience built into them. You get all the "newest" and "best" features that have been tested and proved! Ask us for the name of your nearest dealer.

Send for our latest pamphlet which illustrates and describes our three models. We will also send you a booklet on the preparation of foods for your freezer. Both are free. Write:
