EDITORIAL

Man may be made of dust but a lot of them lack grit.

Before proposing it would be well for a young man to see his girl eat corn on the cob.

Did you ever notice that men pay very little attention over the rise in price of bread or milk but let cigars take a jump and how they do squawk.

As you all know there is a law regulating noise made by the automobiles. There is a must in having a good muffler, particularly in larger towns.

But, to our knowledge, there is absolutely no limit as to just how much noise a motorcycle may make. This just doesn't make sense so why don't the authorities enact at least some regulations governing the above.

This should have serious consideration.

LET THEM EXPLAIN
There are so many who claim "good times" are still here. We will grant you that is quite true throughout this community but will those "die hards" please read this:

John R. Steelman, assistant to President Truman, says there are eleven districts where unemployment has reached a critical stage. One of them is in the Scranton - Wilkes Barre area where 41,000 persons are idle of industry.

NOW WE UNDERSTAND
There are many, many news items one reads in today's newspapers that just don't make any sense. However, they are quite simple when one gets a peek at the background. At a "five percent" hearing at Washington last week, invoices were brought there which showed that home freezers were delivered to Mrs. Harry Truman, Independence, Mo., two 1) Maj. Gen. Harry Vaughan, in Washington and quite a number of others. That enlightens numerous recent entanglements while the smell thereon is not too fragrant.

IT CAN'T HAPPEN HERE
An unemployed miner in Alabama admitted selling a two year old daughter for \$500, which he needed to buy an automobile. He planned to sell his seven months old daughter for \$600, if a buyer could be found. May-be he has a two-car garage! Later he told police the \$500 was a gift, because he was hard-up and needed the money, that the first child was sold because he couldn't give her the things she needed. But he needed an automobile. This is a rare case, thank heavens and no parent can understand. As important a role as the automobile plays in our life, a child plays a million times over. We'd prefer walking.

AUGUST
There is a calmness and serenity that comes with mid-August. There is its fullness of growth, the ripeness and maturity of its plant life. Lush is the word for August. That early summer sun that all things green reached for, has given them full color for flower and fruit. They await the final picking, are unburied in their growing. The frog, grasshopper, bee, swallow and cicada hint, in less noisy tones that it won't be long before fall days. There was much haste to grow and fly and chirp when spring beseeched activity. Now the hurry is past and the plants, insects and people are relaxed.

A WORD TO THE WISE
The U. S. Chamber of Commerce gives advice for labor and management. The suggestion that a business recession, which is present, must be overcome by not demanding higher wages which would result in higher production

costs. Business should reduce prices to promote more sales. Higher wages will mean more unemployment unless costs are added to the price list of goods and then the buyer puts thumbs down. Labor, seeking higher wages while prices decline is one thing. Labor asking increases when prices decline is another. If business works, all through advertising, salesmanship new products and friendly relations with labor, then according to the Chamber of Commerce, we may halt the recession.

A NEW WRINKLE
Movie receipts are falling off throughout the country to such an extent King Brothers, a trio of Hollywood producers, are making an effort to give box office receipts a shot in the arm. They have suggested a plan, and it may be adopted, whereby patrons can attend on the deferred payment plan. You simply go to the box office, ask for a credit card, then attend when you please and when payday rolls around you pay.

CAUTION NOT PANIC
The increase in infantile paralysis over the nation this summer, has caused near panic in some sections. It is not so here in our community, but yet local parents must use precaution to minimize the danger to their children. There are some cities where the polio increase has become dangerous to warrant the restrictions against children being present in crowds. The polio rate has reached its highest peak this season in spite of attempts to isolate the cause and immunize children against it. They have found that the disease hits an exhausted child rather than a refreshed one. It doesn't seem to be a matter of good health since some of the healthiest of children have been affected.

YOU SAID IT!
We believe our readers will appreciate a revised Gettysburg address reprinted from another newspaper:
One-score and 16 years ago our fathers brought forth upon this nation a new tax, conceived in desperation and dedicated to the proposition that all men are fair game.

Now we are engaged in a great mess of calculations testing whether that taxpayer or any taxpayer so confused and so impoverished can long endure. We are met on Form 1040. We have come to dedicate a large portion of our income to a final resting place with these men who here spend their lives that they may spend our money.

It is altogether anguish and torture that we should do this. But in the legal sense we cannot evade, we cannot cheat, we cannot underestimate this tax. The collectors, clever and sly, who computed here, have gone far beyond our power to add and subtract.

Our creditors will little note nor long remember what we pay here, but the Bureau of Internal Revenue can never forget what we report here: It is for us taxpayers rather to be devoted here to the tax return which the government has thus far so nobly spent. It is rather for us to be dedicated to the great task remaining before us that from these vanished dollars we take increased devotion to the few remaining; that we here highly resolve that next year will not find us in a higher income tax bracket.

That this taxpayer, under-raid, shall figure out more deductions; and that taxation of the people, by the Congress, for the government, shall not cause our solvency to perish.

GETTING YOUNGER
Because they are adopting the western method of computing all ages, every Japanese man, woman and child will become from one to two years younger at the end of this year.

HAPPENINGS —of— LONG AGO

20 Years Ago

The Boro schools will open on September 3rd.

The Florin base ball club will hold a festival Saturday evening, August 24.

A number of Iowa folks motored to Valley Forge Sunday. Application has been made for the sale of natural gas at Ephrata.

EDITOR: Twenty years later application was made to sell it in Mount Joy.

Sunnyburn school held its second annual reunion.

While playing golf at Overbrook, Jos. T. M. Breneman made a hole in one. (Editor: Almost 20 years later Joe's son did likewise.)

Mrs. Jno. Young was removed to the hospital at Lancaster for treatment.

Mrs. Joseph Breneman entertained at a birthday party in honor of Mrs. Harold Shearer of Ida Grove, Iowa.

Someone stole thirty hens in the rear of Arthur Brown's residence that were given to the firemen for their coming festival.

Week's Best Recipe

Frozen Lemon Custard: 1 egg, separated, salt, 1-2 c light corn sirup, 2-3 c evaporated milk, chilled icy cold, 3 T lemon juice, 1-2 t grated lemon rind. Beat egg white until stiff but not dry and fold into yolk mixture. Whip milk very stiff. Fold in lemon juice and rind, then egg mixture lightly but thoroughly. Pour at once into cold freezing trays and freeze at once at the coldest temperature.

Evaporated Milk

Evaporated milk makes desserts of smooth texture and rich creamy flavor. To whip this milk it is necessary for it to be chilled to a temperature of about 40 degrees. This can be done easily by pouring milk into a freezing tray and chilling until fine crystals begin to form around edges. Don't dilute the milk that is to be whipped. And when chilled evaporated milk is easily whipped and as stiff as cream. If it doesn't whip well it is not cold enough.

Sowing Seeds Now

Some have already sown seeds in early August for perennials. Select a partly shaded spot or put cheese cloth over seedbed. Pansies, violets, English daisies, forget-me-nots sown now can be transplanted in September. The other perennials you might start from seed now as carnation, coreopsis, foxglove, delphinium, aquilegia, Canterbury bells, shasta daisy, heliopsis. Mix through top four inches of soil some leaf mold or peat moss to hold the moisture. Give enough water to germinate seeds and for healthy growth. Some people cover the soil with burlap after sowing and keep burlap damp by spraying two or three times a day. Remove burlap as soon as young plants appear through soil.

Inspirational

The break of day lifts the curtain on a new life, a new opportunity to strive and to achieve.

25 LICENSES REVOKED

In the week ending August 5, the bureau of Highway Safety withdrew the cards of 602 drivers. Of this number 26 were revoked and 576 suspended. Operating privileges were restored to 538.

AMERICAN BANKING IN ACTION

WHO GETS THE BIGGEST SLICE OF OUR NATIONAL INCOME?

Salaries and wages for Mr. and Mrs. American Worker represent the lion's share. And from 1939 through 1947, wages and salaries jumped 178%. (Cost of living increased 68%). Under our free enterprise system, the real wage of the worker goes up with his production. America's banks help business meet payrolls with credit, cash and checking accounts. And the workers, by depositing in banks, help build the credit pool that benefits all. It's the American way.
