A Grain Dryer
 (From Page 1)
 industrial type oil burner, with super charger.
 A specially designed fan driven by a 5 h. p. motor draws the heat at 160 to 175 degrees down through the grain to a point about 5 feet from the bottom of the dryer where cold air is circulated thus cooling the dried grain. The entire operation is automatically controlled by scientifically designed controls, thermostats and an electric eye which stops the operation and shuts off the burner and sets off an alarm system if for any reason the dryer is not operating normally or in case of trouble. No damage is ever done to the grain because of the low controlled temperature and every precaution known to modern engineering has been taken to eliminate fire hazards.
 Mr. Stehman states that all the facilities such as receiving weighing, cleaning, conveying and elevation are being installed to handle wet grain at 450 to 500 bushels per hour. Should later conditions warrant it, space is provided to install another dryer beside the present one.
 While the dryer is being installed primarily for drying wheat, it is the intention of Stehman's Flour Mill to dry all free flowing grains.
 Mr. I. D. Stehman states that combined wheat is so much different from the old way of binning and threshing that a dryer has become an indispensable piece of equipment.
 The management invites all farmers and others interested to inspect the dryer during the farm show this week, or at any other time.

News From Florin
 (From page 1)
 Wednesday.
 Mrs. Emma Peifer visited Mr. and Mrs. Abram Engle at Marietta who celebrated their golden wedding anniversary.
 Rev. Gerald Marzoff, Maytown, visited Mr. and Mrs. George Mumper on Thursday.
 Mr. and Mrs. Paul Diffenderfer, Messrs. A. D. Garber and George Mumper spent the week-end at Buck Ridge Camp, Perry Co.
 Mr. and Mrs. B. F. Kaufman, Mr. and Mrs. John Eicher and Katie Foreman spent the weekend at Wellsboro and the Grand Canyon of Penna. and on their return home they visited friends in Orbisonia.
 A surprise drop-in party was held on Saturday evening at the home of Mr. and Mrs. James B. Eschbach. Guests were: Mr. and Mrs. Harry Fox of Pottstown, RD. Mr. and Mrs. Luther Hahn of Pottstown, Mr. and Mrs. David Eschbach of Reading, Mr. and Mrs. Earl Deimler and Mr. and Mrs. Henry Eschbach of Pottstown.
 Mr. and Mrs. George Mumper and Mrs. James Eschbach visited Mrs. Ellen Neigh at Campbelltown on Tuesday.

STORE VEGETABLES
 You can store pumpkins and the squash in a loft, garage or tool shed until freezing weather. Then move them to a warmer place.

Good Clean Pasture
Helps Poultry Men
Home Grown Feeds
Cut Operating Cost
 Good clean pasture and plenty of home grown feeds for your pullets crop pays dividends in more eggs, lower production costs and bigger poultry profits. The use of range shelters, range feeders and barrel waterers makes such a program easily possible.
 Missouri university tests show that pullets on well-fertilized alfalfa pasture consumed 17 per cent less food than birds on bare range. The pasture-fed pullets needed less feed for each pound of gain. Birds on clean pasture were healthier and more energetic. Mortality rate was lower and there were fewer culls. Out of 100 pullets at four weeks of age, 94 of the alfalfa-ranged birds later went into the laying house, compared to 70 of those raised on bare ground. Purdue university tests showed that ladino clover with corn and small grains provided a complete ration for laying flocks.
 Getting good pasture and a cheap and plentiful supply of grain is a matter of putting farm soil in shape for this you need a rotation in which deep-rooted legumes and grasses are keystone. You need to build up the organic matter supply via plowed-under legumes, crop residues and manure. You need to feed the soil a good ration of plant nutrients, so it, in turn, can feed the crops. In such a program, fertilizer is an important member of the soil-building team.
 At current prices, eggs will buy nearly twice as much fertilizer as 20 years ago. It takes only 90 dozen eggs to buy a ton of 3-12-12 fertilizer today, whereas it took 170 dozen back in 1939.

Check Work Stock
 Owners of the 55,000 horses and mules on Maryland farms have been urged to "check intake valves, remove carbon from the cylinders, and adjust the carburetor."
 Those terms aren't as mixed as one might think. Joseph M. Vial, extension animal husbandman, explained that a horse's mouth and teeth may be compared to intake valves on a tractor. The teeth need to be floated (just as the intake valve needs to be properly seated) if they are to meet evenly and let the horse chew his feed properly.
 Just as tractors are troubled with carbon in the cylinders, horses may have trouble with internal parasites. These may be removed by any competent veterinarian and the horse will be a better worker during the coming summer.
 The carburetor on the tractor adjusts fuel supply to the work load. For horses, this is accomplished by getting them in proper condition before the heavy work load comes. Vial recommends this be done by "feeding the horse a handful of oil meal with his grain at this time of year to keep him in good condition and by giving him as many jobs to do as possible; such as spreading manure or hauling logs."
 Other recommendations include: "Keep water in his cooling system. Keep his tires in good condition by having him properly shod and see that his harness fits."
Farm Record Keepers
Told of "Short Cut"
 "It's easier to keep up than to catch up," advises Clara Leopold, extension home management specialist at the University of Nebraska, to the home and farm account record keeper. Another hint, she says, is to keep a pencil attached to the account records.
 According to Mrs. Leopold, a certain time each day should be set aside to jot down the daily transactions.
 Everybody reads newspapers but NOT everybody reads circular advertising left on their door step.

PUBLIC DELUGES
A AND P COMPANY
VOICES DEFENSE
 As letters, telegrams and telephone calls continued to deluge stores and offices of The Great Atlantic and Pacific Tea Co. protesting anti-trust efforts to dissolve the 90 year old food chain released this week a second full page advertisement to 2000 newspapers across the country.
 A flood of endorsements of A and P came from housewives, farmers, manufacturers and labor leaders, according to the new message appearing under the headlines: "Why to they want A and P out of business?" The company reports: "An enormous number of customers are telling our store managers and clerks that they want to continue to enjoy our low prices for quality foods."
 Farmers and other suppliers are asking what they can do to preserve this efficient outlet for their products.
 Our 110,000 employees are asking us to protect their jobs and pensions.
 Labor leaders are wiring us all their opposition to this threat to labor's living standards.
 If all these people will be hurt, why then do the anti-trust lawyers want to put A and P out of business?
 The message quotes these lawyers as saying that A and P Food Stores "have regularly undersold competing retailers and continued: We plead guilty, adding that for the past 50 years, we have constantly stepped up the efficiency of our operations in order to give our customers more and more good food for their money."
 As for allegations that A and P's low prices prevent competitors from doing business, the advertisement pointed out that in the last ten years, 275 rival food chains have grown up and some 30,000 individual grocers have gone into business.
 Moreover, while A and P had 11.6 per cent of the national food market in 1933, it had only 6.4 per cent in 1948, according to figures of the anti-trust lawyers themselves.
 If A and P should be compelled to quit, food prices will go up and the way will be cleared for the destruction of every other efficient and large scale distributor.

Weddings Thruout
 (From page 1)
 Bainbridge with Rev. Wilbur Allison officiating.
Janet McKain
Samuel S. Ney
 Miss Janet McKain, daughter of Mr. and Mrs. Paul McKain, Marietta RD were married Sunday in Eng. Presbyterian Church, Marietta with Rev. John H. Thompson Jr. pastor officiating at the double ring ceremony.
 Miss Peggy Rice, Florin was the honor attendant and the bridesmaids were Miss Hazel Miller, Miss Marian Ney sister of the bridegroom, Miss Evelyn McKain the bride's sister.
 Harold Ney of Maytown, brother

of the bridegroom was best man. Ushers included Donald Ney, Marietta and Kenneth Ney of Philadelphia and Kenneth Ney of Philadelphia, brother of the bridegroom; Warren Mueller, Florin; and Warren Spickler of Mount Joy RD2. Donald Ney Jr. nephew of the bridegroom was ringbearer.
 Following the ceremony a reception was held in Furnace Chapel, East Marietta, after which the couple left on a wedding trip.
 Mrs. Ney is a graduate of East Donegal Twp. High School class of 1949 and is employed by Donegal and Conoy Ins. Co., Marietta. Mr. Ney, graduate of E. Donegal Twp. High School class of 1947 is employed by his father.

WORK IS PROGRESSING FOR THE SOUTHEASTERN BREEDS
 Work is proceeding on new barns and an administrative building for the Southeastern Pa. Artificial Breeding Cooperative to be located on the new Harrisburg pike at the intersection of the Flory's Mill road.
 The artificial breeding group that now has its headquarters in Landisville estimates the cost of its project at \$160,000 with June 5th, 1950 set as a completion date.

RUMMAGE SALE OCTOBER 29
 St. Mary's Guild of Episcopal Church will have a Rummage sale on Saturday, October 29th at the Market House from 10 a. m. to 5 p. m.
QUITE SHORT ON BEEF
 Pennsylvania produces about one and a half per cent of the total live cattle of the country but consumes about seven and a half per cent of all meat produced.

Practical Science + experience = PERFECTION
Oil Burning HOME HEATER

NEW "Multi-Heat" burner (A) balances heat output to actual needs. SAVES FUEL.
NEW midget pilot (B) burns for hours on a cup of oil. SAVES FUEL.
NEW heat extractor (C) between fire-chamber and flue, collects heat that would otherwise go up the chimney.
NEW "Floor-Flo" circulating blower (D) (not just a fan) puts heat where it's needed. SAVES FUEL.

AUTOMATIC CONTROLS, of course. Combined with multiple stages of heat, plus real pilot, they assure most comfort with least oil in cold or mild weather. SAVES FUEL.

Designed and proved in Perfection's own Research Center, most complete in the industry. Backed by Perfection's 60 years' experience in making oil-burning equipment for the home.

Write today for Perfection Heating Booklet.
