Brief News From The Dailies For Quick Reading

In an auto crash on the Lincoln Highway west of Coatesville a man suffered a traumatic amputation of his arm.

Fire destroyed a barn 75x54 on the Amos S. Brandt farm near Campbelltown. All the contents, including 37 head of cattle, farm machinery, etc., were destroyed.

If you happen to be in Lancaster Friday from 11 a.m. to noon, smile

HEALTH HINTS FOR LIVESTOCK

PREPARED BY
AMERICAN FOUNDATION FOR ANIMAL HEALTH

NEEDLE REQUIRES EXPERT HANDLING

Properly used, the vaccinating needle can be a good friend of the livestock producer. For many years this instrument has been saving the lives of countless millions of persons and domestic animals.

But improperly used, the vaccine needle or hypodermic syringe can be a vicious enemy to livestock production. In the hands of untrained or careless persons, it may spread dangerous diseases and actually do more harm than good.

Anaplasmosis, hog cholera, swine erysipelas, swamp fever, malignant edema—all these dread diseases can be spread among farm animals by improper use of the vaccinating equipment.

Very often unskilled persons are not acquainted with contamination risks and livestock may die of infections accidentally transmitted from animal to animal through the medium of contaminated needles. One serious outbreak of anthrax in a southern state, not long ago, was traced directly to improper vaccination by an untrained person who did not know the

necessary precautions. One danger is the "carrier" animal—one that carries disease germs, yet appears to be healthy. A needle pushed through the skin of such an animal, and then used on other stock, can pass disease on to all the rest of the herd and cause serious losses.

It can spread disease as well as prevent it.

There are other risks, too. Are the animals in good enough health to be vaccinated without ill effects? Is the vaccine still potent enough, or has it deteriorated? What is the proper dosage? Professional answers to these questions, and professional skill in the actual vaccination, are the keys to safe and effective use of vaccine to prevent livestock diseases.

at everybody. Members of the optimist club will hand out fifty cent pieces during that hour.

At Lancaster a 20-month-old child swallowed several ounces of

lighter fluid.

Everybody reads newspapers but NOT everybody reads circular advertising left on their door step.

A checking account gives you a running report on just how you stand—both as to income and outgo. It's the simplest method there is of personal bookkeeping. Why not stop in and see how handy a special checking account is?

HOME REPAIR SUPPLIES TO Shut out Cold Weather

For greater comfort this winter, and for thrifty fuel savings too, here are supplies to seal out the cold, and to heat more efficiently inside... priced at a saving.

Asbestos Cement
A pure asbestos fibre cement in powder form. Just add water to use. Works like putty.

Felt Weatherstrip
Hair felt strip that is easily tacked on door and window frames to seal out cold.

STOVEBOARDS
Decorated tin plate metal over non-warping wood base. Protect your floors and rugs from heat.

H. S. NEWCOMER & SON, Inc. Mt. Joy

GIVE IT A TRY BEFORE YOU BUY!

Try a team that's a driver's dream! Try the "Rocket" Engine plus Hydra-Matic Drive—and you'll know it's Oldsmobile for you! Right from the start, the "Rocket" whispers the smoothest song of power you've ever heard! As you touch your toe to the gas pedal—Oldsmobile's Hydra-Matic transforms the "Rocket's" response into a velvet tide of flowing motion! And after that moment, each smooth, silent mile is a new adventure—an exciting experience you'll never forget! Best of all, the "Rocket" works with Hydra-Matic to give you really impressive gasoline savings! But thousands of words can't match one minute driving the Futuramic "88"—lowest-priced "Rocket" Hydra-Matic car. So phone your Oldsmobile dealer. Try the most famous engine-transmission team ever built. Then put your new car money on OLDSMOBILE!

Make a Date "88"

Fruit of Cashew
Cashew nut, so popular in this country, is actually the poisonous fruit of the cashew tree of Brazil and Central America, says The World Book encyclopedia. The tree is closely related to the American poison ivy and people are often painfully poisoned by allowing their skin to come in contact with some of its parts. This toxic ingredient is entirely removed from the kernels by roasting before they are shipped to this country.

One-inch Steaks
If dad prefers his steak rare, it will take from 15 to 20 minutes cooking time for one-inch steaks. Medium done steaks require from 20 to 25 minutes. Thicker—two-inch steaks cook in 35 to 40 minutes for rare and around 45 minutes for medium-done.

First Invention at 11
Now lost in obscurity, but well known in his day, was Tom Blanchard, who at 14 conceived a handy apple parer that peeled the fruit twice as fast as could be done by hand. Four years later he developed a machine that turned out 500 tacks a minute.

Cross-Eyes
A cross-eyed condition is not always easily recognized. If neglected, it may cause loss of vision in the out-of-line eye. For this eye is likely to be used less and less until, in many cases, it becomes blind. Then it may resume its normal position.

Logging Operations
Our forest lands today often seem more productive than in the past because of the closer logging utilization made possible by re-logging, yields from thinning, salvage of fire-killed trees, and pre-logging.

Bright Garnish
A clever garnish for pork chop platter: Cut a cucumber into one-half inch slices. Again cut each slice, but not quite through, then slip a thin slice of red radish into the cucumber.

Foot Ventilation
Reason doctors urge removing rubbers and galoshes indoors is that leather soles on shoes cannot ventilate feet properly if hampered by impermeable foot coverings.

Poult Standards
Ten years ago we accepted three-pound chickens at 12 weeks of age with 12 pounds of feed as good performance. Today, four pounds at 12 pounds of feed is standard for many poultry growers.

When Clothing Shrinks
When clothing shrinks in cleaning, the most hopeful first aid is to apply tension to the set or damp material while pressing it.

Pasture Spraying
Use of recommended amounts of 2, 4-D for spraying pastures to kill weeds is reported to be harmless to livestock grazing such pastures.

Garden Sprays
In mixing garden sprays, be accurate in weighing and measuring ingredients—too much may do as much harm as not enough.

Garden Insects
Spray or dust for insects in your garden before damage is done, but not unless you know it is necessary.

Monument to Gulls
Mormons raised a monument at Salt Lake City to the gulls which came in answer to their prayers for an end to a grasshopper scourge.

Overworked Sheets
It is poor economy to have too few sheets and overwork them. Four sheets per bed will allow better rotation and increase the life span of the sheets.

Electric Motor
The electric motor, now the chief motivating force of rolling mills, was developed from the dynamo in 1873.

Speedway Course
Largest automobile racing course in the world is in Indianapolis, the 500-mile Speedway course which is a 2½ mile track.

Bloat in Cattle
Cases of bloat are likely to occur in a herd of hungry cattle placed on damp legume pasture.

Badly Needed
Safety and conservation have still to find a widely recognized place among our school studies.

Drownings
Half the drownings each year take place in only three months—June, July and August.

First Oil Well
The first oil well, at Titusville, Pa., in 1859, was known as "Drake's Folly."

Illinois Cotton
Nearly \$500,000 worth of cotton is grown in the state of Illinois each year.

Easter Bunny
Easter rabbit is a survivor of an ancient Egyptian custom.

There is no better way to boost your business than by local newspaper advertising.
