Jarm Jopies Lift-Type Device Used on Tractor Will Aid Materially

In Easing Farm Chores To help with those odd chores about the farm that so often are time-wasting and back-breaking. Pittsburgh forgings company of Coraopolis, Pa., has developed a lift-type utility carrier for use on tractors.

The Pittsburgh carry-lift is attached in a few seconds to tractors through the regular implement suspension points. Made of alloy spring steel and structural steel, it will handle loads as heavy as 700 pounds. An important feature of this new unit is its quick conversion from a platform lift to a fork lift, making it universal in the types of loads it can both lift and carry. It can be used as a platform lift either with or without a back panel, and pock-

The farm carry-lift is attached in seconds through the regular tractor implement suspension points. Heavy containers can be tipped and rolled onto the platform without lifting. The tractor engine raises the carry-lift.

ets are provided for standard 2" x 4" stakes. The frame is punched to provide easy securing of loads and for the addition of a wooden plat-

Used as a fork lift, the utility carrier works like a small hay buck, and thus can pick up bulky material witout the lift having to be loaded by hand. Heavier loads can be handled in this way by using skid-pallets. Its capacity for light, bulky loads can be extended materially by putting 2" x 4" fork extensions into the brackets pro-

vided. Lifting of heavy containers like milk cans, drums and barrels is eliminated by the carry-lift because these can be tipped and rolled onto the platform which practically rests on the ground. Small buildings, range shelters, and feeders can be easily and quickly moved by tipping slightly and running the forks beneath them. Heavy bags of seed grain can be taken to the field with a minimum of lifting, and field feeding is made both quicker

The carry-lift will be found particularly useful because material 12. BRUNNER, LILLIAN S., dec'd, DWELLING HOUSE And can be moved over any kind of ground, under any condition where a tractor can operate and in places that might be inaccessible by other means of transportation.

Popular Belting

A victim of the war, the first red rubber agricultural belting has been made available to farmers by a Pennsylvania manufacturer. Available since 1940 only as a higher-priced industrial belting, the red rubber belting was a pre-war favorite with America's farmers. This farmer's smile as he gets his first roll indicates a big welcome on its return to the farm market. This belting is particularly popular because of its added flexibility and toughness.

Value of Bicarbonate Use In Swine Feeding Tested

An experimental feeding program to determine the value of bicarbonate of soda in the feeding of hogs is being conducted this fall at 23. ESHLEMAN, ROMA H., dec'd, 53. Iowa State college.

Experiments will be aimed at determining whether the feeding of bicarbonate of soda produces ob- 24. servable benefits in the growth of swine and whether the ingestion of amounts equal to 1 per cent of the 25. FEIST, MARY, dec'd, No. 87, ration will produce results.

There is no better way to boost your business than by local newspaper advertising.
