Well Managed Hogs are Profitable to Raise

These 10 brood sows at the Purina Research Farm at Gray Summit, Mo., produced 179 hogs which weighed 234.8 pounds at 6 months, on the average. Based on current market prices for pork, as compared to corn and feed costs, these sows grossed a profit of approximately 48% on their litters, or approximately \$12.80 per hog. According to the records kept on the experiment, good management is largely responsible for the margin of profit for the hog raiser.

Hog profits can be increased with good management practices, recent experiments at the Purina Research Farm at Gray Summit, Mo., have indicated. According to E. B. Powell, Director of Research for the Ralston Purina Company, a profit of approximately \$12.80 a hog was made, based on the records of 10 sows and their litter which were placed on the experiment. The 10 sows produced 179 pigs which average 234.8 pounds at 6 months, totaled 42,025 pounds of pork. Based on the average market price of hogs in mid-winter, these hogs would have sold for slightly more than \$7,000. The records, accurately kept during the experiment, show the 179 hogs, the 10 sows, which are on a 2 litter-per-year program, and the boar, consumed more than 2,599 bushels of corn valued at \$3,576, and less than \$1,200 worth of Soy and Pig Chow, D & F Chow and Hog Chow. From breeding the sows to weaning the litters, corn, Soy and Pig Chow and D & F Chow were fed, while Hog Chow and corn was the ration from weaning to marketing.

Police radio acts staged at Williamson Field of Franklin and Marshall College. The Mount Joy High School Band and the Mount Joy Safety Patrol will be shown in the parade film.

Queen of the hog world, Ringold Lady Dora, first and only sow to raise nine litters to qualify for breed production registry honors is shown accompanied by latest litter which weighed 369 pounds at the 56-day weaning date.

by Meadowlark Farms, Inc. of Sullivan, Indiana, has repeated that performance nine times. Her first qualifying litter was farrowed September 6, 1944. Since then she has farrowed and raised spring and fall litters without a single interruption, and has raised an average of 9.5 pigs per litter. She has farrowed a total of 129 pigs and has raised 105 of them herself. Her ninth star litter, farrowed this past fall, consisted of 10 pigs, nine of them eligible for registration. They had a litter weight of 369 pounds at the 56-day weaning age.

During that period her breeding and feeding was watched carefully. She was fed a ration consisting of corn, oats, a pelleted dairy product, some neat scrap or tankage, a little bran, and alfalfa pasture or alfalfa meal prior to each farrowing.

Mr. Hoffman is a son of the late Mr. and Mrs. Michael M. Hoffman, Maytown, and at present resides with his eighty-five-year-old brother, William.

The brothers are cousins to another Hoffman family in Maytown of which Michael is ninety-three, Abram, eighty-four, and Norman eighty-two.
