EDITORIAL

A London newspaper says that Russia's Joe Stalin is a semi-invaluable. He has a much more appropriate title than that for him but it would not look well in print.

You may think you know yourself but you would be surprised at the number of different opinions others have of you.

You may speak of the horrors or vicissitudes of war, but we still think Sherman expressed it best with "War is Hell."

Have you ever noticed that a friendly divorce seems to make it much easier for both parties to marry again.

EVERYBODY PAYS TAXES

The man who thinks that he pays no taxes because he owns no property and his income is under the taxable earnings of the income tax does buy shoes. And he does buy clothing on which there is a six-cent tax for every dollar he spends for a suit. If the man rents he may think that the \$40 he pays in rent is not taxes, but if his landlord were not so heavily taxed that man might be getting his rent for \$25 or \$30. Directly or indirectly there is absolutely no one who does not pay taxes.

The Agriculture Department has announced that its producer price support program for eggs will end December 31 of this year. Radio news commentators have already predicted that by next spring the price of hen's fruit will hit a new low.

The Government has long since learned that price support programs always result in gravy for the producer and real hardships for the tax payers.

Take eggs, wheat, corn, cotton, potatoes, etc. and it is unnecessary to tell our readers what has happened.

The sooner the authorities realize that it is utterly impossible to regulate commodity prices, the better it will be for both producer and consumer.

There is but one way—Supply And Demand.

LATE IN NOVEMBER

Soon comes the twelfth month, the gray days of December, but while November is with us let us revel in the colorful sunsets she offers and consider the painted canvas called sky. Watch the first snow flurries and frost-white vanish under the November sun. Before the onslaught of winter's main forces settle on us, look to the shadow of the few remaining leaves, study the silhouette of naked branches. The slight film of ice that you gently shatter in your hands is a delicate covering for now and will soon go with the warmth of the sun. Ice will soon become weighty and arrogant in taking over. A white cover lines the streets, covers roof and field but its white accents do not last long but make intricate designs before it melts. There is beauty in every month if we but recognize the vagaries and varieties of weather's wonders.

THE FOOD OUTLOOK

The nation's superb food production rules out any need at this time for a system of food controls. Industry and government working together with the support of farmers and consumers, can take steps which may avert the need for controls. Certainly we can ease the necessity and fight a delaying action against the inflationary forces which are likely to make food the pressure point in our economy. It is our job to see to it that we are strong enough at this point to absorb the pressure of increasing demand when more purchasing

power moves into the food market.

The best informed judgment at our command forecasts an upward trend in over-all food prices. But the rise will be held to moderate size by the ample supplies of food on hand and by the equally real fact that meat prices are going down. It is worth noting that the price spurt which came on the heels of the Korean outbreak occurred at the year's low in livestock slaughter and during the normal decline in the nation's meat stocks. The turnabout is the result of heavy cattle and hog marketings.

THE WASTE GOES ON

Fire prevention is important at any time. It is especially important in a time of emergency, such as the present, when there is a heavy demand for manpower and materials of all kinds, and when waste is a serious drain on the energies of the nation.

The organized war against fire has increased in intensity. The experts are doing all they can to reduce the toll. But, unfortunately, the waste is continuing at a high and disgraceful rate. In the 12 months which ended September 30, for example, direct fire loss was more than \$685,000,000—an increase of about two per cent over the preceding 12 months. This can only be a reflection of the public's failure to learn and apply the simple rules of fire prevention.

One tragedy of fire is that prevention, with few exceptions is easy. It is estimated that less than 10 per cent of our fires are truly unavoidable. All the rest are caused by human failure of one kind or another. And the most common failures are plain carelessness and indifference.

The individual's principal fire prevention job lies in his home. Most home fires arise from the simplest of causes. Carelessness with smoking materials—improper storage of paints and solvents and other flammables—accumulations of old clothes, paper and trash—defective heating and electrical equipment—these are fire's most potent allies. Yet all of them can be easily and inexpensively eliminated. Prevent fire—in your own interest, and in the interest of your country.

The Bulletin's Scrapbook!

Week's Best Recipe:

Sweet Potatoes and Cranberries: 6 large sweet potatoes, 1 1/2 c cranberries equal in sauce, 3 T butter or margarine, 3/4 c br-wn sugar, 1 t salt, 1/2 c finely chopped nuts. Boil potatoes in jackets until tender; peel, cut in halves lengthwise; scoop out halves slightly. Place 6 halves in greased baking dish, fill centers with cranberry sauce, dot each with butter or margarine, sprinkle with salt, add sugar lightly and finely top with chopped nuts. Put in moderate oven and heat through.

For Bright Silver:

Cellophane is used for so many purposes. It is excellent to keep silver from tarnishing. After cleaning the silver, wrap it immediately in the cellophane until ready for use the next time. This method is especially nice for large silver platters and silver service, urns and bowls, which are not used frequently.

"Hoots!":

"Hoots!": Pennsylvania Dutch for egg bread and is an excellent dish. Take 1/2 loaf of day-old bread, cut it into cubes. Brown cubes in 1/2 c butter, in hot pan. Beat 3 eggs until light, add 1/2 c milk, salt and pepper to taste. Pour over bread cubes and fry until brown. Serve at once, as hot as possible.

A Natural Error:

Typographical errors can be delightful mistakes, though headaches to the poor editor. Some time ago this appeared in the St. Louis Globe Democrat: "The physician felt the patient's pulse and decided there was no hope." Then from the Little Rock Gazette came this: Dr. P--- returned from Baltimore yesterday and will take up his duties at the hospital.

POISON ORCHARD MICE

If you have not put out bait stations for poisoning orchard mice, do not delay. These stations, made with cornstarch, should be placed long enough before the poison is placed so that the mice will find them and feel right at home there.

INSURANCE BENEFIT WILL NOW BE PAID TO WIDOW

Under the new Social Security law, the title "Widow's Current Insurance benefits" is changed to "Mothers' Insurance Benefits." This means more than a change of title. While, as before, insurance benefit payments will be made to a widow with a child in her care, provision is now made for payment of such benefits to a divorced wife of a deceased insured worker. It is now possible for a widow, and one or more divorced wives of a deceased insured worker to be entitled at the same time to insurance benefit payments based on his social security wage record.

In order to qualify as a former wife, as far as social security is concerned, the divorcee must be the natural mother of his son or daughter, or have legally adopted the insured worker's son or daughter while she was married to him, or have been married to him at the time both of them adopted a child. In either case, the child must have been under 18 at the time of adoption.

In the case of a divorced wife, the old requirement of "living with" him at the time of his death, is changed to "receiving at least half of her support from him at the time of his death."

face, with insufficient addresses and names. In order to try and deliver them, if they are unsealed, they are opened and many times inside the only name is Jack or Mary or Aunt Sue, which is no clue. The result is that these cards are not delivered and eventually they are destroyed.

One thing that will be a great help during this time is to refrain from coming in the office and asking for your mail or parcel post. To look for mail is almost an impossibility in itself and on the other hand all personnel are so busy that they cannot take the time off to look for mail.

By following a few simple rules like those above, and by taking your time when addressing your letters, so that the addresses, name and address is correct, also to be sure the correct postage is on each letter or card, you will not only help us in the office, but you will help greatly to get that card or package on its way, so that it will arrive at its destination on time.

Your cooperation will be greatly appreciated, and you can rest assured that we here in the Mt. Joy Post Office will do all in our power to give you the best service.

Anyone wishing to assist during Christmas rush, please contact Postmaster at once.
