Washington the steadfast

On February 22nd, we honor George Washington who, despite inferior forces, jealousy and intrigue on his staff, and an insolvent Congress, stood steadfast against the finest troops of the enemy for six hard years and won the final victory. The stature and greatness of the Father of our Country will always be an inspiration in America.

No business will be transacted by this bank on Washington's birthday.

What's its Power?

FIREBALL!
 (Only Buick can make this statement)

BEND an ear to the deep baritone song of this marvel motor, and you'll know we aren't fooling when we call it Fireball.

What happens beneath that brawny Buick bonnet happens in no other car in the world.

Years ahead of the rush to high-compression valve-in-head engines, Buick was in there pitching for more power from every drop of fuel.

The result: a spectacular engineering phenomenon you feel the instant you touch toe to gas treadle. A rapid-fire sequence of tiny tornados, let loose their pent-up power every five inches a Buick travels.

If you could look inside that Fireball engine, you'd see why. Instead of the flat-topped pistons used in other cars, Buick uses a turbo-top piston, like this:

So the intruding fuel whirlwinds into a compressed ball that adds a super-urge to the downstroke of the piston.

And you get the thrill—and thrift—of this Buick "first" in every mile you drive.

More, you get a tried-and-true engine that's

been polished and perfected in every detail up through the years.

Again and again, compression ratios have been stepped up to keep pace with advances in fuels. Self-setting valve lifters contribute to silence. Micropoise balance and Hi-Poised engine mountings add two more Buick exclusives.

And the silken might of this Fireball's power has been made more beautifully obedient by still another "first"—Dynaflow Drive.*

So we list as a prime reason why "smart buy's Buick" this Fireball power plant—and a host of happy owners will say "Amen."
