AXLES RIPPED OFF TRUCKS WHEN THEY COLLIDED
Axles were ripped off two large trucks about 1:00 a. m. this morning when they collided near Ney's Texaco Station at Florin.

The accident occurred when the driver of one of Carr's Milk tank trucks from Frazier, fell asleep while driving west. The other truck going east belonged to Shirk Motor Express at Lancaster.

The front wheels and axle were completely torn off the tank truck as was the axle of the other truck. No one was injured.

State Police investigated.

OLD BRIDGES MUST GO
State-owned covered bridges in Lancaster County—there are about 21—will be replaced by more modern spans, a spokesman for the State Department of Highways says.

Hornflies
Hornflies are controlled nearly as well with sprays containing toxaphene as those containing DDT. When used as a 0.5 per cent spray at the rate of about two quarts per mature cow, the period of protection afforded by toxaphene is about three weeks.

Tick Control
Ticks of nearly all important species can be controlled with toxaphene sprays. These parasites are among the most difficult to control of all livestock pests. Toxaphene will protect animals from reinfestation by ticks for two to three weeks or longer.

Good for Plaster
Plaster walls will not crack when nails and picture hooks are driven into them—if the plaster has been made with vermiculite. The mineral, which expands popcorn-like during processing to fifteen times its volume, gives to the plaster a resiliency which enables it to withstand the strain.
