EDITORIAL

Many unions—more than the public realizes—have successfully worked out their differences with employers for years on end without resorting to walkouts.

It is gratifying to know that Congress is discussing plans to cut tax levies... but it would be more to the point if Congress would take prompt action to cut unessential Federal expenses.

The American people can stop inflation in thirty days—simply by insisting that government spending be held down to the amount which can be supplied by American productivity without wage or price increases.

Along comes a complaint of a housing shortage at Indiantown Gap, naturally, that is the case wherever the Government places thousands of enlisted men. They are not all single who are in the service. With no town in very close proximity, the housing situation has become quite a problem.

A lady resident of New York explained to the writer on one occasion; here in New York, when we get the rent and the taxes paid we act! Isn't it about time that our lawmakers say to themselves the methods employed by private citizens who live within their incomes should be applied to government spending.

The deer season for the bow and arrow guys opened Monday and closes Saturday, October 27. Well, that's one pastime we never indulged in but if the State Game Commission ever decides to have an open deer season for slingshotters we'll be among them. Until then we will continue with the 257 Roberts.

Governor Fine signed legislation granting down-the-line pay increases for elected county officials. It is estimated the increase will cost Lancaster county an additional \$12,000 increase a year.

Lancaster County can well afford the increase but in some of the counties thruout the state it may pinch a bit.

We want to commend every individual who in any way assisted in making Mount Joy's Farm Show the big success it turned out to be. It is too early to know how the management fared financially but if there isn't a neat balance or nest egg for next year's fair it isn't their fault. They deserve a lot of credit.

Then, too, we can't help but call attention to Saturday's parade. It was indeed very appropriate and displayed Farm Show spirit from end to end.

Future increases in living costs will be due altogether to the increased taxes levied by Congress. The way to get living costs and taxes down is for Congress to insist that public spending hereafter be at levels that our economy can afford. These responsible may talk till they're blue in the face but the fact remains that the last two Congresses have been the most wasteful and extravagant in the history of the Republic and it is reflected in the steady decline in the dollar's buying power.

HOW TIMES DO CHANGE
There is an old but true saying and here's conclusive evidence. There was a time when the State had the power to condemn and take any property for highways, schools etc. but things are certainly changing.

According to the report of a meeting at State College last week,

An Authority can be formed in a City, Boro or Municipality, it can condemn any building or property for the location of a parking lot and last but not least it can float a bond issue to finance the project.

There is mighty little that a man can call his own nowadays.

Along comes more news concerning the location of that additional air base in this county with a request that it be located somewhere in the center of the county, away from the river hills.

Naturally we are aware that the authorities can put that base wherever they please, be it in the square at Lancaster City, or anywhere else but it would be well to consider both sides before they decide on a location.

Should the authorities place it on some of the level and productive acreage throughout many sections, it would be a "slap in the face" for many of our best farmers and their friends. This, in our estimation, would be a gross error.

Why not compromise on a location: It would be far better at a time like this. There is opposition aplenty to the many moves our government has made recently and we sincerely hope nothing additional is added thereto. They should consider every angle before deciding on a location.
