Low Cost Weatherproof Window Materials Protect Homes from Drafts and Winter Cold

NOW homemakers can solve the problem of keeping wintry cold and chilling drafts from "hitchhiking" in through unprotected windows and doors.

An easy, low cost way to winterproof your home and insure cozy warmth even on the rawest days, is accomplished by the use of transparent, shatterproof window materials that do wonders in keeping out the cold.

Cut to Size With Shears.

Much cheaper than glass, these reinforced, flexible materials are available in convenient rolls at any local hardware or lumber dealer. They are easy and safe to put on, require no special tools or skill. You don't need a glass cutter or putty knife and there is no accident hazard from jagged glass edges. A pair of shears, a hammer and some tacks will do. The materials will quickly pay for themselves in savings on fuel bills. Windows can be winterproofed for as low as \$1.25; doors for \$1.50.

All you do is cut the window material to size with shears and tack it on over screens. This eliminates the bother of removing screens, protects them during the winter and turns a windswept porch or breezeway into a warm, sunlit,

extra room—a fine place for children to play or for the family to use as extra storage space.

The window material should be held in place by screen moulding strips securely tacked around the

Easy to Tack On.

edges of the frames. Properly put on, the material stays tight, has a trim, neat appearance and lasts much longer. When spring comes, just remove the window material, roll it up and put it away for use next season.

A recent survey of porch enclosures in the Middle West, according to Harold Warp, leading manufacturer of window materials, showed that 53.6 per cent of the open porches, both in town and on farms, could easily be enclosed for winter protection.

HAPPY HOLIDAYS

Most of Christmas happiness is through the gifts to family and friends. So that you can enjoy your Christmas, be prepared by joining our Christmas Club. There's a club to fit your budget. Be sure to come in soon!

Jewelry Thieves

(From page 1)
Jewelry Store, 1 N. Third street, Harrisburg, on Dec. 21. Six of the rings stolen at Harrisburg, were found with the loot from the Mt. Joy robbery at Frazer's home, the police disclosed.

Abrams said the thieves hurred a shuffleboard quoit through the store window at Harrisburg and then scooped up merchandise on display in the window. The trio used the same tactics in robbing the Adam Greer Jewelry Store here early last Thursday morning, an account of which appeared in last week's Bulletin.

What They Stole Here.
Police listed the stolen articles as four watches, two cigaret lighters, in a master's case, a lady's pearl ring set with diamonds, and electric shaver and a tray containing eleven men's rings. The stolen merchandise was recovered from a bedroom safe at Frazer's home, police said.

Trench, Pit Silos Advantages Listed

Biggest Disadvantage Amount of Food Spoiled

In this year of near record crop and cattle production, farmers in many areas will need a larger amount of silage. Many of them do not have adequate silos.

These farmers may make profitable use of trench or pit silos, which have a number of advantages, but at the same time a number of disadvantages.

The trench silo (above) may be the answer to the farm's storage problem in time of high production, but it can also be a source of trouble if carelessly filled and maintained.

However, one great disadvantage stands out. A great amount of feed can be spoiled if carelessly filled, compacted or covered.

But due to construction costs, a trench silo is a major project on most farms these days. Many farmers might find it profitable, therefore, to investigate the construction and maintenance of a trench or pit silo.

The local county agent, no doubt, can supply complete instruction. And they should be investigated thoroughly before any farmer undertakes to build one.

Forest Sites for Summer Homes Are Available
Many vacationists who visit the national forests make the wish that they might have a summer home in the forest. Many are not aware that the wish might come true. The possibility is worth investigating. More than 16,000 families already have such summer homes, and in many forests there is room for others who want what the forest service has to offer. The services recognizes summer home opportunities as one of the "multiple uses" for the national forests and provides sites for approved buildings.

This may surprise many who have motored through national forests without ever noticing a colony of summer homes. That, in fact, is one of the features of the policy on summer home sites. Permits for summer home building are not now issued for areas within sight of highways or on lake shores, along fishing streams, or near scenic attractions. Such areas are preserved for general use of the public which, of course has first priority.

Champion Broilerman
Charles Vantress, Live Oak, Calif., holds one of the California Cornish-New Hampshire cross chickens which won him title of champion meat chicken breeder and \$5,000 award in the Chicken-of-Tomorrow contest. Vantress, who operates a breeding farm with 100,000 hens, has sold his eggs and stock to poultrymen all over the country.

Farm Scrap Iron Is Needed for Defense
The steel industry is asking for more scrap iron to keep its furnaces running full blast. Old worn out and broken machinery, no longer usable on the farm should be sold as scrap and once more put into use in the defense program.
A scrap clean-up program not only helps our defense preparations, but it also cleans up possible accident hazards. Scrap iron produces ready cash.

Buy on these Plain Hard Facts
See for yourself how a Chevrolet truck can cut your costs in every way

RUGGED as they come!

FACT No. 1—Costs Less to Buy
FACT No. 2—Saves Money on the Job
FACT No. 3—Right Truck for Every Load
FACT No. 4—Keeps Its Value Longer

AMERICA'S truck users buy on down-to-earth facts, not fancy phrases.
That's why more of them buy Chevrolet trucks than any other make . . . nearly as many as the next two makes combined!
What they get for their money is a rugged, sturdy, dependable truck that's factory-matched to their jobs and payloads—right power, right capacity, right price—with savings in purchase over other trucks of comparable specifications, and a record of savings on the job that can't be topped.
Come in and let's get down to cases on how a Chevrolet truck can cut your hauling or delivery costs. You can't make a better buy—to save your money!
