EDITORIAL

It sounds queer to hear that the Tennessee Valley Authority has let a contract amounting to \$1,257,120 for coal for its power plants. What has become of the wonderful water power we once heard so much about?

"Government in the United States today is writing industry-union contracts. In Russia, government does that, too. There is a difference, of course, in the way the two governments go about it. But the principle is the same. This is a dangerous situation. For government has abandoned its traditional and proper role of impartial empire and has undertaken the job of bargaining."

SAME OLD STORY
When one attempts to build a house, make a repair job or any thing of that sort, the completed job invariably runs one fourth to a third above the estimated cost.

It is well to bear this in mind at any and all times. Here is another illustration. The borough of Lititz voted a bond issue of \$1,800,000 to install a sewage system. Now it must float an additional bond issue of \$140,000 to complete it.

Quite recently the Pennsylvania Fish Commission decided to net shad in the Bay and transport them above each of the three enormous dams in the Susquehanna river in an effort to revive shad fishing once so popular and profitable.

Each shad "planted" was tagged with a request, plus a fifty cent premium to fishermen to report catches. In that manner only would the Commission be able to learn the result of its efforts.

As conclusive evidence that all fish are not usual "poor fish" so frequently referred to, within several days after its truck trip to the lake above Conowingo Dam; Mr. White Shad was hooked by a fisherman at Perry Point, Md. That tagged shad found its way back into the mouth of the Bay within a few days, but just how it got past that hydro-electric dam or thru those turbines will in all likelihood remain a mystery.

FREEDOM AND PLENTY GO TOGETHER

The American oil industry is 93 years old and for the latter third of that time pessimists have been predicting that our oil supply could last only a few years at the most. In 1925 it was estimated that this country had only 8,500,000,000 barrels of proven recoverable reserves left. Since then we have produced nearly 35,000,000,000 barrels of crude and still have 32,000,000,000 barrels of proved reserves underground. That's nearly nine times as much oil as was thought to exist in the country just 27 years ago. The oil we don't yet know about will keep us running many decades after the most recently estimated time of exhaustion has been passed and forgotten.

Research and technology the keys which will release as yet unreamed supplies of liquid fuel. Every phase of the oil business from well surveying and drilling to refining methods and the making of liquid fuels from other sources is constantly being improved through the adoption of new techniques, tools and materials. A recently developed process makes possible the commercial production of oil trapped in solid rock. This single development has added over 1,000,000,000 barrels to our proven reserves of recoverable oil.

Just as long as there remains a reasonable chance to make a fair profit men will take the risks involved in developing new sources of oil and new and better oil products. Only if centralized political

control is allowed to stifle incentive need we ever fear a shortage of liquid fuels.

CONTROLS WORSE THAN DROUGHT

The worst drought in its 99 years of history is being suffered by the fabulous King Ranch, which is the largest single beef-producing operation in the United States and perhaps the entire world. Its cattle population has been reduced from 85,000 to around 60,000 because of a dry spell which is now in its 3rd year. In the last year alone the ranch owners have spent \$1,000,000 on emergency measures.

Yet, bad as such a drought is, said Robert J. Kleberg, the ranch's president, government price controls are even worse when it comes to reducing the nation's meat supplies. And controls, he added, fall on the small producers and feeders, on whom we depend for most of our meat.

Mr. Kleberg cited Argentina as an example of the disruption controls cause. That country historically has had beef in vast quantities. Yet a short time ago the Peron government imposed two meatless days a week—a measure made necessary because controls that were first imposed in 1926 and have been made tougher since have materially cut beef production. As Mr. Kleberg said, "The imposition of all sorts of artificial controls disturb the cycle planning and confidence of the producer," and, as an inevitable result, production sags.

Only in the free market is the producer assured of a price which will honestly reflect the economic conditions of the moment, whether that price be high or low. Only in the free market can the law of supply and demand—the natural law which governs all sound economic activity—function to the benefit of producer and consumer alike. And only in the free market can we have continued abundance.

School And Home

HAPPENINGS —of— LONG AGO

20 Years Ago

May 18, 1932

The Annual Class Day exercises were held at Maytown High School and there are nineteen in the graduating class.

The Hill Kid and his boy friend from the South Mountain gave a free open air concert at the Ira Newcomer Service Station on East Main St.

Mrs. Lester Roberts entertained the Young Ladies' Bible Class of the Lutheran Church at her home on Marietta Street.

The local ice plant will start a system of day and night shifts.

Mr. Carl Droran moved his family from Rheems to the house vacated by Clayton Stauffer.

John L. Schroll, Chief Hose Director of Friendship Fire Co., tendered his resignation to take effect at once.

A very large and fine exhibition of Art was held on the first floor of the Grade School in charge of Miss Esther High art supervisor.

Mr. H. N. Nissly, cashier of the Union National Bank, suffered injury to his left arm in a fall and requires the use of a sling.

The annual banquet of the Mount Joy Rotary Club was held in the local High School with Prof. Gaige, of Millersville as speaker.

Mr. and Mrs. Roy Ament and family gave a wedding reception at their home in honor of Mr. and Mrs. Clyde Lutz, Strasburg.

The five winners in the Bottle Cap Contest, conducted by C. M. Cooley were Robert Germer, Elwood Zink, Harry Yost, Jr., Ida Sprout and Jeannette Potter.

Mortuary Record

ville, and the Ladies' Bible class of the Sunday School. There survive three children: Harriet, wife of Adam I. Dundore, Lancaster; Henry F., at home; and Mrs. Josephine D. Houghton, Lancaster; also three grandchildren and two sisters, Minnie, wife of Dr. E. W. Newcomer, this borough; and Mrs. Martha Nissley, Cedar Crest College, Allentown.

Mrs. Harry Newcomer
Mrs. Ella W. Newcomer, 70, wife of Harry S. Newcomer, 7 S. River St., Maytown, died at 4:30 p. m. on Wednesday at the Lancaster General Hospital where she had been a patient for four days. Born in Conestoga Twp., she was a daughter of the late Aldus and Amanda Benedict Warfel and was a member of the Maytown Evangelical and Reformed Church. She was a former teacher in the Conestoga Center school and last April 23 she and her husband celebrated their 50th wedding anniversary. In addition to her husband, she is survived by a grandson and these brothers and sisters: John B. Warfel and Mrs. Carrie Pahl, both of Lancaster; Mrs. Anna Siefert, Maytown; and Aldus R. Warfel, York.

Funeral services Sunday afternoon with interment in the Union cemetery at Maytown.

Barnhart, Mrs. Jay Miley, Mrs. Paul Anderson, Mrs. Dorothy Beamender, Oliver Mateer, Henry Schneider, Mrs. C. J. Chunko, Mrs. George Lane, J. Freeman Naugle, Mrs. J. Freeman Naugle and Mrs. Rose Ramsey.

THE FARM QUESTION BOX

By DILL GIVENS, KYW Farm Director

From—Mr. W. E. B. R. D. May, Elverson, Pa.
Q.—We have noticed that one of our cows likes to chew on gravel whenever we get near her rather than nibble on hay. Do you have any idea what causes this?

Ans.—When a cow prefers to chew on gravel or other foreign material rather than nibble on hay, it may be a sign that she is lacking phosphorus in her diet. Veterinarians explain that phosphorus deficiency should also be suspected if she chews on stones, wood or rubbish. In fact, whenever cattle show a liking for anything indigestible, it's a good idea to check up on the phosphorus intake of the herd. If this deficiency is discovered, a phosphorus supplement should be included in the ration. Otherwise, the cows may develop lameness, become poor producers, bear fewer calves, and just become general unthrifts. I would turn this problem over to a veterinarian.

From—Mrs. D. C. S., Prospect Park, Pa.
Q.—I have found some vegetable seeds left from last year. Are they still good?

Ans.—Vegetable seed left over from one year to another should be tested for germination before planting. Most vegetable seeds are good for three to five years, provided they are stored in a uniform, cool temperature where the humidity is low. But there are exceptions, such as onions and parsley. The most practical way to test the germination of the seed is to sow it directly into a prepared flat of soil keeping the temperature at about 75 degrees and the soil moist. Another way of testing seed is to place it between dampened blotting paper or between layers of moist cloth.

From—Mr. G. K. Easton, Pa.
Q.—What is the most effective material for killing the Japanese beetle?

Ans.—The ever-prevalent Japanese beetle will soon be with us again. The most effective material for killing Japanese beetles is DDT. Though obtainable in many forms, I recommend the use of a wettable powder as the most effective means of elimination. If you prefer, you might also try lead arsenate, rotenone or lime. One word of caution, the preparations are poisonous to human beings and animals, so be careful in using and storing.

FOOD AND SOUP SALE FOR 8th GRADE PUPILS

A Food and Chicken Corn Soup sale will be held at the Elizabethtown Market, Friday, May 23rd., by the Mothers of the Florin and Maytown Sixth grade pupils.

The proceeds will be used to help finance a week's stay for approximately forty pupils at Camp Swatara near Bethel, Pa.

FOOD SALE SATURDAY

The Junior Class of M. J. H. S. will have a Food Sale at Titus Rut's Insurance Agency Saturday morning, May 24. The sale will begin at 9:00.

Thomas Kear is president of the class. Nancy Swanson is chairman of the Food Sale.

A PROCLAMATION
WHEREAS: The annual sale of Buddy Poppies by the Veterans of Foreign Wars of the United States, an organization chartered by the Congress, has been officially recognized and endorsed by the President of the United States and the Veterans Administration, and
WHEREAS: The proceeds of this worthy fund raising campaign are used exclusively for the benefit of disabled and needy veterans, and the widows and orphans of deceased veterans, and
WHEREAS: The basic purpose of the annual sale of Buddy Poppies by the Veterans of Foreign Wars is eloquently reflected in the desire to "Honor The Dead By Helping the Living;" therefore,
I, Charles L. Fish, Burgess of the Town of Mount Joy, do hereby recognize the patriotic merits of this cause by urging the citizens of this community to contribute generously to its support through the purchase of Buddy Poppies, on the day (or days) set aside for the distribution of these symbols of loyalty in this city. I urge all patriotic citizens to wear a Buddy Poppy as mute evidence of our gratitude to the men of this country who have risked their lives in defense of the freedoms which we continue to enjoy as American citizens.

Signed: C. L. FISH Burgess
