### Field Research—Facts About P-C-A Mix & Hay

Field tests have proven it... Independent laboratories have corroborated the proof... Statements to the contrary... None have disproven it.

**MORE CAROTENE... MORE PROTEIN... MORE VITAMIN "A"**

P-C-A MIX is not a miracle product. We do not claim to replace the natural chemical composition in hay. We do claim to help retain the Vitamins important to animals as well as to human beings. Hay cut after the dew is off... sun-dried for three hours, then wind-dried and again sun-cured for another two hours, is ready for P-C-A MIX and for baling or storing in your hay mow. If it is "hay weather" and instructions are followed and P-C-A MIX is used, you will not experience any trouble and will say, "Best hay I ever put up."

P-C-A MIX costs practically nothing, for the results will prove to the most skeptical farmer that he cannot afford to put away his old way with the possibilities of a 1/2 or a total loss because of the weather conditions and maybe the total loss of his herd and barn through SPONTANEOUS COMBUSTION.

**PROPER TIME FOR STORAGE**

The proper time for storing hay is when the hay carries most protein and Vitamin "A" (Carotene).

P-C-A MIX can be bought at Samuel Ober's Farm, Elizabethtown R. D. 3 or
