We don't like to think that everyone is too busy with their picnics to send us a donation. It's no picnic in any Army, Navy or Marine Base anywhere. Just remember all the pleasures you are having now are not had by those in the service. Are you so selfish you can't help make the boys and girls have a Merry Christmas even if they can't go on picnics like you are now?
The total received was printed in last week's Bulletin. It would be a sin and a shame to tell how much was received this week. In fact I'm sure the fellows and girls in the service would be hurt if they saw how much was donated.
Help us, please. Send donations to Box 243, Mt. Joy, Pa.

FIX-UP TIPS

How to Cut Square Opening
TO CUT a square or rectangular opening with round corners in a piece of wood or similar board, holes of the proper radius should be drilled at the corners. Then you can saw straight down from one hole to the

next. This will assure that the opening will be of the dimensions wanted and that the corners will have the correct radius. To cut a similar opening with square shoulders, use a similar technique, drilling small-diameter holes at the corners with their outer edges tangent to the sides of the rectangle. Proceed as above. Then square off the small arc in each corner with a file. — Illustration, courtesy of Popular Mechanics.
