The Game Commission has designated December 15, 16 and 17 the antlerless deer season for 1952, and it is hoped that at least 50,000 antlerless deer will be harvested then. Over 224,000 "doe" licenses were issued for the three day hunt. A considerable reduction in the deer herd is necessary to bring it more nearly into balance with its natural food supply, decrease crop damage and bring the sex ratio of the herd into better adjustment.

On Monday, December 13, the antlerless deer season will open at 9 a. m. and close at 5 p. m. On December 16 and 17 hunting hours will be 7 a. m. to 5 p. m.

Persons who may legally hunt "does" are those possessed of an antlerless deer license for the specific county in which they will hunt. However, anyone who killed a legal antlered deer this year, in the preceding archery or the "buck" season, may not hunt for or kill antlerless deer during the "doe" season, even though he may have purchased an antlerless deer license.

Landowners, lessees or other farm occupants who are citizens of the United States and are residing upon and regularly and continuously cultivating the soil for general crop purposes, commercial truck growing, and commercial nurseries within areas declared open for the hunting of antlerless deer may legally hunt for such deer on their own and adjoining lands without either a resident hunting license or antlerless deer license. Consent of the owner of immediately adjacent land is required by law. Hunting on immediately adjacent open lands which are owned by either the Commonwealth or the Federal Government is not lawful without a hunting license and an antlerless deer license.
