**P. P. & L. CONTINUES
EXPANSION PLANS**

Charles E. Oakes, P.P. & L. president, today announced that P. P. & L. and its subsidiary, the Scranton Electric Company, spent \$47.5 million for the construction of new, and the expansion of existing facilities in 1953 and that the construction budget for 1954 for the combined companies will be \$33.3 million. According to Mr. Oakes, the construction expenditures for the five-year period, 1954-1958, will reach an estimated \$147 million, reflecting the anticipated continued growth in Central Eastern Pennsylvania.

In reviewing construction progress during 1953, Mr. Oakes pointed to the new generating capacity which was added to the P.P. & L.-Scranton system. Completion of the fourth unit at the Sunbury plant, 125,000 kw of capacity, boosted the total capacity of this important plant to a total of over 400,000 kw. At the Stanton power plant, a 40,000 kw addition went into service late in 1953, boosting the total capacity at the plant to 142,000 kw.

A continuation of this rapid rate of construction is forecast for 1954, Oakes said. Another major addition to the company's generating capacity is scheduled for the coming year when the initial 132.50-kw unit at the Martins Creek plant goes into service about mid-summer. A second 132.50-kw unit is scheduled to go in service there in 1956.

Commenting on the past year's business, Mr. Oakes pointed to new highs reached in many phases of the combined company's operations. Increased business during 1954 brought total operating revenues for the two companies to a record \$106,380,724. The utility head pointed out that increased business was recorded in each major sales classification.

Domestic and commercial electric revenues rose to \$58,886,720, an increase of 7.2 per cent over 1952. Industrial power revenues have also shown continued healthy growth since 1945, reaching a record high of \$38,957,147 during the past year. This continued growth in operating revenues, Oakes stated, reflects the soundness of business conditions in the highly diversified area served by the company.

In concluding, the P.P. & L. head said that based on these continually-accelerating demands for electric power, the sound economic conditions existing within the area, and a steady inflow of new industry additions further diversifying industry in the area, the year ahead can hold only bright promise for continued growth and progress and the further economic development of Central Eastern Pennsylvania.
