New ALL-NYLON CORD KELLY

# Penna. Game Commission Weekly Letter

Deer hides collected by Game Commission personnel last fall and winter, have been sold to the highest bidder. The transaction netted the Game Fund \$2,831.80. The number of hides nvolved was 2,151.

The hides were from deer kiled illegally in the 1953 season, number of road-killed animals and many shot while destroying crops. In numerous instances, too, hunters turned over to game protectors rather than waste them.

Woodchuck and Coon Hunting Period Closed to Dog Training Relying to inquiries, the Game Commission furnishes the following information.

Raccoons and woodchucks may be taken in unlimited numbers during the period closed to dog training. But is it unlawful to use dogs to hunt, chase or train upon these wild game species in that period-extending from the 1st day of April to the 31st day of July.

A 1953 hunting license must be owned and worn by persons hunting woodchucks, coons or any manner of wildlife, whethr classed as game or predator, any time of year.

Give Wildlike a Brake Persons who have studied the roblem of wildlife kills on the ighways agree that a little caution by motorists would prevent much of the slaughter. Importantly, wild species slain on roads in spring and early summer account for a much greater loss than at other times because they represent brood stock.

Being unpredictable, some wildlife will run or fly to un-

preventable destruction in front of a car or truck. In many cases however, allowing just an extra second of time to clear the vehicle's path would make the difference between life or death

Game authorities are conscious of the highway hazards winning run. humans also face. They make it clear no one should endanger umbia's first man was safe on life or property to avoid striking a bird or animal. However, if drivers who can do so safely will slow down much wildlife ning run came in on a successwill be spared without risk to ful squeeze bunt that was good

for wild creatures.

Sports men Plant For Larger

Wildlife Harvest To most people, mention of spring activities on the farm means soil tilling and planting. Crop harvesting suggests colorful fall scenery and bulging stores of ripened grains, fruits and vegetables.

But in recent years an increasing number of sportsmen's run the last of the second inning organizations, Boy Scouts, bea- Kear walked, Mumma laced a gle clubs and others also save hit to right field but Kear was engaged in planting. In their out trying to score. Mumma case grain and fruit crops are scored on a wild pitch. seldom harvested; they are planted largely to supply, locals in the third inning came ticipating in sound food and Mumma and Bailey, cover management practices to preserve and increase wild spe-

Numerous organizations are planting grains or food-bearing trees, shrubs and vines on their club property. Others, lacking land on which to plant, pay the farmers to allow strips of grain to stand unharvested close to protective game cover along woodlands or hedges. Corn is the grain for which they usually contract because it provides the best winter food for a variety of wild creatures. In cases where protection is more necessary than food the emphasis is on establishing evergreen plantatio's, thickets, briar patches,

and brush piles. tions have done food and cover Marble Winners development work on state of federal land. On such holdings, In Play-Offs with proper consent and supervision, they have planted food released food-bearing species

### Baseball Team In Tie With E-town
