Gamma Globulin Available to Direct Polio Contacts

Dr. Oscar Davis, District Medical Director, has announced that as long as gamma globulin is supplied to his office it will be available to the family physicians of contact eligible to receive the gamma globulin.

"Any person having direct contact with a diagnosed case of poliomyelitis should call his family physician as to the advisability of having gamma globulin administered, said Davis, and if the person is eligible to receive the gamma globulin it will be supplied as in the past, without any charge."

The family physician will make the necessary arrangements to obtain the gamma globulin at the District Medical Office and will administer it to his patient.

Gamma globulin will not prevent poliomyelitis, but it is believed to have properties that decrease the severity of the disease. Any effectiveness persists for about six weeks after the proper dosage has been given, with a decrease in half of its effectiveness about the 21st day after inoculation. Three weeks later it again shows a marked decrease in its effectiveness of the properties in the gamma globulin.

Dr. Davis restated the fact that gamma globulin is allocated to the States by the Office of Defense Mobilization and then is distributed by the State Departments of Health.

"No person established as eligible to receive gamma globulin will be denied as long as the gamma globulin is made available for Lancaster City and Lancaster County," asserted Dr. Davis.

The totals for September showed a decrease in the number of cases reported to the District Medical Office as compared to the number reported in August. Four cases were reported in Lancaster City and 19 cases in Lancaster County in September.

Mennonites Sending Aid To Indo-China

Mennonites in this community through their Mennonite Central Committee are initiating a relief program to aid distressed refugees and war sufferers in battle-ravaged Indo-China.

A first shipment of 30 tons of canned beef, soap and clothing is enroute to the state of Viet Nam. These relief supplies were shipped in response to investigations by Delbert Wiens of Reedley, Calif., the Committee's first representative who has been in Saigon since August.

Three relief workers from Committee projects in Formosa and Korea will be transferred to assist Wiens in the distribution of relief supplies and to carry on relief and rehabilitation services. They are Roy Eby of New Providence, Penn. from Formosa, and Adam Ewert of Mountain Lake, Minn., and Mrs. Eva Harshbarger, a former member of the Bethel College faculty, North Newton, Kansas, both from Korea.

More than 200,000 refugees have already been moved from northern to southern Indo-China. Experienced relief workers who have seen Chinese famines and European refugee problems describe the situation as "the worst it can be." The most urgent need appears to be the resettlement and rehabilitation of these refugees, according to a report from relief worker Wiens.
