### P. P. & L. Gives 12 Scholarships At Penn State

Pennsylvania Power & Light Company awarded 12 new annual scholarships in the college of agriculture at Penn State University on Saturday, Nov. 12, at special ceremonies on the campus. Under a continuing program developed in 1947 by PP&L in cooperation with the university, the awards, limited to young men and women in the utility's service area, are made each year to three outstanding students in each of the four undergraduate classes in the college of agriculture. To date, 21 students have been graduated from Penn State through the PP&L scholarship program.

Dr. Lyman E. Jackson, dean of the College of Agriculture at Penn State, presided at the exercises. R. T. Jones, PP&L farm sales manager, presented the awards for the utility.

Those named to receive the current agricultural scholarships at Penn State are seniors: Donald A. Campbell 205 South Eighth St., Columbia; Ned R. Sittler, Jr., 40 South Main St., East Prospect; and Donald A. Harter, R1, Slatington; Juniors: Richard L. Hook, Lewisburg R. D. 1; David Price, Hughesville R1; and Edgar H. Rits, Sinking Spring; Sophomores: Roger L. Odell, Seelyville; Edward E. Schopf, 53 College Avenue, Mountville; and Edward L. Schwarz, Jr., 56 South Pearl St., Lancaster, and freshmen: Robert E. Wagner, Williamsport R2; Veris W. Corderman, Watsonstown R2; and Martin O. Henninger, Jr., Elizabethtown.

Pennsylvania Power & Light Company, recognizing a need for sound agricultural balance in the economy of Central Eastern Pennsylvania, has actively

sponsored the use of up-to-date and productive farming techniques. Encouraging specialized training in agriculture therefore is an integral part of the utility's program. . . and PP&L began in 1947 to offer 12 yearly scholarships of \$200 each to deserving young men and women interested in farm study.

Winners of the 12 scholarships each year are determined by the university authorities from lists of outstanding students recommended by county agents and school officials in the chartered territory served by the utility. Recommendations are made on the basis of need, character and scholastic standing.

It is possible for a student to receive a scholarship in his freshman year at Penn State and to continue to get the award each year for his entire four years of undergraduate work. The chief obligation placed on scholarship holders is that they maintain a good academic record at the university. Should a student leave the university, elect to pursue another course of study outside of agriculture or fail to maintain an accepted scholarship rating he is replaced as a scholarship grantee by another student in his own class chosen from the lists of students previously recommended.

Among the 21 so far graduated as a result of the P. P. & L. scholarship program are several agricultural extension service workers and vocational agricultural teachers an agricultural engineering specialist a bacteriologist, a nurseryman and a number of foresters and farm managers. The influence already reflected by these initial graduates, ranging from agricultural education to horticulture and from animal husbandry to agricultural engineering, is but early indication of the beneficial effects such scholarships may well have on the future of area agriculture.

### STATE ACCELERATES REHABILITATION OF DISABLED RESIDENTS

HARRISBURG - PNS - Little known is the fact that Pennsylvania today has embarked upon a vastly accelerated program of rehabilitating disabled residents of the Keystone State - a program which four years from now is scheduled to reach close to 10,000 rehabilitations a year.

Some indication of the increase that will be necessary to reach this figure by 1959 can be seen from the fact that during the past year the number of Pennsylvanians rehabilitated and gainfully employed was approximately 4000.

"The burden of dependency - almost half a billion dollars a year nationally - which results directly from disability, has grown so great that Congress recently passed a new law to help the various states, such as Pennsylvania, expand their vocational rehabilitation programs promptly and progressively," commented a spokesman for the Pennsylvania Bureau of Rehabilitation.

To reach the goal of 10,000 rehabilitations a year by 1959, the Keystone State will have to step up its rate progressively each year until that time - a program already put into effect.

Rehabilitation centers, such as the one now a-building in Johnstown, will provide part of the answer, the Bureau said.

### CROPS RUN BETTER THAN EXPECTED

HARRISBURG - PNS - More bountiful harvests took place on Pennsylvania farms last month than had been expected earlier, Pennsylvania News Service learned this week.

Corn production ran in the neighborhood of 58,430,000 bushels, about 5,000,000 under last year and still under average. On the other hand, yield per acre, at an average of 43 bushels, is three bushels under last year.

The reported yield for wheat was for an average of 26 bushels per acre, two less than the 1954 all-time high, while harvest for this year was 16,172,000 bushels - down 3,600,000 from last year.

The oats yield is an all-time record 44 bushels per acre for a crop of 35,553,000 bushels, and barley production is estimated at 8,968,000 bushels.

Potato estimates held fairly steady for a yield of 13,680,000 bushels from an average of 240 bushels per acre, ten under last year.

Tobacco averaged 1501 pounds to the acre - 50 pounds less than in 1954. The crop is estimated at 40,315,000 pounds - down some 3 millions pounds from last year.

The Department of Agriculture noted that on the important corn front, early planted corn where yields were not promising, were diverted to silage.

### GET FEEL OF ROAD WHEN IT'S SLIPPERY

HARRISBURG - PNS - Don't rely on cinders on a snowy or icy highway to prevent accidents.

That is the word of caution offered this week by Pennsylvania safety officials as motorists of the Keystone State prepare for the annual Thanksgiving trek-on-wheels to grandma's house for turkey and aspirin.

It was pointed out that while cinders and other abrasives are of considerable help they are by no means the complete answer - "and motorists should drive accordingly."

A spokesman for the State Department of Highways told a Pennsylvania News Service reporter this week:

"Cinders or sand particles are spread on curves hills and bridges as well as approaches to railroad grade crossings and intersections - but because of alternate thawing and freezing, rains or new snow it is necessary that some locations be gone over repeatedly. Even so it is not always possible to guarantee safe traction."

Pennsylvania State Police pointed out that the good driver will always make it a point to "get the feel" of the packed snow or ice and in anticipating stops in good time, start stopping well in advance of his stopping point.

Emphasized was the fact that even with winterized tires it requires more than 180 feet to stop on ice at a speed of only 20 miles an hour.

### Sale Register

Saturday, Nov. 26 - on the premises on Main St., in Florin, a 2 1/2 story frame house. Sale at 2 p. m. by John L. Milligan, C. S. Frank, Auct.

## YOU'RE WASTING VALUABLE HEAT UP YOUR CHIMNEY!

RECLAIM IT TO HEAT YOUR COLD, DAMP BASEMENT, DRAFTY ATTIC, OR ATTACHED GARAGE WITHOUT INCREASING YOUR FUEL BILL.

### A NEW ENGINEERING ACHIEVEMENT

... IS INSTALLED IN THE FLUE PIPE OF YOUR FURNACE.  
 ... IS DESIGNED TO CAPTURE AND UTILIZE THE HEAT GOING TO WASTE UP THE CHIMNEY.

The Hoskinson Free Heater is the answer to heating problem rooms. Gives you extra heat for your playroom, attic, workshop, garage, or any extra room, yet it doesn't cost a penny more for fuel. In fact you'll save on fuel by keeping cold rooms properly heated. Phone or Write For A Heating Engineer. He Will Be Happy To Explain The FREE HEATER At No Obligation To You.

**You Get Heat, Even When Your Furnace Is Just Making Hot Water!**

The Hoskinson Free Heater is able to reclaim and utilize two-thirds of the heat you are now wasting up your chimney. . . . Our unit, while not much bigger than a hat box, has a heat output approximately equal to five average size radiators. This heat is yours at no extra fuel cost.

**HAVE ONE INSTALLED NOW**  
**And Be A Heat-Happy Home Owner This Winter!**

Wide Home Owner Acceptance—Guaranteed 10 Yrs.
