PENNSYLVANIA LEADS IN ICE CREAM

Harrisburg -PNS- Pennsylvania leads the Nation in production of ice cream and stands high in the manufacture of many other dairy products, the State Department of Agriculture revealed this week.

The Keystone State for many years has been tops in ice cream making. It is estimated that last year better than 70 million gallons of ice cream — enough to provide each man, woman and child in the state with about 27 quarts — was made last year.

The all-time Pennsylvania ice cream record of 80 million gallons was churned out in '46 — with last year's estimated production around two million gallons more than for the preceding year.

It was noted that out of the grand total, roughly nine million gallons were made for direct-to consumer sales, the bulk being made for wholesale to non-manufacturing retailers.

Pennsylvania is the fourth ranking dairy products state but during the year only approximately 11 million pounds of creamery butter were made in the Commonwealth.

Nearly 10 million pounds of cheese, with the exception of cottage cheese were made — with cottage cheese alone amounting to better than 45 million pounds.
