PP&L Purchases Power Plant Site Near York Haven

Pennsylvania Power & Light Company recently completed purchase of a 766-acre tract of land 15 miles below Harrisburg for future use as a power plant site. Mr. Chas. E. Oakes, the utility's president, announced today. The actual purchase followed more than a year's investigation of the site to determine foundation conditions, stream flow and other suitability factors.

Mr. Oakes emphasized that purchase of the land on the west bank of the Susquehanna River near York Haven and directly across from Bainbridge, does not necessarily mean the utility expects to build a power plant of any type there at the present time or in the near future.

"But, to insure a continuing supply of electric power for Central Eastern Pennsylvania we must lay the ground work for new generating station capacity years in advance," the PP&L head said. He pointed out that long-range plans are an integral part of the utility's operations. In its planning for the future electrical requirements of its 10,000 square mile service area, PP&L projects these needs many years ahead on a broad basis with the plans becoming more definite as the customer needs become more evident.

Although no immediate use of this new plant site is contemplated, any plans for utilizing this new site will be announced by the Company as soon as they develop.
